This Prospectus sets forth basic information about the Fund that you should know before investing. It should be read and retained for future reference.

The date of this Prospectus is September 1, 2017.

SUMMARY SECTION

Investment Objective

The investment objective of the Palmer Square Strategic Credit Fund (the “Fund”) is capital appreciation with an emphasis on absolute (positive) returns and low correlation to the broad equity and bond markets.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A shares of the Fund. More information about these and other discounts is available from your financial professional and in the section titled “Class A Shares Purchase Programs” on page 32 of this Prospectus and in “APPENDIX A – Waivers and Discounts Available from Intermediaries” of this Prospectus.

	Class A Shares	Class I Shares
Shareholder Fees		
<i>(fees paid directly from your investment)</i>		
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75%	None
Maximum deferred sales charge (load) (as a percentage of the lesser of asset value at purchase or redemption)	1.00% ¹	None
Redemption fee	None	None
Wire fee	\$20	\$20
Overnight check delivery fee	\$25	\$25
Retirement account fees (annual maintenance fees)	\$15	\$15
Annual Fund Operating Expenses		
<i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management fees	0.99%	0.99%
Distribution and/or service (12b-1) fees	0.25%	None
Other expenses	3.63%	3.63%
Dividend and interest expense on short sales	2.65%	2.65%
Shareholder servicing fee	0.08%	0.08%
All other expenses	0.90%	0.90%
Acquired fund fees and expenses	0.01%	0.01%
Total annual fund operating expenses²	4.88%	4.63%
Fees waived and/or expenses reimbursed ³	(0.58)%	(0.58)%
Total annual fund operating expenses after recoupment of waived fees and/or reimbursed expenses^{2,3}	4.30%	4.05%

- No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge (“CDSC”) of 1% will be imposed on certain redemptions of such shares within 12 months of the date of purchase.
- The total annual fund operating expenses and net operating expenses do not correlate to the ratio of expenses to average net assets appearing in the financial highlights table, which reflects only the operating expenses of the Fund and does not include acquired fund fees and expenses.
- The Fund’s advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding, as applicable, any acquired fund fees and expenses (as determined in accordance with Form N-1A), interest, taxes, dividends and interest expenses on short positions, brokerage commissions and extraordinary expenses such as litigation expenses) do not exceed 1.64% and 1.39% of the average daily net assets of the Fund’s Class A shares and Class I shares, respectively. This agreement is effective until August 31, 2018, and it may be terminated before that date only by Trust’s Board of Trustees. The Fund’s advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made to the Fund for a period ending three full fiscal years after the date of the waiver or payment. This reimbursement may be requested from the Fund if the reimbursement will not cause the Fund’s annual expense ratio to exceed the lesser of (a) the expense limitation amount in effect at the time such fees were waived or payments made, or (b) the expense limitation amount in effect at the time of the reimbursement.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The one-year example and the first year of the three, five and ten-year example are based on net operating expenses, which reflect fee waiver and/or expense reimbursement by the Fund's advisor. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	One Year	Three Years	Five Years	Ten Years
Class A shares	\$982	\$1,909	\$2,839	\$5,173
Class I shares	\$407	\$1,345	\$2,290	\$4,684

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 255% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to provide absolute total returns over a complete market cycle through a portfolio of diversified long and short exposure to the credit markets. Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in credit-related instruments, including credit-related securities. Credit-related instruments include: (i) U.S. and non-U.S. collateralized loan obligations ("CLOs") and mortgage-backed securities; (ii) corporate bonds, notes, debentures, and convertible bonds; (iii) securities issued or guaranteed by the U.S. government, its agencies, instrumentalities, or sponsored entities; (iv) senior secured floating rate and fixed rate loans or debt, (v) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt; (vi) derivatives based on credit related instruments; and (vii) other fixed, floating, or variable interest rate securities and instruments. The Fund will limit its investments in CLOs to 15% of its net assets at time of purchase.

The Fund's long-short exposure will vary over time based on the advisor's assessments of market conditions and other factors. The Advisor anticipates that, in general, the portfolio of the Fund will not be more than 100% short.

Palmer Square Capital Management LLC ("Palmer Square" or the "Advisor"), the Fund's investment advisor, seeks to achieve the Fund's investment objective by utilizing a variety of instruments in order to achieve favorable risk-adjusted returns over a market cycle through investment selection and management of risk exposure. The Advisor allocates a portion of the Fund's assets to those instruments that the Advisor believes individually provide the potential for attractive long-term capital appreciation, and collectively provide for overall investment diversification while also decreasing portfolio sensitivity to general market fluctuations. In an effort to build a portfolio of diversified long and short exposure primarily to the credit markets, the Advisor utilizes (1) a top-down approach, which involves macro-level, top down industry level analysis and assessing the relative value across different credit investment opportunities, and (2) a bottom-up approach, which involves primarily company-specific analyses, identifying issuers with either improving (when investing long) or deteriorating (when investing short) fundamentals, and identifying the appropriate instruments within the issuer's capital structure.

The Advisor may not invest in all of the instruments listed all of the time due to the opportunistic and flexible nature of its investment approach. The performance of the Fund may not correlate to the performance of traditional markets because of the Fund's focus on limiting downside investment risk. The Fund may engage in frequent and active trading.

The Fund may invest in long and short positions in domestic and foreign debt securities of any maturity and credit quality, including securities rated below investment grade (often called “junk bonds”) and unrated securities. Investment grade securities are those rated in the Baa3 or higher categories by Moody’s Investors Service, Inc. (“Moody’s”), or in the BBB- or higher categories by Standard & Poor’s, a division of McGraw Hill Companies Inc. (“S&P”), or Fitch Ratings Ltd. (“Fitch”) or, if unrated by S&P, Moody’s or Fitch, or another Nationally Recognized Statistical Rating Organization (“NRSRO”), determined by the Advisor, to be of comparable credit quality. The Fund may invest in both U.S. Dollar denominated and non-U.S. Dollar denominated loans and securities, as well as securities of foreign issuers, including issuers in both developed and emerging markets.

The Fund may also invest in asset-backed securities comprise of loans or leases secured by motor vehicles or other equipment, consumer receivables from sources such as credit cards or student loans, or cash flows from operating assets such as royalties and leases.

Mortgage-backed securities which the Fund may invest include those issued or guaranteed by federal agencies and/or U.S. government sponsored instrumentalities, such as the Government National Mortgage Administration (“Ginnie Mae”), the Federal Housing Administration (“FHA”), the Federal National Mortgage Association (“Fannie Mae”) and the Federal Home Loan Mortgage Corporation (“Freddie Mac”). The Fund may also invest in commercial mortgage-backed securities (“CMBS”) and collateralized mortgage-backed securities (“CMOs”) issued or guaranteed by private entities.

For the purposes of achieving the Fund’s investment objective, hedging risks, and enhancing liquidity, the Fund may also employ derivatives, such as: puts and calls on U.S. Treasury futures; options, swaps and other interest rate derivatives; and credit default swaps on selected entities or indexes (where the Fund may act as either a buyer or seller). Additionally, the Fund may employ the types of derivatives referenced above in order to achieve its investment objective by, among other practices, replicating a certain type of credit exposure, obtaining short or long exposures to credit and/or interest rates, or taking a position in light of a potential appreciation or depreciation in value of a company’s securities.

The Fund may invest up to 20% of its total assets in equity securities and instruments of U.S. and foreign companies, including common stock, preferred stock, depository receipts, rights, warrants and instruments the prices of which are linked to the value of common stock. The Fund may hold long or short positions in equity securities and instruments, and may invest in equity securities and instruments of issuers of any market capitalization, including small and mid-capitalization companies. The equity securities in which the Fund invests may include exchange-traded funds (“ETFs”), which are pooled investment vehicles that generally seek to track the performance of specific indices and are traded on exchanges, and mutual funds (including other funds managed by the Advisor).

The Fund is classified as “non-diversified” which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund.

Principal Risks of Investing

Risk is inherent in all investing. A summary description of certain principal risks of investing in the Fund is set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors and special considerations associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective.

Asset-Backed Securities Risk. The Fund’s investments in collateralized loan obligations (“CLOs”) and other asset-backed securities involve interest-rate risk, prepayment risk and the loss of money if there are defaults on the loans underlying these securities.

Asset Segregation Risk. As a series of an investment company registered with the SEC, the Fund must segregate liquid assets, or engage in other measures to “cover” open positions with respect to certain kinds of derivatives and short sales. The Fund may incur losses on derivatives and other leveraged investments (including the entire amount of the Fund’s investment in such investments) even if they are covered.

Bank Loan Risk. The Fund's investments in secured and unsecured participations in bank loans and assignments of such loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest. The Fund may invest in loan participations that are rated by a nationally recognized statistical rating organization or are unrated, and may invest in loan participations of any credit quality, including "distressed" companies with respect to which there is a substantial risk of losing the entire amount invested. The market for bank loans may not be highly liquid. Bank loan trades typically take longer than seven days to settle which may force the Fund to sell other securities at a time when it would not otherwise do so and may incur losses in order to pay redemption proceeds on time. In addition, bank loans may not be considered securities under U.S. federal securities laws and, as a result, investments in them may not have the protection of federal securities laws.

Collateralized Loan Obligations Risk. The Fund is subject to asset manager, legal and regulatory, limited recourse, liquidity, redemption, and reinvestment risks as a result of the structure of CLOs in which the Fund may invest. A CLO's performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. Changes in the regulation of CLOs may adversely affect the value of the CLO investments held by the Fund and the ability of the Fund to execute its investment strategy. CLO debt is payable solely from the proceeds of the CLO's underlying assets and, therefore, if the income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment. CLO debt securities may be subject to redemption and the timing of redemptions may adversely affect the returns on CLO debt.

Convertible Securities Risk. Convertible securities are subject to market and interest rate risk and credit risk. When the market price of the equity security underlying a convertible security decreases the convertible security tends to trade on the basis of its yield and other fixed income characteristics, and is more susceptible to credit and interest rate risks. When the market price of such equity security rises, the convertible security tends to trade on the basis of its equity conversion features and be more exposed to market risk. Convertible securities are typically issued by smaller capitalized companies with stock prices that may be more volatile than those of other companies.

Credit Risk. If an issuer or guarantor of a debt security held by the Fund or a counterparty to a financial contract with the Fund defaults or is downgraded or is perceived to be less creditworthy, or if the value of the assets underlying a security declines, the value of the Fund's portfolio will typically decline. Subordinated securities are more likely to suffer a credit loss than non-subordinated securities of the same issuer and will be disproportionately affected by a default, downgrade or perceived decline in creditworthiness.

Currency Risk. The values of investments in securities denominated in foreign currencies increase or decrease as the rates of exchange between those currencies and the U.S. Dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile and are affected by factors such as general economic conditions, the actions of the United States and foreign governments or central banks, the imposition of currency controls, and speculation.

Derivatives Risk. Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Using derivatives can have a leveraging effect and increase fund volatility. Derivatives transactions can be highly illiquid and difficult to unwind or value, and changes in the value of a derivative held by the Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments underlying derivatives are also applicable to derivatives trading. However, additional risks are associated with derivatives trading that are possibly greater than the risks associated with investing directly in the underlying instruments. These additional risks include, but are not limited to, illiquidity risk and counterparty credit risk. For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from the Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm.

Distressed Securities Risk. The Fund's investment in distressed securities may involve a high degree of credit risk, price volatility and liquidity risk. These instruments, which involve loans, loan participations, bonds, notes, and non-performing and sub-performing mortgage loans, typically are unrated, lower-rated, in default or close to default.

Emerging Market Risk. Many of the risks with respect to foreign investments are more pronounced for investments in issuers in developing or emerging market countries. Emerging market countries tend to have more government exchange controls, more volatile interest and currency exchange rates, less market regulation, and less developed economic, political and legal systems than those of more developed countries. In addition, emerging market countries may experience high levels of inflation and may have less liquid securities markets and less efficient trading and settlement systems.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

ETF and Mutual Fund Risk. The Fund's investment in ETFs, mutual funds (including other funds managed by the Advisor) generally reflects the risks of owning the underlying securities the ETF or mutual fund holds. It may also be more expensive for the Fund to invest in an ETF or mutual fund than to own the portfolio securities of these investment vehicles directly. Investing in ETFs or mutual funds involves duplication of advisory fees and certain other expenses. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. In addition, the Fund may invest in mutual funds which invest a larger portion of their assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors.

Extension Risk. If interest rates rise, repayments of fixed income securities may occur more slowly than anticipated by the market. This may drive the prices of these securities down because their interest rates are lower than the current interest rate and they remain outstanding longer.

Fixed Income Securities Risk. The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter-term and higher rated securities.

Foreign Investment Risk. The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. In addition, changes in exchange rates and interest rates may adversely affect the values of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms.

Government Intervention and Regulatory Changes Risks. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") has significantly enhanced the rulemaking, supervisory and enforcement authority of regulators. For example, major changes under the Dodd-Frank Act or other legislative or regulatory actions could materially affect the profitability of the Fund or the value of investments made by the Fund or force the Fund to revise its investment strategy. Any of these developments could expose the Fund to additional costs, taxes, liabilities, enforcement actions and reputational risk.

Government-Sponsored Entities Risk. The Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government or its agencies or instrumentalities. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) when it is not obligated to do so.

High Yield (“Junk”) Bond Risk. High yield bonds are debt securities rated below investment grade (often called “junk bonds”). Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Companies issuing high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.

Interest Rate Risk. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with lower rated securities being more volatile than higher rated securities. A rise in rates tends to have a greater impact on the prices of longer term or duration securities. Calculations of duration may be based on estimates and may not reliably predict a security’s sensitivity to changes in interest rates. Falling interest rates also create the potential for a decline in the Fund’s income. Changes in governmental policy, rising inflation rates, and general economic developments, among other factors, could cause interest rates to increase and could have a substantial and immediate effect on the values of the Fund’s investments. In addition, a potential rise in interest rates may result in periods of volatility and increased redemptions that might require the Fund to liquidate portfolio securities at disadvantageous prices and times.

Large-Cap, Mid-Cap and Small-Cap Companies Risk. The Fund’s investment in larger companies is subject to the risk that larger companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion. The securities of small-capitalization and mid-capitalization companies may be subject to more abrupt or erratic market movements and may have lower trading volumes or more erratic trading than securities of larger, more established companies or market averages in general. In addition, such companies typically are more likely to be adversely affected than large capitalization companies by changes in earning results, business prospects, investor expectations or poor economic or market conditions.

Leverage Risk. Certain Fund transactions, including entering into futures contracts and taking short positions in financial instruments, may give rise to a form of leverage. Leverage can magnify the effects of changes in the value of the Fund’s investments and make the Fund more volatile. Leverage creates a risk of loss of value on a larger pool of assets than the Fund would otherwise have had, potentially resulting in the loss of all assets. The Fund may also have to sell assets at inopportune times to satisfy its obligations in connection with such transactions.

Liquidity Risk. The Fund may not be able to sell some or all of the investments that it holds due to a lack of demand in the marketplace or other factors such as market turmoil, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs it may only be able to sell those investments at a loss. In addition, the reduction in dealer market-making capacity in the fixed income markets that has occurred in recent years has the potential to decrease the liquidity of the Fund’s investments. Illiquid assets may also be difficult to value.

Management and Strategy Risk. The value of your investment depends on the judgment of the Advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect.

Market Risk. The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

Mortgage-Backed and Asset-Backed Securities Risk. Mortgage-backed and asset-backed securities represent interests in “pools” of mortgages or other assets, including consumer loans or receivables held in trust. Mortgage-backed securities are subject to “prepayment risk” (the risk that borrowers will repay a loan more quickly in periods of falling interest rates) and “extension risk” (the risk that borrowers will repay a loan

more slowly in periods of rising interest rates). If the Fund invests in mortgage-backed or asset-backed securities that are subordinated to other interests in the same pool, the Fund may only receive payments after the pool's obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the assets held by a pool may limit substantially the pool's ability to make payments of principal or interest to the Fund, reducing the values of those securities or in some cases rendering them worthless. The risk of such defaults is generally higher in the case of mortgage pools that include so-called "subprime" mortgages. The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Non-Diversified Fund Risk. The Fund is classified as "non-diversified," which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Fund to greater market risk and potential losses than if its assets were diversified among the securities of a greater number of issuers.

Portfolio Turnover Risk. Active and frequent trading of the Fund's portfolio securities may lead to higher transaction costs and may result in a greater number of taxable transactions than would otherwise be the case, which could negatively affect the Fund's performance. A high rate of portfolio turnover is 100% or more.

Prepayment or Call Risk. Many issuers have a right to prepay their securities. If interest rates fall, an issuer may exercise this right. If this happens, the Fund will not benefit from the rise in market price that normally accompanies a decline in interest rates, and will be forced to reinvest prepayment proceeds at a time when yields on securities available in the market are lower than the yield on the prepaid security. The Fund may also lose any premium it paid on the security.

Restricted Securities Risk. The Fund may not be able to sell a restricted security (e.g., a 144A security that is exempt from registration) when the Advisor considers it desirable to do so or may have to sell such a security at a lower price than the Advisor considers desirable. A restricted security which was liquid when purchased may subsequently become illiquid. In addition, transaction costs may be higher for restricted securities than for more liquid securities.

Senior Loan Risk. The Fund may invest in floating or adjustable rate senior loans. These investments are subject to increased credit and liquidity risks compared to other types of loans. Senior loan prices may be adversely affected by supply-demand imbalances caused by conditions in the senior loan market or related markets. Senior loans may also be subject to structural subordination and, although the loans may be senior to equity and other debt securities in the borrower's capital structure, the loans may be subordinated to other obligations of the borrower or its subsidiaries.

Short Sales Risk. In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses to the Fund's portfolio.

Subordinated Securities Risk. The Fund may invest in securities that are subordinated in right of payment to more senior securities of the issuer. The Fund is more likely to suffer a credit loss on subordinated securities of an issuer than on non-subordinated securities of the same issuer.

Valuation Risk. The sales price the Fund could receive for any particular portfolio investment may differ from the Fund's valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued by the Fund using a fair value methodology. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares or lower or higher

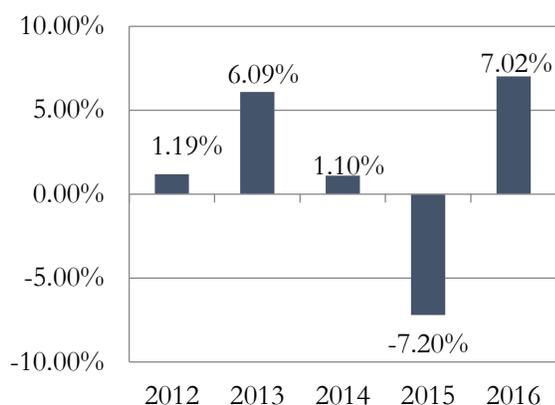

redemption proceeds than they would have received if the Fund had not fair-valued the security or had used a different valuation methodology.

Performance

The performance information provided below indicates some of the risks of investing in the Fund by showing changes in the Fund's performance from year to year for Class I Shares and by showing how the average annual total returns of each class of the Fund compare with the performance of a broad-based market index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. Updated performance information is available on the Fund's website at www.palmersquarefunds.com.

Annual Total Return (before taxes) for Class I Shares

For each calendar year at NAV

The Class I Shares year-to-date return as of June 30, 2017, was 1.94%.

Class I Shares		
Highest Calendar Quarter Return at NAV (not-annualized):	8.95%	Quarter Ended 06/30/2016
Lowest Calendar Quarter Return at NAV (not-annualized):	(10.24)%	Quarter Ended 03/31/2016

Average Annual Total Returns for the periods ended December 31, 2016	1 Year	5 Years	Since Inception May 17, 2011
Class I Shares — Return Before Taxes	7.02%	1.51%	0.46%
Class I Shares — Return After Taxes on Distributions*	3.55%	(0.01)%	(0.88)%
Class I Shares — Return After Taxes on Distributions and Sale of Fund Shares*	3.82%	0.51%	(0.22)%
Class A Shares — Return Before Taxes	0.44%	0.01%	(0.88)%
BofA Merrill Lynch US 3-Month Treasury Bill Index** (reflects no deduction for fees, expenses or taxes)	0.33%	0.12%	0.11%
HFRX Absolute Return Index (reflects no deduction for fees, expenses or taxes)	0.31%	1.67%	0.92%

* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. This Fund is

a multiple class fund that offers more than one class in this prospectus; after-tax returns are shown for Class I Shares and after-tax returns for other classes will vary.

** Effective September 1, 2017, the Fund changed its primary benchmark from the HFRX Absolute Return Index to the BofA Merrill Lynch US 3-Month Treasury Bill Index which more closely reflects the Fund's investment strategy.

Investment Advisor

Palmer Square Capital Management LLC is the Fund's investment advisor.

Portfolio Managers

Angie K. Long, CFA, Chief Investment Officer, and Christopher D. Long, President, have been portfolio managers and jointly and primarily responsible for the day-to-day management of the Fund's portfolio since its inception on May 16, 2011. Benjamin J. Esty, Executive Director has been a portfolio manager and jointly and primarily responsible for the day-to-day management of the Fund's portfolio since June 1, 2017.

Purchase and Sale of Fund Shares

To purchase shares of the Fund, you must invest at least the minimum amount.

Minimum Investments	To Open Your Account	To Add to Your Account
Class A Shares		
Direct Regular Accounts	\$2,500	\$100
Direct Retirement Accounts	\$2,500	\$100
Automatic Investment Plan	\$2,500	\$100
Gift Account For Minors	\$2,500	\$100
Class I Shares		
All Accounts	\$1,000,000	\$5,000

Fund shares are redeemable on any business day the New York Stock Exchange (the "NYSE") is open for business, by written request or by telephone.

Tax Information

The Fund's distributions are generally taxable and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax-advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

MORE ABOUT THE FUND'S INVESTMENT OBJECTIVE, PRINCIPAL INVESTMENT STRATEGIES AND RISKS

Investment Objective

The Fund's investment objective is capital appreciation with an emphasis on absolute (positive) returns and low correlation to the broader equity and bond markets. There is no assurance that the Fund will achieve its investment objective.

The Fund's investment objective is not fundamental and may be changed by the Board of Trustees without shareholder approval, upon at least 60 days prior written notice to shareholders. The Fund's investment strategies and policies may be changed from time to time without shareholder approval or prior written notice, unless specifically stated otherwise in this Prospectus or the Fund's Statement of Additional Information (the "SAI").

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in credit-related instruments. The Fund will not change this investment policy unless it gives shareholders at least 60 days' advance written notice.

In the Advisor's effort to put together a portfolio of diversified long and short exposure primarily to the credit markets, the Advisor utilizes both top-down and bottom-up approaches to investing in securities. The top-down approach involves two components. The first component is a macro-level analysis which consists of, among other factors, analyses of the general economic outlook, financial and credit markets, primary issuance levels, regulatory changes, mergers and acquisitions activity, and valuation levels. The second component is a relative value analysis which consists primarily of analyzing relative values and top-down industry work of securities, including securities such as floating rate bank loans, CLOs, derivatives, and high-yield bonds.

- When investing long in corporate credit securities, loans, derivatives or other instruments, the Advisor's bottom-up approach includes the following three primary components: (1) conducting comprehensive industry analyses of issuers; (2) identifying debt securities of issuers within favored industries which the Advisor believes have sustainable capital structures and strong or improving business fundamentals; and potentially have a catalyst in the form of a corporate event (*i.e.*, mergers and acquisitions, spin-offs, and initial public offerings); and (3) seeking to identify the appropriate instruments within an issuer's capital structure that have passed the initial industry and credit analyses.
- When investing short in corporate credit securities, loans, derivatives or other instruments, the Advisor's bottom-up approach includes the following three primary components: (1) conducting comprehensive industry analyses of issuers; (2) identifying debt securities of issuers within industries facing challenging fundamentals or unsustainable capital structures or adverse events; and (3) seeking to identify the appropriate instruments within an issuer's capital structure that offer attractive risk and return attributes.

The Advisor will consider selling all or a portion of a position if, in its opinion, one or more of the following occurs: (1) the issuer's fundamentals deteriorate; (2) the issuer's business strategy or key personnel change; (3) a rating agency downgrade or a decline in credit quality metrics occurs; or (4) the Advisor identifies a more attractive investment opportunity.

The Fund generally invests in the following types of securities and other instruments:

Debt Securities

The Fund may invest in debt securities of varying maturities and durations, including both corporate debt securities and securities issued or guaranteed as to principal and interest by the U.S. government or its agencies, instrumentalities, or sponsored entities. Debt securities may have fixed or variable/floating rates. The Fund may invest in debt securities that have credit ratings of below investment grade debt (junk bonds). Securities that are rated lower than investment grade generally provide high income in an effort to compensate investors for their higher risk of default, which is the failure of the issuer to make required interest or principal payments. Issuers of below

investment grade debt include, for example, small or relatively new companies lacking the history or capital to merit investment grade status, former blue chip companies downgraded because of financial problems, companies electing to borrow heavily to finance or avoid takeover, or buyout firms with heavy debt loads.

Collateralized Loan Obligations

The Fund may invest in CLOs, and other similarly structured securities. CLOs are types of asset-backed securities. A CLO is a trust or other special purpose entity that is typically collateralized by a pool of loans, which may include, among others, U.S. and non-U.S. senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. Other asset-backed securities may be collateralized by other loans or assets and receivables. Although certain asset-backed securities are guaranteed by a third party or are otherwise similarly secured, the market value of these securities, which may fluctuate, is not secured.

Foreign Securities

The Fund may invest in equity securities issued by companies organized outside the United States, including in both developed and emerging markets. Foreign securities may include American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), European Depositary Receipts (“EDR”) or International Depositary Receipts (“IDRs”). While the Fund values all its investments in U.S. Dollars, foreign securities may be denominated and/or traded in foreign currencies.

Derivatives

The Fund may invest in derivatives which are financial contracts whose values depend on, or are derived from, the values of underlying assets, reference rates, or indices. To manage risk or enhance return (including through the use of leverage), the Fund may invest in derivatives including options, futures, and swaps.

Option Contracts. The Fund may invest in options that trade on either an exchange or over-the-counter. By buying a call option on a security, the Fund has the right, in return for the premium paid, to buy the security or commodity underlying the option at the exercise price. By writing (selling) a call option and receiving a premium, the Fund becomes obligated, during the term of the option, to deliver the security or commodity underlying the option at the exercise price if the option is exercised. By buying a put option, the Fund has the right, in return for the premium, to sell the security or commodity underlying the option at the exercise price. By writing a put option and receiving a premium, the Fund becomes obligated during the term of the option to purchase the security or commodity underlying the option at the exercise price.

An option on an index gives the holder the right to receive an amount of cash upon exercise of the option equal to the difference between the closing value of the index and the exercise price of the option. Receipt of this cash amount will depend upon the closing level of the index upon which the option is based being greater than (in the case of a call) or less than (in the case of put) the exercise price of the option. Some stock index options are based on a market index such as the S&P 500 Index. When the Fund purchases an option on a futures contract, it acquires the right in return for the premium it pays to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put) rather than to purchase or sell stock, at a specified exercise price at any time during the period of the option. When the Fund writes an option on a futures contract, it becomes obligated, in return for the premium received, to assume a position in the futures contract (a short position if the option is a call, a long position if the option is a put) at a specified exercise price at any time during the term of the option. If the Fund writes a call, it assumes a short futures position. If the Fund writes a put, it assumes a long futures position. Upon exercise of the option, the delivery of the futures position to the purchaser of the option will be accompanied by transfer to the purchaser of an accumulated balance representing the amount by which the market price of the futures contract exceeds, in the case of a call, or is less than, in the case of a put, the exercise price of the option on the future.

Futures Contracts. The Fund may invest in futures that trade on either an exchange or over-the-counter. A futures contract obligates the seller to deliver (and the purchaser to take delivery of) the specified security, commodity or currency underlying the contract on the expiration date of the contract at an agreed upon price. An index futures contract obligates the seller to deliver (and the purchaser to take) an amount of cash equal to a specific dollar amount multiplied by the difference between the value of a specific index at the close of the last trading day of the contract

and the price at which the agreement is made. No physical delivery of the underlying securities in the index is made. Generally, these futures contracts are closed out prior to the expiration date of the contracts.

Swap Agreements. A swap agreement is a commitment between two parties to make or receive payments based on agreed upon terms, and whose value and payments are derived by changes in the value of an underlying financial instrument. Interest rate swaps are contracts involving the exchange between two contracting parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments). Credit default swaps are contracts whereby one party makes periodic payments to a counterparty in exchange for the right to receive from the counterparty a payment equal to the par (or other agreed-upon) value of an underlying debt obligation in the event of default by the issuer of the debt security. Total return swaps are contracts in which one party agrees to make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indexes during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets.

Equity and Equity-Related Securities

The Fund may invest in all types of equity securities including common stock, preferred stock and ETFs. The Fund may invest in the equity securities of companies of all sizes.

Short Sales

Short sales are transactions in which the Fund sells a security it does not own, in anticipation of a decline in the market value of that security. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing it at the market price at or prior to the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to repay the lender any dividends or interest that accrues during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The net proceeds of the short sale will be retained by the broker (or by the Fund's custodian in a special custody account), to the extent necessary to meet margin requirements, until the short position is closed out. The Fund also will incur transaction costs in effecting short sales.

Leverage

The Fund may use leverage in an effort to increase its returns. Leverage exists when cash made available to the Fund through an investment technique is used to make additional investments. Borrowing for other than temporary or emergency purposes, investments in certain derivatives, short sales and futures contracts and forward currency contracts and engaging in forward commitment transactions are examples of transactions that result in leverage. The Fund will only use these investment techniques when the Advisor, as applicable, believes that the leveraging and the returns available to the Fund from investing the cash will provide investors a potentially higher return subject to the restrictions of the Investment Company Act of 1940, as amended (the "1940 Act").

Temporary Strategies; Cash or Similar Investments

For temporary defensive purposes, the Advisor may invest up to 100% of the Fund's total assets in investment grade corporate debt securities, high-quality, short-term debt securities and money market instruments. These short-term debt securities and money market instruments include cash, shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. government securities and repurchase agreements. Taking a temporary defensive position may result in the Fund not achieving its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for its cash position, there will be some duplication of expenses because the Fund will bear its pro rata portion of such money market funds' management fees and operational expenses.

The Fund may also hold short-term debt securities and money market instruments to retain flexibility in meeting redemptions and paying expenses.

Principal Risks of Investing

The Fund's principal risks are set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors and special considerations associated with investing in the Fund, which may cause you to lose money.

- **Absolute Return Risk.** The Fund's returns may deviate from overall market returns to a greater degree than other mutual funds that do not employ an absolute return focus. Also, the employment of hedging strategies to mitigate investment risk may cause the Fund's returns to be lower than if hedging had not been employed.
- **Asset-Backed Securities Risk.** The Fund's investments in asset-backed securities involve interest-rate risk, prepayment risk and the loss of money if there are defaults on the loans underlying these securities. The Fund's investment in CLOs and other asset-backed securities often involves risks that are different from or more acute than risks associated with other types of debt instruments. The Fund's investments in asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.
- **Asset Segregation Risk.** As a series of an investment company registered with the SEC, the Fund must segregate liquid assets or engage in other measures to "cover" open positions with respect to certain kinds of derivatives and short sales. In the case of futures contracts that do not cash settle, for example, the Fund must set aside liquid assets equal to the full notional value of the contracts (less any amounts the Fund has posted as margin) while the positions are open. With respect to futures contracts that do cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations under the contracts (less any amounts the Fund has posted as margin), if any, rather than their full notional value. The Fund reserves the right to modify its asset segregation policies in the future to comply with any changes in the positions from time to time articulated by the SEC or its staff regarding asset segregation. By setting aside assets equal to only its net obligations under cash-settled instruments, the Fund will have the ability to employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional amount of the instruments. The Fund may incur losses on derivatives and other leveraged investments (including the entire amount of the Fund's investment in such investments) even if they are covered.
- **Bank Loan Risk.** The Fund's investments in secured and unsecured participations in bank loans and assignments of such loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest, which will expose the Fund to the credit risk of both the financial institution and the underlying borrower. If the Fund does not receive scheduled interest or principal payments on such indebtedness, the Fund's share price could be adversely affected. The Fund may invest in loan participations that are rated by a nationally recognized statistical rating organization or are unrated, and may invest in loan participations of any credit quality, including "distressed" companies with respect to which there is a substantial risk of losing the entire amount invested. The market for bank loans may not be highly liquid and the Fund may have difficulty selling them. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. Participations by the Fund in a lender's portion of a bank loan typically will result in the Fund having a contractual relationship only with such lender, not with the borrower. The Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling a loan participation and only upon receipt by such lender of such payments from the borrower. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights with respect to any funds acquired by other lenders through set-off against the borrower, and the Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund may assume the credit risk of both the borrower and the lender selling the participation.
- **Collateralized Loan Obligations Risk.** The Fund is subject to the following risks as a result of its investments in CLOs:

Asset Manager Risk. The CLO's performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. The experience of a CLO manager plays an important role in the rating and risk assessment of CLO debt securities. One of the primary risks to investors of a CLO is the potential change in CLO manager, over which the Fund will have no control.

Legal and Regulatory Risk. The Fund may be adversely affected by new (or revised) laws or regulations that may be imposed by government regulators or self-regulatory organizations that supervise the financial markets. These agencies are empowered to promulgate a variety of rules pursuant to financial reform legislation in the United States. The Fund may also be adversely affected by changes in the enforcement or interpretation of existing statutes and rules. Changes in the regulation of CLOs may adversely affect the value of the investments held by the Fund and the ability of the Fund to execute its investment strategy.

Limited Recourse Risk. CLO debt securities are limited recourse obligations of their issuers. CLO debt is payable solely from the proceeds of its underlying assets. Consequently, CLO investors must rely solely on distributions from the underlying assets for payments on the CLO debt they hold. No party or entity other than the issuer will be obligated to make payments on CLO debt. CLO debt is not guaranteed by the issuer or any other party or entity involved in the organization and management of a CLO. If income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment.

Redemption Risk. CLO debt securities may be subject to redemption. For example, certain tranches of CLO debt may be redeemed if the CLO manager is unable to identify assets suitable for investment during the period when it has the ability to reinvest the principal proceeds from the sale of assets, scheduled redemptions and prepayments in additional assets (the "Reinvestment Period"). Additionally, holders of subordinated CLO debt may cause the redemption of senior CLO debt. In the event of an early redemption, holders of the CLO debt being redeemed will be repaid earlier than the stated maturity of the debt. The timing of redemptions may adversely affect the returns on CLO debt.

Reinvestment Risk. The CLO manager may not find suitable assets in which to invest during the Reinvestment Period or to replace assets that the manager has determined are no longer suitable for investment (for example, if a security has been downgraded by a rating agency). Additionally, the reinvestment period is a pre-determined finite period of time; however, there is a risk that the reinvestment period may terminate early if, for example, the CLO defaults on payments on the securities which it issues or if the CLO manager determines that it can no longer reinvest in underlying assets. Early termination of the Reinvestment Period could adversely affect a CLO investment.

- **Convertible Securities Risk.** Convertible securities are securities that are convertible into or exchangeable for common or preferred stock. The values of convertible securities may be affected by changes in interest rates, the creditworthiness of their issuer, and the ability of the issuer to repay principal and to make interest payments. A convertible security tends to perform more like a stock when the underlying stock price is high and more like a debt security when the underlying stock price is low. A convertible security is not as sensitive to interest rate changes as a similar non-convertible debt security and generally has less potential for gain or loss than the underlying stock.
- **Credit Risk.** If an obligor (such as the issuer itself or a party offering credit enhancement) for a security held by the Fund fails to pay amounts due when required by the terms of the security, otherwise defaults, is perceived to be less creditworthy, becomes insolvent or files for bankruptcy, a security's credit rating is downgraded or the credit quality or value of any underlying assets declines, the value of the Fund's investment could decline. If the Fund enters into financial contracts (such as certain derivatives, repurchase agreements, reverse repurchase agreements, and when-issued, delayed delivery and forward commitment transactions), the Fund will be subject to the credit risk presented by the counterparties. Credit risk is broadly gauged by the credit ratings of the securities in which the Fund invests.

The Fund may invest in securities which are subordinated in right of payment to more senior securities of the issuer, or which represent interests in pools of such subordinated securities. The Fund is more likely to suffer a

credit loss on subordinated securities of an issuer than on non-subordinated securities of the same issuer. If there is a default, bankruptcy or liquidation of the issuer, most subordinated securities are paid only if sufficient assets remain after payment of the issuer's non-subordinated securities. In addition, any recovery of interest or principal may take more time. As a result, even a perceived decline in creditworthiness of the issuer is likely to have a greater impact on subordinated securities.

- **Currency Risk.** The values of investments in securities denominated in foreign currencies increase or decrease as the rates of exchange between those currencies and the U.S. Dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile and are affected by factors such as general economic conditions, the actions of the United States and foreign governments or central banks, the imposition of currency controls, and speculation.
- **Derivatives Risk.** Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Depending on how the Fund uses derivatives and the relationship between the market value of the derivative and the underlying instrument, the use of derivatives could increase or decrease the Fund's exposure to the risks of the underlying instrument. Using derivatives can have a leveraging effect and increase fund volatility. A small investment in derivatives could have a potentially large impact on the Fund's performance. Derivatives transactions can be highly illiquid and difficult to unwind or value, and changes in the value of a derivative held by the Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments underlying derivatives are also applicable to derivatives trading. However, additional risks are associated with derivatives trading that are possibly greater than the risks associated with investing directly in the underlying instruments. These additional risks include, but are not limited to, illiquidity risk, operational leverage risk and counterparty credit risk. For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from the Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm. The Fund would also be exposed to counterparty risk with respect to the clearinghouse. Financial reform laws have changed many aspects of financial regulation applicable to derivatives. Once implemented, new regulations, including margin, clearing, and trade execution requirements, may make derivatives more costly, may limit their availability, may present different risks or may otherwise adversely affect the value or performance of these instruments. The extent and impact of these regulations are not yet fully known and may not be known for some time. Certain risks relating to various types of derivatives in which the Fund may invest are described below.

Forward Contracts. The Fund may enter into forward contracts that are not traded on exchanges and may not be regulated. There are no limitations on daily price moves of forward contracts. Banks and other dealers with which the Fund maintains accounts may require that the Fund deposit margin with respect to such trading. The Fund's counterparties are not required to continue making markets in such contracts. There have been periods during which certain counterparties have refused to continue to quote prices for forward contracts or have quoted prices with an unusually wide spread (the difference between the price at which the counterparty is prepared to buy and that at which it is prepared to sell). Arrangements to trade forward contracts may be made with only one or a few counterparties, and liquidity problems therefore might be greater than if such arrangements were made with numerous counterparties. The imposition of credit controls by governmental authorities might limit such forward trading to less than the amount that the Advisor would otherwise recommend, to the possible detriment of the Fund.

Futures Contracts. The Fund may invest in futures that trade on either an exchange or over-the-counter. A futures contract obligates the seller to deliver (and the purchaser to take delivery of) the specified security, commodity or currency underlying the contract on the expiration date of the contract at an agreed upon price. An index futures contract obligates the seller to deliver (and the purchaser to take) an amount of cash equal to a specific dollar amount multiplied by the difference between the value of a specific index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying securities in the index is made. Generally, these futures contracts are closed out prior to the expiration date of the contracts. The value of a futures contract

tends to increase and decrease in correlation with the value of the underlying instrument. Risks of futures contracts may arise from an imperfect correlation between movements in the price of the instruments and the price of the underlying securities. The Fund's use of futures contracts (and related options) exposes the Fund to leverage risk because of the small margin requirements relative to the value of the futures contract. A relatively small market movement will have a proportionately larger impact on the funds that the Fund has deposited or will have to deposit with a broker to maintain its futures position. Leverage can lead to large losses as well as gains. While futures contracts are generally liquid instruments, under certain market conditions they may become illiquid. Futures exchanges may impose daily or intraday price change limits and/or limit the volume of trading. Additionally, government regulation may further reduce liquidity through similar trading restrictions. As a result, the Fund may be unable to close out its futures contracts at a time that is advantageous. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Fund's initial investment in such contracts.

Foreign Futures Transactions. Foreign futures transactions involve the execution and clearing of trades on a foreign exchange. This is the case even if the foreign exchange is formally "linked" to a domestic exchange, whereby a trade executed on one exchange liquidates or establishes a position on the other exchange. No domestic organization regulates the activities of a foreign exchange, including the execution, delivery, and clearing of transactions on such an exchange, and no domestic regulator has the power to compel enforcement of the rules of the foreign exchange or the laws of the foreign country. Moreover, such laws or regulations will vary depending on the foreign country in which the transaction occurs. For these reasons, the Fund may not be afforded certain of the protections that apply to domestic transactions, provided that with respect to transactions on a foreign exchange that is formally linked to a domestic exchange, certain domestic disclosure and anti-fraud provisions may apply. In addition, the price of any foreign futures or option contract may be affected by any fluctuation in the foreign exchange rate between the time the order is placed and the foreign futures contract is liquidated or the foreign option contract is liquidated or exercised.

Liquidity of Futures Contracts. In connection with the Fund's use of futures, the Advisor will determine and pursue all steps that are necessary and advisable to ensure compliance with the Commodity Exchange Act and the rules and regulations promulgated thereunder. Under certain market conditions, the Fund may find it difficult or impossible to liquidate a position. Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day (each a "daily limit"). Under such daily limits, during a single trading day no trades may be executed at prices beyond such daily limits. Once the price of a particular futures contract has increased or decreased by an amount equal to the daily limit, positions in that contract can neither be entered into nor liquidated unless traders are willing to effect trades at or within the limit. Futures prices have occasionally moved beyond the daily limits for several consecutive days with little or no trading. Over-the-counter instruments generally are not as liquid as instruments traded on recognized exchanges. These constraints could prevent the Fund from promptly liquidating unfavorable positions, thereby subjecting the Fund to substantial losses. In addition, the Commodity Futures Trading Commission and various exchanges limit the number of positions that the Fund may indirectly hold or control in particular commodities.

Swap Transactions. The Fund may enter into swap transactions. A swap contract is a commitment between two parties to make or receive payments based on agreed upon terms, and whose value and payments are derived by changes in the value of an underlying financial instrument. Swap transactions can take many different forms and are known by a variety of names. Depending on their structure, swap transactions may increase or decrease the Fund's exposure to long-term or short-term interest rates, foreign currency values, corporate borrowing rates, or other factors such as security prices, values of baskets of securities, or inflation rates. Interest rate swaps are contracts involving the exchange between two contracting parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments). Credit default swaps are contracts whereby one party makes periodic payments to a counterparty in exchange for the right to receive from the counterparty a payment equal to the par (or other agreed-upon) value of an underlying debt obligation in the event of default by the issuer of the debt security. Total return swaps are contracts in which one party agrees to

make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indexes during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets. Depending on how they are used, swap transactions may increase or decrease the overall volatility of the Fund's portfolio. The most significant factor in the performance of a swap transaction is the change in the specific interest rate, currency, individual equity values or other factors that determine the amounts of payments due to and from the Fund.

Non-U.S. Futures Transactions. Foreign futures transactions involve the execution and clearing of trades on a foreign exchange. This is the case even if the foreign exchange is formally "linked" to a domestic exchange, whereby a trade executed on one exchange liquidates or establishes a position on the other exchange. No domestic organization regulates the activities of a foreign exchange, including the execution, delivery, and clearing of transactions on such an exchange, and no domestic regulator has the power to compel enforcement of the rules of the foreign exchange or the laws of the foreign country. Moreover, such laws or regulations will vary depending on the foreign country in which the transaction occurs. For these reasons, the Fund may not be afforded certain of the protections that apply to domestic transactions. In addition, the price of any foreign futures or option contract may be affected by any fluctuation in the foreign exchange rate between the time the order is placed and the foreign futures contract is liquidated or the foreign option contract is liquidated or exercised.

Transactions entered into by the Fund may be executed on various U.S. and non-U.S. exchanges, and may be cleared and settled through various clearing houses, custodians, depositories and prime brokers throughout the world. Although the Fund will attempt to execute, clear and settle the transactions through entities believed to be sound, a failure by any such entity may lead to a loss to the Fund.

Illiquidity. Derivative instruments, especially when traded in large amounts, may not always be liquid. In such cases, in volatile markets the Fund may not be able to close out a position without incurring a loss. Daily limits on price fluctuations and speculative position limits on exchanges on which the Fund may conduct its transactions in derivative instruments may prevent profitable liquidation of positions, subjecting the Fund to potentially greater losses.

Call Options. The seller (writer) of a call option which is covered (*i.e.*, the writer holds the underlying security) assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option. The seller of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option.

The buyer of a call option assumes the risk of losing its entire investment in the call option. However, if the buyer of the call sells short the underlying security, the loss on the call will be offset in whole or in part by gain on the short sale of the underlying security.

Put Options. The seller (writer) of a put option which is covered (e.g., the writer holds or has a short position in the underlying security) assumes the risk of an increase in the market price of the underlying security above the exercise price of the option plus the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option. The seller of an uncovered put option assumes the risk of an increase in the market price of the underlying security above the exercise price of the option plus the premium received. The buyer of a put option assumes the risk of losing its entire investment in the put option.

Over-the-Counter, Non-Cleared Derivatives Transactions. The Fund may enter into derivatives that are not traded on an exchange or other organized facility or contract market. Many of these instruments are also not required to be cleared or are not cleared on a voluntary basis. The risk of nonperformance by the obligor on such an instrument may be greater than the risk associated with an instrument traded on an exchange or other organized trading facility and centrally cleared. In addition, the Fund may not be able

to dispose of, or enter into a closing transaction with respect to, such an instrument as easily as in the case of an instrument traded on an exchange or other organized trading facility. Significant disparities may exist between “bid” and “asked” prices for derivative instruments that are not traded on an exchange or other organized facility. Derivatives not traded on exchanges or other organized facilities may be subject to less regulation than exchange-traded and on-facility instruments, and many of the protections afforded to participants on an exchange or other organized facility may not be available with respect to these instruments. In situations where the Fund is required to post margin or other collateral with a counterparty, the counterparty may fail to segregate the collateral or may commingle the collateral with the counterparty’s own assets. As a result, in the event of the counterparty’s bankruptcy or insolvency, the Fund’s collateral may be subject to the conflicting claims of the counterparty’s creditors and the Fund may be exposed to the risk of being treated as a general unsecured creditor of the counterparty, rather than as the owner of the collateral. Bilateral derivatives trading has become subject to increased regulation under recent financial reform laws, and further proposed measures – such as margin requirements for non-cleared transactions – may offer market participants additional protections once implemented. Nonetheless, the Fund will not be fully protected from risks that are present in an over-the-counter, non-cleared trading environment.

Cleared Derivatives Transactions. Transactions in certain derivatives, including some classes of swaps, that are traded on exchanges or other organized regulated trading facilities must be settled (“cleared”) by a regulated clearinghouse. For cleared derivatives transactions, the Fund will be subject to risks that may arise from its relationship with a brokerage firm through which it submits derivatives trades for clearing, including counterparty risk. A brokerage firm typically imposes margin requirements with respect to open derivatives positions, and it is generally able to require termination of those positions in specified circumstances. These margin requirements and termination provisions may adversely affect the Fund’s ability to trade derivatives. The Fund may not be able to recover the full amount of its margin from a brokerage firm if the firm were to go into bankruptcy. The Fund would also be exposed to the credit risk of the clearinghouse. In addition, it is possible that the Fund would not be able to enter into a swap transaction that is required to be cleared if no clearinghouse will accept the swap for clearing.

On-Facility Trading of Swaps. Swaps that are required to be cleared must be traded on a regulated swap execution facility or contract market that makes them available for trading. Other swaps may be traded through such a facility or contract market on a voluntarily basis. The transition from entering into swaps bilaterally to trading them on a facility or contract market may not result in swaps being easier to trade or value and may present certain execution risks if the facilities and contract markets do not operate properly. On-facility trading of swaps is also expected to lead to greater standardization of contract terms. It is possible that the Fund may not be able to enter into swaps that fully meet its investment or hedging needs, or that the costs of entering into customized swaps, including any applicable margin requirements, will be significant.

Illiquidity. Derivatives, especially when traded in large amounts, may not always be liquid. In such cases, in volatile markets the Fund may not be able to close out a position without incurring a loss. Daily limits on price fluctuations and speculative position limits on exchanges on which the Fund may conduct its transactions in derivatives may prevent profitable liquidation of positions, subjecting the Fund to potentially greater losses.

Counterparty Credit Risk. Many purchases, sales, financing arrangements, and derivative transactions in which the Fund may engage involve instruments that are not traded on an exchange. Rather, these instruments are traded between counterparties based on contractual relationships. As a result, the Fund is subject to the risk that a counterparty will not perform its obligations under the related contract. Although the Fund expects to enter into transactions only with counterparties believed by the Advisor to be creditworthy, there can be no assurance that a counterparty will not default and that the Fund will not sustain a loss on a transaction as a result.

In situations where the Fund is required to post margin or other collateral with a counterparty, the counterparty may fail to segregate the collateral or may commingle the collateral with the counterparty’s

own assets. As a result, in the event of the counterparty's bankruptcy or insolvency, the Fund's collateral may be subject to the conflicting claims of the counterparty's creditors and the Fund may be exposed to the risk of being treated as a general unsecured creditor of the counterparty, rather than as the owner of the collateral.

The Fund is subject to the risk that issuers of the instruments in which it invests and trades may default on their obligations, and that certain events may occur that have an immediate and significant adverse effect on the value of those instruments. There can be no assurance that an issuer will not default, or that an event that has an immediate and significant adverse effect on the value of an instrument will not occur, and that the Fund will not sustain a loss on a transaction as a result.

Commodity-Linked Derivative Risk. The Fund's investments in options, futures and forward contracts on commodities or commodity index expose the Fund economically to movements in commodity prices. The value of a commodity-linked derivative investment is typically based upon the price movements of a physical commodity (such as heating oil, livestock, or agricultural products), a commodity futures contract or commodity index, or some other readily measurable economic variable that is dependent upon changes in the value of commodities or the commodities markets. The value of these securities will rise or fall in response to changes in the underlying commodity or related benchmark or investment.

- **Distressed Securities Risk.** The Fund's investment in distressed securities may involve a substantial degree of risk. These instruments, which involve loans, loan participations, bonds, notes, non-performing and sub-performing mortgage loans, typically are unrated, lower-rated, in default or close to default. Many of these instruments are not publicly traded, and may become illiquid. The prices of such instruments may be extremely volatile. Valuing such instruments may be difficult and the Fund may lose all of its investment, or it may be required to accept cash or securities with a value less than the Fund's original investment. Issuers of distressed securities are typically in a weak financial condition and may default, in which case the Fund may lose its entire investment. Securities of distressed companies are generally more likely to become worthless than the securities of more financially stable companies.
- **Emerging Market Risk.** Many of the risks with respect to foreign investments are more pronounced for investments in issuers in developing or emerging market countries. Emerging market countries tend to have more government exchange controls, more volatile interest and currency exchange rates, less market regulation, and less developed economic, political and legal systems than those of more developed countries. In addition, emerging market countries may experience high levels of inflation and may have less liquid securities markets and less efficient trading and settlement systems. Their economies also depend heavily upon international trade and may be adversely affected by protective trade barriers and the economic conditions of their trading partners. Emerging market countries may have fixed or managed currencies that are not free-floating against the U.S. Dollar and may not be traded internationally. Some countries with emerging securities markets have experienced high rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have negative effects on the economies and securities markets of certain countries. Emerging securities markets typically have substantially less volume than U.S. markets, securities in these markets are less liquid, and their prices often are more volatile than those of comparable U.S. companies. Delays may occur in settling securities transactions in emerging market countries, which could adversely affect the Fund's ability to make or liquidate investments in those markets in a timely fashion. In addition, it may not be possible for the Fund to find satisfactory custodial services in an emerging market country, which could increase the Fund's costs and cause delays in the transportation and custody of its investments.
- **Equity Securities Risk.** The Fund's investment in equity securities is subject to the risk that equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. If you hold common stock, or common stock equivalents, of an issuer, you are generally exposed to greater risk than if you held preferred stocks and debt obligations of the issuer because common stockholders, or holders of equivalent interests, generally have inferior rights to receive payments from issuers in comparison

with the rights of preferred stockholders, bondholders and other creditors of such issuers. A preferred stock has a blend of the characteristics of bonds and common stock. It may offer the higher yield of a bond and has priority over common stock in equity ownership, but it does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Preferred stock has priority over common stock in an issuer's capital structure. Although the dividend on a preferred stock may be set at a fixed annual rate and must be paid before distributions on common stock, in some circumstances, it may be changed or discontinued by the issuer.

- **ETF and Mutual Fund Risk.** The Fund's investment in an ETF or mutual fund (including other funds managed by the Advisor) generally reflects the risks of owning the underlying securities the ETF or mutual fund holds. If the Fund invests in an ETF or mutual fund, it will incur additional expenses equal to its pro rata share of the ETF's or mutual fund's operating expenses, including the potential duplication of management fees. The Fund also will incur brokerage costs when it purchases ETFs. An ETF may also trade at a discount to its net asset value. In addition, because of the expenses associated with investing in ETFs and mutual funds, it may be more expensive for the Fund to invest in these pooled investment vehicles rather than owning the underlying securities directly.
- **Extension Risk.** When interest rates rise, repayments of fixed income securities, particularly asset- and mortgage-backed securities, may occur more slowly than anticipated, extending the effective duration of these fixed income securities at below market interest rates and causing their market prices to decline more than they would have declined due to the rise in interest rates alone. This may cause the Fund's share price to be more volatile.
- **Fixed Income Securities Risk.** The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Prices of fixed income securities tend to move inversely with changes in interest rates. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with lower rated securities more volatile than higher rated securities. The longer the effective maturity and duration of the Fund's portfolio, the more the Fund's share price is likely to react to changes in interest rates. Duration is a weighted measure of the length of time required to receive the present value of future payments, both interest and principal, from a fixed income security. Some fixed income securities give the issuer the option to call, or redeem, the securities before their maturity dates. If an issuer calls its security during a time of declining interest rates, the Fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore might not benefit from any increase in value of the security as a result of declining interest rates. During periods of market illiquidity or rising interest rates, prices of callable issues are subject to increased price fluctuation. In addition, the Fund may be subject to extension risk, which occurs during a rising interest rate environment because certain obligations may be paid off by an issuer more slowly than anticipated, causing the value of those securities held by the Fund to fall.
- **Foreign Investment Risk.** Investments in foreign securities are affected by risk factors generally not thought to be present in the United States. The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. Special risks associated with investments in foreign markets include less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, less government supervision of exchanges, brokers and issuers, greater risks associated with counterparties and settlement, and difficulty in enforcing contractual obligations. In addition, changes in exchange rates and interest rates, and imposition of foreign taxes, may adversely affect the value of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. The Fund's investments in depository receipts (including ADRs) are subject to these risks, even if denominated in U.S. Dollars, because changes in currency and exchange rates affect the values of the issuers of depository receipts. In addition, the underlying issuers of certain depository receipts, particularly unsponsored or unregistered depository receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities.

- **Government Intervention and Regulatory Changes Risks.** The financial crisis of 2008 led the U.S. government to expand considerably its regulation and oversight of financial services firms and the markets for financial instruments. In this regard, the Dodd-Frank Act has significantly enhanced the rulemaking, supervisory and enforcement authority of federal bank, securities and commodities regulators. These regulators are continuing to implement regulations under the Dodd-Frank Act, some which may adversely affect the Fund. For example, major changes under the Dodd-Frank Act or other legislative or regulatory actions could materially affect the profitability of the Fund or the value of investments made by the Fund or force the Fund to revise its investment strategy or divest certain of its investments. Any of these developments could expose the Fund to additional costs, taxes, liabilities, enforcement actions and reputational risk.

The Dodd-Frank Act has established a new regulatory structure for derivatives. If more restrictive position limits are imposed on investors in the commodity futures and other derivative markets, the Fund invests may be adversely affected. Similarly, changes in the regulation of foreign currency-related trading arising from the Dodd-Frank Act may make such trading more expensive for the Fund, and otherwise limit the Fund's ability to engage in such trading, which could adversely affect the Fund.

- **Government-Sponsored Entities Risk.** The Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. Investments in debt securities issued by U.S. government sponsored entities such as the Federal National Mortgage Association, the Federal Home Loan Mortgage Association, and the Federal Home Loan Banks are not backed by the full faith and credit of the U.S. government. With respect to these entities, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so.
- **High Yield ("Junk") Bond Risk.** High yield bonds (often called "junk bonds") are speculative, involve greater risks of default or downgrade and are more volatile and tend to be less liquid than investment-grade securities. High yield bonds involve a greater risk of price declines than investment-grade securities due to actual or perceived changes in an issuer's creditworthiness. Companies issuing high yield fixed-income securities are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings. These factors could affect such companies' abilities to make interest and principal payments and ultimately could cause such companies to stop making interest and/or principal payments. In such cases, payments on the securities may never resume, which would result in the securities owned by the Fund becoming worthless. The market prices of junk bonds are generally less sensitive to interest rate changes than higher rated investments, but more sensitive to adverse economic or political changes or individual developments specific to the issuer.
- **Interest Rate Risk.** Interest rate risk is the risk that debt securities will decline in value because of an increase in interest rates. As interest rates rise, the value of certain debt securities held by the Fund is likely to decrease. Debt securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Variable and floating rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Floating rate and adjustable rate debt securities will not generally increase in value if interest rates decline. When the Fund holds floating or adjustable rate debt securities, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the net asset value of the Fund's shares. Investments in debt securities pose the risk that the Advisor's forecast of the direction of interest rates might be incorrect. Falling interest rates also create the potential for a decline in the Fund's income. Changes in governmental policy, rising inflation rates, and general economic developments, among other factors, could cause interest rates to increase and could have a substantial and immediate effect on the values of the Fund's investments. These risks are greater during periods of rising inflation. In addition, a potential rise in interest rates may result in periods of volatility and increased redemptions that might require the Fund to liquidate portfolio securities at disadvantageous prices and times.

- **Large-Cap, Mid-Cap and Small-Cap Companies Risk.** Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion. In addition, large-capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes and may be more prone to global economic risks. The Fund's investment in mid-cap and small-cap companies is subject to the risk that these companies may not have the management experience, financial resources, product diversification and competitive strengths of large-cap companies. Therefore, their securities may be more volatile and less liquid than the securities of larger, more established companies. Mid-cap and small-cap company stocks may also be bought and sold less often and in smaller amounts than larger company stocks. Because of this, if the Advisor wants to sell a large quantity of a mid-cap or small-cap company stock, it may have to sell at a lower price than it might prefer, or it may have to sell in smaller than desired quantities over a period of time. Analysts and other investors may follow these companies less actively and therefore information about these companies may not be as readily available as that for large-cap companies.
- **Leverage Risk.** The use of leverage creates the risk of magnified capital losses and may result in a higher volatility in the value of the Fund's portfolio which may be magnified by favorable or adverse market movements or changes in the cost of leveraging. So long as the Fund is able to realize a net return on its investment portfolio that is higher than interest expense incurred, if any, leverage will result in higher current net investment income for the Fund than if the Fund were not leveraged. In an extreme case, if the Fund's current investment income were not sufficient to meet the interest expense of leveraging, it could be necessary for the Fund to liquidate certain of its investments at an inappropriate time. Segregation may limit the liquidity of the Fund, potentially jeopardizing the Fund's ability to satisfy redemption requests. Also, the Fund may suffer losses if segregated assets cannot be timely sold as market opportunities arise. With respect to forwards and futures contracts that are not contractually required to "cash settled," the Fund may cover its open positions by setting aside liquid assets equal to the contracts' full, notional value. With respect to forwards and futures that are contractually required to "cash settled," the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligations.
- **Liquidity Risk.** Due to a lack of demand in the marketplace or other factors, such as market turmoil, the Fund may not be able to sell some or all of the investments that it holds, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs, it may only be able to sell those investments at a loss. Liquidity risk arises, for example, from small average trading volumes, trading restrictions, or temporary suspensions of trading. In addition, when the market for certain investments is illiquid, the Fund may be unable to achieve its desired level of exposure to a certain sector. Moreover, the reduction in dealer market-making capacity in the fixed income markets that has occurred in recent years has the potential to decrease the liquidity of the Fund's investments. Liquidity risk may be more pronounced for the Fund's investments in developing countries.
- **Management and Strategy Risk.** The value of your investment depends on the judgment of the Advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. Investment strategies employed by the Advisor in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.
- **Market Risk.** The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. For example, the financial crisis that began in 2008 caused a significant decline in the value and liquidity of many securities; in particular, the values of some sovereign debt and of securities of issuers that invest in sovereign debt and related investments fell, credit became more scarce worldwide and there was significant uncertainty in the markets. Such environments could make identifying investment risks and opportunities especially difficult for the Advisor. In response to the crisis, the United States and other governments have taken steps to support financial markets.

The withdrawal of this support or failure of efforts in response to the crisis could negatively affect financial markets generally as well as the value and liquidity of certain securities. In addition, policy and legislative changes in the United States and in other countries are changing many aspects of financial regulation. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.

- **Non-Diversification Risk.** The Fund is classified as “non-diversified,” which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Fund to greater market risk and potential losses than if its assets were diversified among the securities of a greater number of issuers.
- **Prepayment or Call Risk.** Many fixed income securities give the issuer the option to repay or call the security prior to its maturity date. Issuers often exercise this right when interest rates fall. Accordingly, if the Fund holds a fixed income security subject to prepayment or call risk, it may not benefit fully from the increase in value that other fixed income securities generally experience when interest rates fall. Upon prepayment of the security, the Fund would also be forced to reinvest the proceeds at then current yields, which would be lower than the yield of the security that was paid off. In addition, if the Fund purchases a fixed income security at a premium (at a price that exceeds its stated par or principal value), the Fund may lose the amount of the premium paid in the event of prepayment.
- **Portfolio Turnover Risk.** The Fund may sell securities without regard to the length of time they have been held to take advantage of new investment opportunities, when the Advisor believes either the securities no longer meet its investment criteria or the potential for capital appreciation has lessened, or for other reasons. A high portfolio turnover rate increases the Fund’s transaction costs (including brokerage commissions and dealer costs), which would adversely impact the Fund’s performance. Higher portfolio turnover may result in the realization of more short-term capital gains than if the Fund had lower portfolio turnover.
- **Restricted Securities Risk.** The Fund may invest in Rule 144A securities, which are restricted securities that may not be readily marketable in broad public markets. The Fund may not be able to sell the restricted security when the Advisor considers it desirable to do so and/or may have to sell a security at a lower price. While there is a substantial institutional market for Rule 144A securities, it is not possible to predict exactly how the market for Rule 144A securities will develop. A restricted security which when purchased was liquid may subsequently become illiquid. In addition, transaction costs may be higher for Rule 144A securities than for more liquid securities. While there is a substantial institutional market for Rule 144A securities, it is impossible to predict exactly how the market for Rule 144A securities will develop.
- **Senior Loan Risk.** The Fund may invest in floating or adjustable rate senior loans. These investments are subject to increased credit and liquidity risks. Senior loan prices also may be adversely affected by supply-demand imbalances caused by conditions in the senior loan market or related markets. Below investment grade senior loans, like high-yield debt securities or junk bonds, usually are more credit than interest rate sensitive, although the value of these instruments may be affected by interest rate swings in the overall fixed income market. Senior loans may be subject to structural subordination and, although the loans may be senior to equity and other debt securities in the borrower’s capital structure, the loans may be subordinated to other obligations of the borrower or its subsidiaries.
- **Short Sales Risk.** In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund’s portfolio. By investing the proceeds received from selling securities short, the Fund is employing leverage, which creates special risks. Furthermore, until the Fund replaces a security borrowed, or sold short, it must pay to

the lender amounts equal to any dividends that accrue during the period of the short sale. In addition, the Fund will incur certain transaction fees associated with short selling.

- **Subordinated Securities Risk.** Holders of securities that are subordinated or “junior” to more senior securities of an issuer are entitled to payment after holders of more senior securities of the issuer. Subordinated securities are more likely to suffer a credit loss than non-subordinated securities of the same issuer, any loss incurred by the subordinated securities is likely to be proportionately greater, and any recovery of interest or principal may take more time. As a result, even a perceived decline in creditworthiness of the issuer is likely to have a greater impact on the market value of these securities. Subordinated loans generally have greater price volatility than senior loans and may be less liquid. The risks associated with subordinated unsecured loans, which are not backed by a security interest in any specific collateral, are higher than those for comparable loans that are secured by specific collateral.
- **Valuation Risk.** Many factors may influence the price at which the Fund could sell any particular portfolio investment. The sales price may well differ—higher or lower—from the Fund’s last valuation, and such differences could be significant, particularly for illiquid securities and securities that trade in relatively thin markets and/or markets that experience extreme volatility. If market conditions make it difficult to value some investments, the Fund may value these investments using more subjective methods, such as fair value methodologies. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received if the Fund had not fair-valued the securities or had used a different valuation methodology. The value of foreign securities, certain fixed income securities, and currencies may be materially affected by events after the close of the market on which they are valued but before the Fund determines its net asset value.

For further information about the risks of investing in the Fund, please see the SAI.

Portfolio Holdings Information

A description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio securities is available in the SAI. Currently, disclosure of the Fund’s holdings is required to be made quarterly within 60 days of the end of each fiscal quarter, in the Fund’s Annual Report and Semi-Annual Report to Fund shareholders, and in the quarterly holdings report on Form N-Q.

MANAGEMENT OF THE FUND

Investment Advisor

Palmer Square Capital Management LLC, a Delaware limited liability company with its principal place of business at 2000 Shawnee Mission Parkway, Suite 300, Mission Woods, KS 66205, is the Fund’s Advisor and provides investment advisory services to the Fund pursuant to an investment advisory agreement between the Advisor and the Trust (the “Advisory Agreement”). The Advisor was founded in 2009. The Advisor is an SEC-registered investment advisor that provides investment advisory services to, in addition to the Fund, institutions, high net worth individuals and alternative investment funds. As of May 31, 2017, the Advisor’s total assets under management were approximately \$4.2 billion. The Advisor is majority-owned by Montage Investments, LLC, a Kansas limited liability company. Subject to the general supervision of the Board of Trustees, the Advisor is responsible for managing the Fund in accordance with its investment objective and policies using the approach discussed in the “Principal Investment Strategies” section of this Prospectus, and making recommendations on direct security and strategy selection.

For its services, the Advisor is entitled to receive an annual management fee of 0.99%, calculated daily and payable monthly, as a percentage of the Fund’s average daily net assets. For the fiscal year ended April 30, 2017, the Advisor received advisory fees of 0.40% of the Fund’s average daily net assets.

Pursuant to an exemptive order from the SEC, the Advisor, subject to Board approval, is permitted to enter into new or materially amend sub-advisory agreements with existing or new unaffiliated sub-advisors for the Fund without approval of Fund shareholders (“Exemptive Relief”). Pursuant to the Exemptive Relief, the Fund is required to notify shareholders of the retention of a new sub-advisor within 90 days of the hiring of the new sub-advisor. In the future, the Advisor may propose to appoint or replace one or more unaffiliated sub-advisors subject to Board approval and applicable shareholder notice requirements.

A discussion regarding the basis for the Board's approval of the Advisory Agreement is available in the Fund's Semi-Annual Report to Shareholders as of October 31, 2016.

Portfolio Managers

Advisor

The Fund is team managed by Christopher D. Long, Angie K. Long, CFA, and Benjamin J. Esty. Mr. Long, Ms. Long and Mr. Esty are responsible for portfolio construction, investment, allocation and monitoring of the Fund's assets. Mr. Long, Ms. Long and Mr. Esty are also responsible for day to day management of the Fund.

Christopher D. Long. Mr. Long is the President and founder of the Advisor and is responsible for the Advisor's alternative investments business and credit business, managing both the firm's investment activities and operations as well as defining its investment policy. Mr. Long was a Managing Director and Investment Committee Member at Prairie Capital Management, LLC ("Prairie") from 2006 to 2009, where he was one of the team members responsible for the firm's proprietary alternative investment products. Prior to joining Prairie, Mr. Long was at various New York City-based firms including Sandell Asset Management, Corp. ("Sandell"), a multi-billion multi-strategy hedge fund, where he, as a Research Analyst, invested in both equity and debt securities from 2005 to 2006. Prior to Sandell, he worked at Morgan Stanley in the Credit Derivatives and Distressed Securities Group as an Associate, focusing on the firm's proprietary investments during the summer of 2004. Before Morgan Stanley, Mr. Long worked at TH Lee Putnam Ventures, a \$1.1 billion private equity fund sponsored by Thomas H. Lee Partners and Putnam Investments, from 1999 to 2003. In that role, he was a member of the investment team investing over \$200 million of capital and served as a director and board observer at certain companies in which the fund invested. Mr. Long started his career at JPMorgan & Co. in Leveraged Finance and Mergers & Acquisitions (FIG Group), advising corporations and private equity firms on investment banking and capital markets, from 1997 through 1999. Mr. Long received an MBA from the Harvard Business School in 2005, and an undergraduate degree in Economics, *cum laude*, from Princeton University in 1997.

Angie K. Long, CFA. Ms. Long has been the Chief Investment Officer of the Advisor since February 2011. She has key responsibilities for all investment-related activities with a particular focus on portfolio construction and risk management. Prior to joining Palmer Square, Ms. Long worked for JPMorgan Chase & Co. in New York from 1998 to 2011. There, she held a variety of management and trading roles, including Deputy Head of Credit Trading for North America, Head of High Yield Trading, and Head of Credit Derivatives Trading. She has been a trader within many products and strategies including high yield bonds, high yield credit derivatives, distressed debt, capital structure arbitrage and structured credit. Among other career achievements, Ms. Long is credited with creating the High Yield Debt Index, the first liquid credit trading index. She was named a managing director of JPMorgan Chase & Co. at age 29. She was responsible for building JPMorgan's High Yield Credit Derivatives business and Credit Options business. Ms. Long holds the Series 7, 63, 4, 55, and 24 securities licenses. She received an AB degree in Economics from Princeton University in 1997 and is a CFA® charterholder.

Benjamin J. Esty. Mr. Esty has been an Executive Director and Portfolio Manager with the Advisor since 2014. Mr. Esty has key responsibilities for the firm's corporate credit, long/short and CLO platform. Prior to joining Palmer Square, Mr. Esty served as Partner and Portfolio Manager at Eagle River Asset Management from 2010 to 2013, where he focused on managing positions across a variety of industries and product types including convertible bonds, straight bonds, equities, options and credit default swaps. Prior to Eagle River Asset Management, he was Head of Research with Sandelman Partners, a credit hedge fund from 2005 to 2009. As Head of Research, Mr. Esty not only directed idea generation across convertible, capital structure, distressed and equity strategies, but he also covered a range of industries and oversaw the firm's analyst team. Prior to joining Sandelman, he was an Analyst in the Credit Group at Citadel Investment Group from 2001 to 2005. He conducted fundamental research, generated trade ideas and provided continuing coverage of positions across the spectrum of distressed, high yield and investment grade debt as well as convertible bonds, equities and options. While at Citadel, Mr. Esty was also involved with the firm's U.S. convertible bond arbitrage effort. Mr. Esty received a Bachelor of Arts degree double major in Economics and International Relations, with Distinction in International Relations, at the University of Pennsylvania.

The SAI provides additional information about the portfolio managers' method of compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund.

Other Service Providers

IMST Distributors, LLC (the "Distributor") is the Trust's principal underwriter and acts as the Trust's distributor in connection with the offering of Fund shares. The Distributor may enter into agreements with banks, broker-dealers, or other financial intermediaries through which investors may purchase or redeem shares. The Distributor is not affiliated with the Trust, the Advisor, or any other service provider for the Fund.

Fund Expenses

The Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Fund's shareholders), including among others, legal fees and expenses of counsel to the Fund and the Fund's independent trustees; insurance (including trustees' and officers' errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; fees and expenses of the Fund's custodians, administrators, transfer agents, registrars and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Fund; and any litigation expenses.

The Advisor has contractually agreed, however, to waive its fees and/or pay for expenses of the Fund to ensure that the total annual fund operating expenses (excluding, acquired fund fees and expenses (as determined in accordance with Form N-1A), interest, taxes, dividends and interest expenses on short positions, brokerage commissions and extraordinary expenses such as litigation expenses) do not exceed 1.64% and 1.39% of the average daily net assets of its Class A shares and Class I shares, respectively. This agreement is effective until August 31, 2018, and it may be terminated before that date only by the Trust's Board of Trustees.

Any reduction in advisory fees or payment of Fund expenses made by the Advisor in a fiscal year may be reimbursed by the Fund for a period ending three full fiscal years after the date of reduction or payment if the Advisor so requests. This reimbursement may be requested from the Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the expense limitation amount in effect at the time such fees were waived or payments made, or (b) the expense limitation amount in effect at the time of the reimbursement. However, the reimbursement amount may not exceed the total amount of fees waived and/or Fund expenses paid by the Advisor and will not include any amounts previously reimbursed to the Advisor by the Fund. Any such reimbursement is contingent upon the Board's subsequent review of the reimbursed amounts and may not cause the total operating expenses paid by the Fund in a fiscal year to exceed the applicable limitation on Fund expenses. The Fund must pay current ordinary operating expenses before the Advisor is entitled to any reimbursement of fees and/or Fund expenses.

DISTRIBUTION AND SHAREHOLDER SERVICE PLAN

Distribution Plan

The Trust has adopted a plan on behalf of the Fund pursuant to Rule 12b-1 of the 1940 Act (the "12b-1 Plan") which allows the Fund to pay distribution fees for the sale and distribution of its Class A shares and/or shareholder liaison service fees in connection with the provision of personal services to shareholders of Class A shares and the maintenance of their shareholder accounts.

The 12b-1 Plan provides for the payment of a distribution fee at the annual rate of up to 0.25% of the average daily net assets attributable to Class A shares. Since these fees are paid out of the Fund's assets attributable to Class A shares, the fee will increase the cost of your investment and, over time, may cost you more than paying other types of sales charges. The net income attributable to Class A shares will be reduced by the amount of distribution and shareholder liaison service fees and other expenses of the Fund associated with that class of shares.

To assist investors in comparing classes of shares, the table under the Prospectus heading "Fees and Expenses of the Fund" provides a summary of sales charges and expenses and an example of the sales charges and expenses of the Fund applicable to each class of shares offered herein.

Class I shares are not subject to any distribution fees under the 12b-1 Plan.

Additional Share Purchase Programs

Listed below are some of the shareholder services the Fund offers to investors. For a more complete description of the Fund's shareholder services, such as investment accounts, retirement plans, automated clearing house deposits, dividend diversification and the systematic withdrawal plan, please contact your authorized dealer.

Purchases by Telephone. Investors may purchase additional shares by calling 1-866-933-9033. If elected on your account application, telephone orders will be accepted via electronic funds transfer from your bank account through the Automated Clearing House ("ACH") network. You must have banking information established on your account prior to making a purchase. Your shares will be purchased at the public offering price (the net asset value per share ("NAV") next calculated after receipt of your purchase order plus any applicable sales charge).

Dividend Reinvestment. You may reinvest dividends and capital gains distributions in shares of the Fund. Such shares are acquired at NAV (without a sales charge) on the applicable payable date of the dividend or capital gain distribution. Unless the shareholder instructs otherwise, dividends and distributions are automatically reinvested in shares of the same class of the Fund paying the dividend or distribution. This instruction may be made by writing to the Fund's transfer agent (the "Transfer Agent") or by telephone by calling 1-866-933-9033. The investor may, on the account application form or prior to any declaration, instruct that dividends and/or capital gain distributions be paid in cash or be reinvested in the Fund at the next determined NAV. If you elect to receive dividends and/or capital gain distributions in cash and the U.S. Postal Service cannot deliver the check, or if a check remains outstanding for six months or more, the Fund reserves the right to reinvest the distribution check in your account at the Fund's current NAV and to reinvest all subsequent distributions.

Shareholder Service Fee

In addition, each Fund share class may pay a fee at an annual rate of up to 0.25% of its average daily net assets to shareholder servicing agents. Shareholder servicing agents provide non-distribution administrative and support services to their customers, which may include establishing and maintaining accounts and records relating to shareholders, processing dividend and distribution payments from the Fund on behalf of shareholders, forwarding communications from the Fund, providing sub-accounting with respect to Fund shares, and other similar services.

Additional Payments to Broker-Dealers and Other Financial Intermediaries

The Advisor may pay service fees to intermediaries such as banks, broker-dealers, financial advisors or other financial institutions some of which may be affiliates, for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus accounts, other group accounts or accounts traded through registered securities clearing agents.

The Advisor, out of its own resources, and without additional cost to the Fund or its shareholders, may provide additional cash payments or non-cash compensation to broker-dealers or intermediaries that sell shares of the Fund. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. The Advisor may pay cash compensation for inclusion of the Fund on a sales list, including a preferred or select sales list, or in other sales programs or may pay an expense reimbursement in cases where the intermediary provides shareholder services to the Fund's shareholders. The Advisor may also pay cash compensation in the form of finder's fees that vary depending on the dollar amount of the shares sold.

YOUR ACCOUNT WITH THE FUND

Share Price

The offering price of each class of the Fund's shares is the NAV of that class (plus any sales charges, as applicable). The difference among the classes' NAVs reflects the daily expense accruals of the distribution fees applicable to Class A Shares and Class I Shares. The Fund's NAVs are calculated as of 4:00 p.m. Eastern time, the normal close of regular trading on the NYSE, on each day the NYSE is open for trading. If for example, the NYSE closes at 1:00 p.m. New York time, the Fund's NAVs would still be determined as of 4:00 p.m. New York time. In this example,

portfolio securities traded on the NYSE would be valued at their closing prices unless the Trust's Valuation Committee determines that a "fair value" adjustment is appropriate due to subsequent events. The NAV for each class is determined by dividing the value of the Fund's portfolio securities, cash and other assets (including accrued interest) allocable to such class, less all liabilities (including accrued expenses) allocable to such class, by the total number of outstanding shares of such class. The Fund's NAVs may be calculated earlier if trading on the NYSE is restricted or if permitted by the SEC. The NYSE is closed on weekends and most U.S. national holidays. However, foreign securities listed primarily on non-U.S. markets may trade on weekends or other days on which the Fund does not value its shares, which may significantly affect the Fund's NAVs on days when you are not able to buy or sell Fund shares.

The Fund's securities generally are valued at market price. Securities are valued at fair value when market quotations are not readily available. The Board has adopted procedures to be followed when the Fund must utilize fair value pricing, including when reliable market quotations are not readily available, when the Fund's pricing service does not provide a valuation (or provides a valuation that, in the judgment of the Advisor, does not represent the security's fair value), or when, in the judgment of the Advisor, events have rendered the market value unreliable (see, for example, the discussion of fair value pricing of foreign securities in the paragraph below). Valuing securities at fair value involves reliance on the judgment of the Advisor and the Board (or a committee thereof), and may result in a different price being used in the calculation of the Fund's NAVs from quoted or published prices for the same securities. Fair value determinations are made in good faith in accordance with procedures adopted by the Board. There can be no assurance that the Fund will obtain the fair value assigned to a security if it sells the security.

In certain circumstances, the Fund employs fair value pricing to ensure greater accuracy in determining daily NAVs and to prevent dilution by frequent traders or market timers who seek to exploit temporary market anomalies. Fair value pricing may be applied to foreign securities held by the Fund upon the occurrence of an event after the close of trading on non-U.S. markets but before the close of trading on the NYSE when the Fund's NAVs are determined. If the event may result in a material adjustment to the price of the Fund's foreign securities once non-U.S. markets open on the following business day (such as, for example, a significant surge or decline in the U.S. market), the Fund may value such foreign securities at fair value, taking into account the effect of such event, in order to calculate the Fund's NAVs.

Other types of portfolio securities that the Fund may fair value include, but are not limited to: (1) investments that are illiquid or traded infrequently, including "restricted" securities and private placements for which there is no public market; (2) investments for which, in the judgment of the Advisor, the market price is stale; (3) securities of an issuer that has entered into a restructuring; (4) securities for which trading has been halted or suspended; and (5) fixed income securities for which there is not a current market value quotation.

Purchase of Shares

This Prospectus offers two classes of shares of the Fund, designated as Class A shares and Class I shares.

- Class A shares generally incur sales loads at the time of purchase and are subject to a distribution/service fee.
- Class I shares are not subject to any sales loads or distribution or service fees.

By offering multiple classes of shares, the Fund permits each investor to choose the class of shares that is most beneficial given the type of investor, the amount to be invested and the length of time the investor expects to hold the shares. As described more fully below, each class of shares generally has the same rights, but offers a distinct structure of sales loads, distribution/service fees and other features that are designed to address the needs of a variety of investors.

Before you invest, you should compare the features of each share class, so that you can choose the class that is right for you. When selecting a share class, you should consider the following:

- which share classes are available to you;
- how long you expect to own your shares;

- how much you intend to invest;
- total costs and expenses associated with a particular share class; and
- whether you qualify for any reduction or waiver of sales charges.

Class A shares are generally available to all investors; however, share class availability depends upon your financial intermediary's policies and procedures. Class I shares are subject to different eligibility requirements, fees and expenses, and have a different minimum investment requirement. For eligible investors, Class I shares may be more suitable than Class A shares. You should consult with your financial advisor for more information to determine which share class is most appropriate for your situation.

Each class of shares generally has the same rights, except for the differing sales loads, distribution/service fees, any related expenses associated with each class of shares, and the exclusive voting rights by each class with respect to any distribution plan or service plan for such class of shares. Please see the specific features available to each class of shares as discussed below.

To purchase shares of the Fund, you must invest at least the minimum amount indicated in the following table.

Minimum Investments	To Open Your Account	To Add to Your Account
Class A Shares		
Direct Regular Accounts	\$2,500	\$100
Direct Retirement Accounts	\$2,500	\$100
Automatic Investment Plan	\$2,500	\$100
Gift Account For Minors	\$2,500	\$100
Class I Shares		
All Accounts	\$1,000,000	\$5,000

Shares of the Fund may be purchased by check, by wire transfer of funds via a bank or through an approved financial intermediary (*i.e.*, a supermarket, investment advisor, financial planner or consultant, broker, dealer or other investment professional and their agents) authorized by the Fund to receive purchase orders. Financial intermediaries may provide varying arrangements for their clients to purchase and redeem shares, which may include different sales charges as described in this Prospectus, additional fees and different investment minimums. In addition, from time to time, a financial intermediary may modify or waive the initial and subsequent investment minimums.

When purchasing shares of the Fund, investors must specify whether the purchase is for Class A or Class I shares. You may make an initial investment in an amount greater than the minimum amounts shown in the preceding table and the Fund may, from time to time, reduce or waive the minimum initial investment amounts. The minimum initial investment amount is automatically waived for Fund shares purchased by Trustees of the Trust and current or retired directors and employees of the Advisor and its affiliates.

To the extent allowed by applicable law, the Fund reserves the right to discontinue offering shares at any time or to cease operating entirely.

Sales Charge Schedule

Class A shares of the Fund are sold at the offering price, which is NAV plus an initial maximum sales charge that varies with the amounts you invest as follows:

Class A Shares—Sales Charge Schedule			
Your Investment	Front-End Sales Charge As a % Of Offering Price*	Front-End Sales Charge As a % Of Net Investment	Dealer Reallowance As a % Of Offering Price
Up to \$49,999	5.75%	6.10%	5.00%
\$50,000 - \$99,999	4.50%	4.71%	3.75%
\$100,000 - \$249,999	3.50%	3.63%	2.75%
\$250,000 - \$499,999	2.50%	2.56%	2.00%
\$500,000 - \$999,999	2.00%	2.04%	1.50%
\$1 million or more	See below**	See below**	See below**

* The offering price includes the sales charge.

** There is no initial sales charge on purchases of Class A shares in an account or accounts with an accumulated value of \$1 million or more, but a CDSC of 1.00% will be imposed in the event of certain redemptions within 12 months of the date of purchase. See the “Large Order Net Asset Value Purchase Privilege” section below.

Because of rounding in the calculation of front-end sales charges, the actual front-end sales charge paid by an investor may be higher or lower than the percentages noted above. No sales charge is imposed on Class A shares received from reinvestment of dividends or capital gain distributions.

Class A Shares Purchase Programs

Eligible purchasers of Class A shares also may be entitled to reduced sales charges through the *Quantity Discounts* program offered by the Fund as discussed below. Eligible purchasers of Class A shares also may be entitled to waived sales charges as discussed below under *Net Asset Value Purchases* and *Large Order Net Asset Value Purchase Privilege*. The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Fund or through a financial intermediary. As described in Appendix A to this Prospectus, financial intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers or CDSC waivers. In all instances, it is the purchaser’s responsibility to notify the Fund or the purchaser’s financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. **For waivers and discounts not available through a particular intermediary, purchasers will have to purchase Fund shares directly from the Fund or through another intermediary to receive these waivers or discounts. Please see “Appendix A – Waivers and Discounts Available from Intermediaries” of the Prospectus for a description of waivers or discounts available through certain intermediaries.**

Quantity Discounts.

When purchasing Class A shares, if the dollar amount of your purchase reaches a specified level, known as a *breakpoint*, you are entitled to pay a discounted initial sales charge. For example, a purchase of up to \$49,999 of Class A shares of the Fund would pay an initial charge of 5.75%, while a purchase of \$50,000 would pay an initial charge of 4.50%. There are several breakpoints for the Fund, as shown in the **Class A Shares - Sales Charge Schedule** table above. The greater the investment, the greater the sales charge discount. Investments above \$1,000,000 have no front-end sales charge but may be subject to a CDSC (please see *Large Order Net Asset Value Purchase Privilege* below for more information).

You may lower your Class A sales charges if:

- you plan to invest at least \$50,000 in Class A shares of the Fund over the next 13 months (“Letter of Intent”) (see below); or
- the amount of Class A shares you already own in the Fund plus the amount you’re investing now in Class A shares is at least \$50,000 (“Cumulative Discount”) (see below).

By signing a Letter of Intent you can reduce your Class A sales charge. Your individual purchases will be made at the applicable sales charge based on the amount you intend to invest over a 13-month period. Purchases resulting from the reinvestment of dividends and capital gains do not apply toward fulfillment of the Letter of Intent. Shares equal to 5.75% of the amount of the Letter of Intent will be held in escrow during the 13-month period. If, at the end of that time, the total net amount invested made is less than the amount intended, you will be required to pay the difference between the reduced sales charge and the sales charge applicable to the individual net amount invested had the Letter of Intent not been in effect. This amount will be obtained from redemption of the escrow shares. Any remaining escrow shares will be released to you. If you establish a Letter of Intent with the Fund you can aggregate your accounts as well as the accounts of your immediate family members. You will need to provide written instructions with respect to the other accounts whose purchases should be considered in fulfillment of the Letter of Intent.

The Letter of Intent and Cumulative Discount are intended to let you combine investments made at other times for purposes of calculating your present sales charge. Any time you can use the privileges to “move” your investment into a lower sales charge category, it is generally beneficial for you to do so.

For purposes of determining whether you are eligible for a reduced Class A sales charge, you and your immediate family (your spouse or life partner and your children or stepchildren age 21 or younger) may aggregate your investments in the Fund. This includes, for example, investments held in a retirement account, an employee benefit plan, or at a financial advisor other than the one handling your current purchase. These combined investments will be valued at their current offering price to determine whether your current investment qualifies for a reduced sales charge.

You must notify the Fund or an approved financial intermediary at the time of purchase whenever a quantity discount is applicable to purchases and may be required to provide the Fund, or an approved financial intermediary, with certain information or records to verify eligibility for a quantity discount. Such information or records may include account statements or other records for shares of the Fund in all accounts (*e.g.*, retirement accounts) of the investor and other eligible persons, as described above, which may include accounts held at the Fund or at other approved financial intermediaries. Upon such notification, an investor will pay the lowest applicable sales charge. Shareholders should retain any records necessary to substantiate the purchase price of the shares, as the Fund and approved financial intermediaries may not retain this information.

Information about sales charges can be found on the Fund’s website www.palmersquarefunds.com or you can consult with your financial representative.

Net Asset Value Purchases

Class A shares are available for purchase without a sales charge when you are:

- reinvesting dividends or distributions;
- participating in an investment advisory or agency commission program under which you pay a fee to an investment advisor or other firm for portfolio management or brokerage services;
- financial intermediaries that: (i) are compensated by clients on a fee-only basis, including but not limited to investment advisors, financial planners, and bank trust departments; or (ii) have entered into an agreement with the Fund to offer Class A shares through a no-load network or platform, may buy without a sales charge on behalf of your clients (please see Appendix A for a list of financial intermediaries that have these arrangements);
- a current Trustee of the Trust; or
- an employee (including the employee’s spouse, domestic partner, children, grandchildren, parents, grandparents, siblings and any dependent of the employee, as defined in Section 152 of the Internal Revenue Code) of the Advisor, or service providers to the Fund, or of a broker-dealer authorized to sell shares of the Fund.

Your financial advisor or the Transfer Agent can answer your questions and help you determine if you are eligible.

Large Order Net Asset Value Purchase Privilege

There is no initial sales charge on purchases of Class A shares in an account or accounts with an accumulated value of \$1 million or more, but a contingent deferred sales charge (“CDSC”) of 1.00% may be imposed in the event of certain redemptions within 12 months of the date of purchase. The CDSC is assessed on an amount equal to the lesser of the then current market value of the shares or the historical cost of the shares (which is the amount actually paid for the shares at the time of purchase) being redeemed. From its own profits and resources, the Advisor may pay authorized dealers up to 1.00% on investments made in Class A shares with no initial sales charges.

The CDSC is waived in the following circumstances,

- if you are a current Trustee of the Trust; or
- if you are an employee (including the employee’s spouse, domestic partner, children, grandchildren, parents, grandparents, siblings and any dependent of the employee, as defined in Section 152 of the Internal Revenue Code) of the Advisor, or service providers to the Fund, or of a broker-dealer authorized to sell shares of the Fund.

Your financial advisor or the Transfer Agent can answer your questions and help you determine if you are eligible.

Class I Shares

To purchase Class I shares of the Fund, you generally must invest at least \$1,000,000. Class I shares are not subject to any initial sales charge. No CDSC is imposed on redemptions of Class I shares, and you do not pay any ongoing distribution/service fees.

Class I Shares are available for purchase by clients of financial intermediaries who charge such clients an ongoing fee for advisory, investment, consulting or similar services. Such clients may include individuals, corporations, endowments and foundations.

Buying Shares

The Fund’s shares are offered on a continuous basis through the Distributor, as principal underwriter, located at Three Canal Plaza, Suite 100, Portland, Maine, 04101. Shares also may be purchased through members of the Financial Industry Regulatory Authority (“FINRA”) who are acting as securities dealers (“dealers”) and FINRA members or eligible non-FINRA members who are acting as brokers or agents for investors (“brokers”). Dealers and brokers are sometimes referred to herein as authorized dealers.

In-Kind Purchases and Redemptions

The Fund reserves the right to accept payment for shares in the form of securities that are permissible investments for the Fund. The Fund also reserves the right to pay redemptions by an “in-kind” distribution of securities (instead of cash) from the Fund. In-kind purchases and redemptions are taxable events and may result in the recognition of gain or loss for federal income tax purposes. See the SAI for further information about the terms of these purchases and redemptions.

Additional Investments

Additional subscriptions in the Fund generally may be made by investing at least the minimum amount shown in the table above. Exceptions may be made at the Fund’s discretion. You may purchase additional shares of the Fund by sending a check together with the investment stub from your most recent account statement to the Fund at the applicable address listed in the table below. Please ensure that you include your account number on the check. If you do not have the investment stub from your account statement, list your name, address and account number on a separate sheet of paper and include it with your check. You may also make additional investments in the Fund by wire transfer of funds or through an approved financial intermediary. The minimum additional investment amount is

automatically waived for shares purchased by Trustees of the Trust and current or retired directors and employees of the Advisor and its affiliates. Please follow the procedures described in this Prospectus.

Automatic Investment Plan

If you intend to use the Automatic Investment Plan (“AIP”), you may open your account with the initial minimum investment amount. Once an account has been opened, you may make additional investments in the Fund at regular intervals through the AIP. If elected on your account application, funds can be automatically transferred from your checking or savings account on the 5th, 10th, 15th, 20th or 25th of each month. In order to participate in the AIP, each additional subscription must be at least \$100, and your financial institution must be a member of the ACH network. The first AIP purchase will be made 15 days after the Transfer Agent receives your request in good order. The Transfer Agent will charge a \$25 fee for any ACH payment that is rejected by your bank. Your AIP will be terminated if two successive mailings we send to you are returned by the U.S. Postal Service as undeliverable. You may terminate your participation in the AIP at any time by notifying the Transfer Agent at 1-866-933-9033 at least five days prior to the date of the next AIP transfer. The Fund may modify or terminate the AIP at any time without notice.

Customer Identification Information

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify and record information that identifies each person who opens an account. When you open an account, you will be asked for your name, date of birth (for a natural person), your residential address or principal place of business, and mailing address (if different) as well as your Social Security Number or Taxpayer Identification Number. Additional information is required for corporations, partnerships and other entities. Applications without such information will not be considered in good order. The Fund reserves the right to deny applications if the application is not in good order.

This Prospectus should not be considered a solicitation to purchase or as an offer to sell shares of the Fund in any jurisdiction where it would be unlawful to do so under the laws of that jurisdiction. Please note that the value of your account may be transferred to the appropriate state if no activity occurs in the account within the time period specified by state law.

Timing and Nature of Requests

The purchase price you will pay for the Fund’s shares will be the next NAV (plus any sales charge, if applicable) calculated after the Transfer Agent or your authorized financial intermediary receives your request in good order. “Good order” means that your purchase request includes: (1) the name of the Fund, (2) the dollar amount of shares to be purchased, (3) your purchase application or investment stub, and (4) a check payable to **Palmer Square Strategic Credit Fund**. All requests to purchase Fund shares received in good order before 4:00 p.m. (Eastern Time) on a business day will be processed on that same day. Requests received in good order at or after 4:00 p.m. (Eastern Time) or on a day when the Fund does not value its shares will be processed on the next business day and will receive the next subsequent NAV (plus sales charge, if applicable). If you purchase shares through a financial intermediary, it may have an earlier deadline for purchase and sale requests. All purchases must be made in U.S. Dollars and drawn on U.S. financial institutions.

Methods of Buying

Through a broker-dealer or other financial intermediary

The Fund is offered through certain approved financial intermediaries (and their agents). The Fund is also offered directly. An order placed with a financial intermediary or its authorized agent is treated as if such order were placed directly with the Fund, and will be deemed to have been received by the Fund when the financial intermediary or its authorized agent receives the order and executed at the next NAV (plus any sales charge, if applicable) calculated by the Fund. Your financial intermediary will hold your shares in a pooled account in its (or its agent's) name. The Fund may pay your financial intermediary (or its agent) to maintain your individual ownership information, maintain required records, and provide other shareholder services. A financial intermediary which offers shares may charge its individual clients transaction fees. The financial intermediary may set different minimum investments. Your financial intermediary is responsible for processing your order correctly and promptly, keeping you advised of the status of your account, confirming your transactions and ensuring that you receive copies of the Fund's Prospectus. Please contact your financial intermediary to determine whether it is an approved financial intermediary of the Fund or for additional information.

By mail

The Fund will not accept payment in cash, including cashier's checks. Also, to prevent check fraud, the Fund will not accept third party checks, Treasury checks, credit card checks, traveler's checks, money orders or starter checks for the purchase of shares. All checks must be made in U.S. Dollars and drawn on U.S. financial institutions.

To buy shares directly from the Fund by mail, complete an account application and send it together with your check for the amount you wish to invest to the Fund at the address indicated below. To make additional investments once you have opened your account, write your account number on the check and send it to the Fund together with the most recent confirmation statement received from the Transfer Agent. If your check is returned for insufficient funds, your purchase will be canceled and a \$25 fee will be assessed against your account by the Transfer Agent.

Regular Mail
Palmer Square Funds
P.O. Box 2175
Milwaukee, Wisconsin 53201

Overnight Delivery
Palmer Square Funds
235 West Galena Street
Milwaukee, Wisconsin 53212

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents.

By telephone

To make additional investments by telephone, you must authorize telephone purchases and on your account application. If you have given authorization for telephone transactions, and your account has been open for at least 15 days, call the Transfer Agent toll-free at 1-866-933-9033 and you will be allowed to move money in amounts of at least \$100 from your bank account to the Fund account upon request. Only bank accounts held at U.S. institutions that are ACH members may be used for telephone transactions. If your order is placed before 4:00 p.m. (Eastern Time) on a business day, shares will be purchased in your account at the NAV (plus any sales charge, if applicable) calculated on that same day. Orders received at or after 4:00 p.m. (Eastern Time) will be transacted at the next business day's NAV. For security reasons, requests by telephone will be recorded.

By wire

To open an account by wire transfer, a completed account application form must be received by the Fund before your wire can be accepted. You may mail or send by overnight delivery your account application form to the Transfer Agent. Upon receipt of your completed account application form, an account will be established for you. The account number assigned to you will be required as part of the wiring instruction that should be provided to your bank to send the wire. Your bank must include the name of the Fund, the account number, and your name so that monies can be correctly applied. Your bank should transmit monies by wire to:

UMB Bank, n.a.
ABA Number 101000695
For credit to Palmer Square Funds
A/C # 9871917185

For further credit to:
“Palmer Square Strategic Credit Fund”
Your account number
Name(s) of investor(s)
Social Security Number or Taxpayer Identification Number

Before sending your wire, please contact the Transfer Agent at 1-866-933-9033 to notify it of your intention to wire funds. This will ensure prompt and accurate credit upon receipt of your wire. Your bank may charge a fee for its wiring service.

Wired funds must be received prior to 4:00 p.m. (Eastern Time) on a business day to be eligible for same-day pricing. **The Fund and UMB Bank, n.a. are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.**

Selling (Redeeming) Fund Shares

Generally, holders of shares of the Fund may redeem for cash some or all of their shares without charge by the Fund (other than any applicable sales charge or redemption fee) at any time. As described under the Prospectus heading “Purchase of Shares,” redemptions of Class A shares bought pursuant to the Large Order Net Asset Value Purchase Privilege may be subject to a CDSC. Redemptions completed through an authorized dealer, custodian, trustee or record keeper of a retirement plan account may involve additional fees charged by such person. Redemptions generally will be subject to federal income tax if you hold shares of the Fund in a taxable account.

Through a broker-dealer or other financial intermediary

If you purchased your shares through an approved financial intermediary, your redemption order must be placed through the same financial intermediary. The Fund will be deemed to have received a redemption order when a financial intermediary (or its authorized agent) receives the order. The financial intermediary must receive your redemption order prior to 4:00 p.m. (Eastern Time) on a business day for the redemption to be processed at the current day’s NAV. Orders received at or after 4:00 p.m. (Eastern Time) on a business day or on a day when the Fund does not value its shares will be transacted at the next business day’s NAV. Please keep in mind that your approved financial intermediary may charge additional fees for its services. In the event your approved financial intermediary is no longer available, you may place your redemption order directly with Fund as described below.

By mail

You may redeem shares purchased directly from the Fund by mail. Send your written redemption request to **Palmer Square Funds** at the address indicated below. Your request must be in good order and contain the Fund name, the name(s) on the account, your account number and the dollar amount or the number of shares to be redeemed. The redemption request must be signed by all shareholders listed on the account. Additional documents are required for certain types of shareholders, such as corporations, partnerships, executors, trustees, administrators, or guardians (*i.e.*, corporate resolutions dated within 60 days, or trust documents indicating proper authorization).

Regular Mail
Palmer Square Funds
P.O. Box 2175
Milwaukee, Wisconsin 53201

Overnight Delivery
Palmer Square Funds
235 West Galena Street
Milwaukee, Wisconsin 53212

A Medallion signature guarantee must be included if any of the following situations apply:

- You wish to redeem more than \$50,000 worth of shares;
- When redemption proceeds are sent to any person, address or bank account not on record;
- If a change of address was received by the Transfer Agent within the last 15 days;
- If ownership is changed on your account; or
- When establishing or modifying certain services on your account.

By telephone

To redeem shares by telephone, call the Fund at 1-866-933-9033 and specify the amount of money you wish to redeem. You may have a check sent to the address of record, or, if previously established on your account, you may have proceeds sent by wire or electronic funds transfer through the ACH network directly to your bank account. Wire transfers are subject to a \$20 fee paid by the shareholder and your bank may charge a fee to receive wired funds. Checks sent via overnight delivery are subject to a \$25 fee. You do not incur any charge when proceeds are sent via the ACH network; however, credit may not be available for two to three business days. If you are authorized to perform telephone transactions (either through your account application form or by subsequent arrangement in writing with the Fund), you may redeem shares worth up to \$50,000 by instructing the Fund by phone at 1-866-933-9033. Unless noted on the initial account application, a Medallion signature guarantee is required of all shareholders in order to qualify for or to change telephone redemption privileges.

Note: The Fund and all of its service providers will not be liable for any loss or expense in acting upon instructions that are reasonably believed to be genuine. To confirm that all telephone instructions are genuine, the caller must verify the following:

- The Fund account number;
- The name in which his or her account is registered;
- The Social Security or Tax Identification Number under which the account is registered; and
- The address of the account holder, as stated in the account application form.

Medallion Signature Guarantee

In addition to the situations described above, the Fund reserves the right to require a Medallion signature guarantee in other instances based on the circumstances relative to the particular situation.

Shareholders redeeming more than \$50,000 worth of shares by mail should submit written instructions with a Medallion signature guarantee from an eligible institution acceptable to the Transfer Agent, such as a domestic bank or trust company, broker, dealer, clearing agency or savings association, or from any participant in a Medallion program recognized by the Securities Transfer Association. The three currently recognized Medallion programs are

Securities Transfer Agents Medallion Program, Stock Exchanges Medallion Program and New York Stock Exchange, Inc. Medallion Signature Program. Signature guarantees that are not part of these programs will not be accepted. Participants in Medallion programs are subject to dollar limitations which must be considered when requesting their guarantee. The Transfer Agent may reject any signature guarantee if it believes the transaction would otherwise be improper. A notary public cannot provide a signature guarantee.

Systematic Withdrawal Plan

You may request that a predetermined dollar amount be sent to you on a monthly or quarterly basis. Your account must maintain a value of at least \$10,000 for you to be eligible to participate in the Systematic Withdrawal Plan ("SWP"). The minimum withdrawal amount is \$100. If you elect to receive redemptions through the SWP, the Fund will send a check to your address of record, or will send the payment via electronic funds transfer through the ACH network, directly to your bank account on record. You may request an application for the SWP by calling the Transfer Agent toll-free at 1-866-933-9033. The Fund may modify or terminate the SWP at any time. You may terminate your participation in the SWP by calling the Transfer Agent at least five business days before the next withdrawal.

Payment of Redemption Proceeds

You may redeem shares of the Fund at a price equal to the NAV next determined after the Transfer Agent and/or authorized agent receives your redemption request in good order. Generally, your redemption request cannot be processed on days the NYSE is closed. Redemption proceeds for requests received in good order by the Transfer Agent and/or authorized agent before the close of the regular trading session of the NYSE (generally, 4:00 p.m. Eastern Time) will usually be sent to the address of record or the bank you indicate, or wired using the wiring instruction on record, on the following business day. Payment of redemption proceeds may take longer than typically expected, but will be sent within seven calendar days after the Fund receives your redemption request, except as specified below.

If you purchase shares using a check and request a redemption before the check has cleared, the Fund may postpone payment of your redemption proceeds up to 15 calendar days while the Fund waits for the check to clear. Furthermore, the Fund may suspend the right to redeem shares or postpone the date of payment upon redemption for more than seven calendar days: (1) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (2) for any period during which an emergency exists affecting the sale of the Fund's securities or making such sale or the fair determination of the value of the Fund's net assets not reasonably practicable; or (3) for such other periods as the SEC may permit for the protection of the Fund's shareholders.

Other Redemption Information

Shareholders who hold shares of the Fund through an IRA or other retirement plan must indicate on their redemption requests whether to withhold federal income tax. Redemption requests failing to indicate an election not to have taxes withheld will generally be subject to a 10% federal income tax withholding. In addition, if you are a resident of certain states, state income tax also applies to non-Roth IRA distributions when federal withholding applies. Please consult with your tax professional.

The Fund generally pays sale (redemption) proceeds in cash. The Fund typically expects to satisfy redemption requests by selling portfolio assets or by using holdings of cash or cash equivalents. On a less regular basis, the Fund may also satisfy redemption requests by drawing on a line of credit or using other short-term borrowings from its custodian. These methods may be used during both normal and stressed market conditions. Under unusual conditions, the Fund may pay all or part of a shareholder's redemption proceeds in portfolio securities with a market value equal to the redemption price (known as redemption-in-kind) in lieu of cash in order to protect the interests of the Fund's remaining shareholders. The Fund may redeem shares in kind during both normal and stressed market conditions. Generally, in-kind redemptions will be effected through a *pro rata* distribution of the Fund's portfolio securities. If the Fund redeems your shares in kind, you will bear any market risks associated with investment in these securities, and you will be responsible for the costs (including brokerage charges) of converting the securities to cash.

The Fund may redeem all of the shares held in your account if your balance falls below the Fund's minimum initial investment amount due to your redemption activity. In these circumstances, the Fund will notify you in writing and request that you increase your balance above the minimum initial investment amount within 30 days of the date of the

notice. If, within 30 days of the Fund's written request, you have not increased your account balance, your shares will be automatically redeemed at the current NAV. The Fund will not require that your shares be redeemed if the value of your account drops below the investment minimum due to fluctuations of the Fund's NAV.

Cost Basis Information

Federal tax law requires that regulated investment companies such as the Fund report their shareholders' cost basis, gain/loss, and holding period to the IRS on the shareholders' Consolidated Form 1099s when "covered" shares of the regulated investment companies are sold. Covered shares are any shares acquired including pursuant to a dividend reinvestment plan s on or after January 1, 2012.

The Fund has chosen "first-in, first-out" as its standing (default) tax lot identification method for all shareholders, which means this is the method the Fund will use to determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing net asset values, and the entire position is not sold at one time. The Fund's standing tax lot identification method is the method it will use to report the sale of covered shares on your Consolidated Form 1099 if you do not select a specific tax lot identification method. Redemptions are taxable and you may realize a gain or a loss upon the sale of your shares. Certain shareholders may be subject to backup withholding. Subject to certain limitations, you may choose a method other than the Fund's standing method at the time of your purchase or upon the sale of covered shares. **For all shareholders using a method other than the specific tax lot identification method, the Fund first redeems shares you acquired on or before December 30, 2011, and then applies your elected method to shares acquired after that date.** Please refer to the appropriate Treasury regulations or consult your tax advisor with regard to your personal circumstances.

Tools to Combat Frequent Transactions

The Trust's Board of Trustees has adopted policies and procedures with respect to frequent purchases and redemptions of Fund shares by Fund shareholders. The Trust discourages excessive, short-term trading and other abusive trading practices that may disrupt portfolio management strategies and harm the Fund's performance. The Trust takes steps to reduce the frequency and effect of these activities in the Fund. These steps may include monitoring trading activity and using fair value pricing. In addition, the Trust may take action, which may include using its best efforts to restrict a shareholder's trading privileges in the Fund, if that shareholder has engaged in four or more "round trips" in the Fund during a 12-month period. Although these efforts (which are described in more detail below) are designed to discourage abusive trading practices, these tools cannot eliminate the possibility that such activity may occur. Further, while the Trust makes efforts to identify and restrict frequent trading, the Trust receives purchase and sale orders through financial intermediaries and cannot always know or detect frequent trading that may be facilitated by the use of intermediaries or the use of group or omnibus accounts by those intermediaries. The Trust seeks to exercise its judgment in implementing these tools to the best of its ability in a manner that the Trust believes is consistent with the interests of Fund shareholders.

Monitoring Trading Practices

The Trust may monitor trades in an effort to detect short-term trading activities. If, as a result of this monitoring, the Trust believes that a shareholder has engaged in excessive short-term trading, it may, in its discretion, ask the shareholder to stop such activities or refuse to process purchases in the shareholder's accounts. In making such judgments, the Trust seeks to act in a manner that it believes is consistent with the best interest of shareholders. Due to the complexity and subjectivity involved in identifying abusive trading activity, there can be no assurance that the Trust's efforts will identify all trades or trading practices that may be considered abusive.

General Transaction Policies

Some of the following policies are mentioned above. In general, the Fund reserves the right to:

- vary or waive any minimum investment requirement;
- refuse, change, discontinue, or temporarily suspend account services, including purchase or telephone redemption privileges (if redemption by telephone is not available, you may send your redemption order to the Fund via regular or overnight delivery), for any reason;

- reject any purchase request for any reason (generally, the Fund does this if the purchase is disruptive to the efficient management of the Fund due to the timing of the investment or an investor’s history of excessive trading);
- delay paying redemption proceeds for up to seven calendar days after receiving a request, if an earlier payment could adversely affect the Fund;
- reject any purchase or redemption request that does not contain all required documentation; and
- subject to applicable law, and with prior notice, adopt other policies from time to time requiring mandatory redemption of shares in certain circumstances.

If you elect telephone privileges on the account application or in a letter to the Fund, you may be responsible for any fraudulent telephone orders as long as the Fund and/or its service providers have taken reasonable precautions to verify your identity. In addition, once you place a telephone transaction request, it cannot be canceled or modified.

During periods of significant economic or market change, telephone transactions may be difficult to complete. If you are unable to contact the Fund by telephone, you may also mail your request to the Fund at the address listed under “Methods of Buying.”

Your broker or other financial intermediary may establish policies that differ from those of the Fund. For example, the organization may charge transaction fees, set higher minimum investments, or impose certain limitations on buying or selling shares in addition to those identified in this Prospectus. Contact your broker or other financial intermediary for details.

Please note that the value of your account may be transferred to the appropriate state if no activity occurs in the account within the time period specified by state law.

Conversion of Shares

A share conversion is a transaction in which shares of one class of the Fund are exchanged for shares of another class of the Fund. Share conversions can occur between each share class of the Fund. Generally, share conversions occur when a shareholder becomes eligible for another share class of the Fund or no longer meets the eligibility criteria of the share class owned by the shareholder (and another class exists for which the shareholder would be eligible). Please note that a share conversion is generally a non-taxable event, but you should consult with your personal tax advisor on your particular circumstances. Please also note, all share conversion requests must be approved by the Advisor.

A request for a share conversion will not be processed until it is received in “good order” (as defined above) by the Fund or your financial intermediary. To receive the NAV of the new class calculated that day, conversion requests must be received in good order by the Fund or your financial intermediary before 4:00 p.m., Eastern Time or the financial intermediary’s earlier applicable deadline. Please note that, because the NAV of each class of the Fund will generally vary from the NAV of the other class due to differences in expenses, you will receive a number of shares of the new class that is different from the number of shares that you held of the old class, but the total value of your holdings will remain the same.

The Fund’s frequent trading policies will not be applicable to share conversions. If you hold your shares through a financial intermediary, please contact the financial intermediary for more information on share conversions. Please note that certain financial intermediaries may not permit all types of share conversions. The Fund reserves the right to terminate, suspend or modify the share conversion privilege for any shareholder or group of shareholders.

The Fund reserves the right to automatically convert shareholders from one class to another if they either no longer qualify as eligible for their existing class or if they become eligible for another class. Such mandatory conversions may be as a result of a change in value of an account due to market movements, exchanges or redemptions. The Fund will notify affected shareholders in writing prior to any mandatory conversion.

Availability of Information

Information regarding sales charges of the Fund and the applicability and availability of discounts from sales charges is available free of charge on the Fund’s website at www.palmersquarefunds.com. The Prospectus and SAI are also available on the website.

Prospectus and Shareholder Report Mailing

In order to reduce the amount of mail you receive and to help reduce expenses, we generally send a single copy of any shareholder report and Prospectus to each household. If you do not want the mailing of these documents to be combined with those of other members of your household, please contact your authorized dealer or the Transfer Agent.

Additional Information

The Fund enters into contractual arrangements with various parties, including among others the Advisor, who provide services to the Fund. Shareholders are not parties to, or intended (or “third party”) beneficiaries of, those contractual arrangements.

The Prospectus and the SAI provide information concerning the Fund that you should consider in determining whether to purchase shares of the Fund. The Fund may make changes to this information from time to time. Neither this prospectus nor the SAI is intended to give rise to any contract rights or other rights in any shareholder, other than any rights conferred by federal or state securities laws that may not be waived.

DIVIDENDS AND DISTRIBUTIONS

The Fund will make distributions of net investment income semi-annually and net capital gains, if any, at least annually, typically in December. The Fund may make an additional payment of dividends or distributions if it deems it desirable at any other time during the year.

The per share distributions on Class A shares may be lower than the per share distributions on Class I shares as a result of the higher distribution/service fees applicable to Class A shares.

All dividends and distributions will be reinvested in Fund shares unless you choose one of the following options: (1) to receive net investment income dividends in cash, while reinvesting capital gain distributions in additional Fund shares; or (2) to receive all dividends and distributions in cash. If you wish to change your distribution option, please write to the Transfer Agent before the payment date of the distribution.

If you elect to receive distributions in cash and the U.S. Postal Service cannot deliver your check, or if your distribution check has not been cashed for six months, the Fund reserves the right to reinvest the distribution check in your account at the Fund’s then current NAV and to reinvest all subsequent distributions.

FEDERAL INCOME TAX CONSEQUENCES

The following discussion is very general and does not address investors subject to special rules, such as investors who hold Fund shares through an IRA, 401(k) plan or other tax-advantaged account. The SAI contains further information about taxes. Because each shareholder’s circumstances are different and special tax rules may apply, you should consult your tax advisor about your investment in the Fund.

You will generally have to pay federal income taxes, as well as any state or local taxes, on distributions received from the Fund, whether paid in cash or reinvested in additional shares. If you sell Fund shares, it is generally considered a taxable event. If you exchange shares of the Fund for shares of another fund, the exchange will be treated as a sale of the Fund’s shares and any gain on the transaction may be subject to federal income tax.

Distributions of net investment income, other than “qualified dividend income,” and distributions of net short-term capital gains, are taxable for federal income tax purposes at ordinary income tax rates. Distributions from the Fund’s net capital gain (i.e., the excess of its net long-term capital gain over its net short-term capital loss) are taxable for federal income tax purposes as long-term capital gain, regardless of how long the shareholder has held Fund shares.

Dividends paid by the Fund (but none of the Fund’s capital gain distributions) may qualify in part for the dividends-received deduction available to corporate shareholders, provided certain holding period and other requirements are satisfied. Distributions of investment income that the Fund reports as “qualified dividend income” may be eligible to

be taxed to non-corporate shareholders at the reduced rates applicable to long-term capital gain if derived from the Fund's qualified dividend income and if certain other requirements are satisfied. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market.

You may want to avoid buying shares of the Fund just before it declares a distribution (on or before the record date), because such a distribution will be taxable to you even though it may effectively be a return of a portion of your investment.

Although distributions are generally taxable when received, dividends declared in October, November or December to shareholders of record as of a date in such month and paid during the following January are treated as if received on December 31 of the calendar year when the dividends were declared.

Information on the federal income tax status of dividends and distributions is provided annually.

Dividends and distributions from the Fund and net gain from redemptions of Fund shares will generally be taken into account in determining a shareholder's "net investment income" for purposes of the Medicare contribution tax applicable to certain individuals, estates and trusts.

If you do not provide the Fund with your correct taxpayer identification number and any required certifications, you will be subject to backup withholding on your redemption proceeds, dividends and other distributions. The backup withholding rate is currently 28%.

Dividends and certain other payments made by the Fund to a non-U.S. shareholder are subject to such withholding of federal income tax at the rate of 30% (or such lower rate as may be determined in accordance with any applicable treaty). Dividends that are reported by the Fund as "interest-related dividends" or "short-term capital gain dividends" are generally exempt from such withholding. In general, the Fund may report interest-related dividends to the extent of its net income derived from U.S.-source interest and the Fund may report short-term capital gain dividends to the extent its net short-term capital gain for the taxable year exceeds its net long-term capital loss. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax described in this paragraph.

Unless certain non-U.S. entities that hold shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to distributions and, after December 31, 2018, to redemption proceeds and certain capital gain dividends payable to such entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

Some of the Fund's investment income may be subject to foreign income taxes that are withheld at the country of origin. Tax treaties between certain countries and the United States may reduce or eliminate such taxes, but there can be no assurance that the Fund will qualify for treaty benefits.

FINANCIAL HIGHLIGHTS

The following table is intended to help you understand the Fund's financial performance. Certain information reflects financial results for a single Fund share. The total return figures in the table represent the percentage that an investor in the Fund would have earned (or lost) on an investment in the Fund class, assuming reinvestment of all dividends and distributions. The financial information for the period shown has been audited by Tait, Weller & Baker LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request (see back cover).

Palmer Square Absolute Return Fund Class I

Per share operating performance.

For a capital share outstanding throughout each period.

	For the Year Ended April 30,				
	2017	2016	2015	2014	2013
Net asset value, beginning of period	\$ 8.08	\$ 9.91	\$ 10.13	\$ 9.86	\$ 9.70
Income from Investment Operations:					
Net investment income ¹	0.16	0.46	0.34	0.24	0.06
Net realized and unrealized gain (loss) on investments and foreign currency	1.07	(1.85)	(0.19)	0.25	0.12
Total from investment operations	1.23	(1.39)	0.15	0.49	0.18
Less Distributions:					
From net investment income	(0.63)	(0.44)	(0.22)	(0.13)	(0.02)
From net realized gains	—	—	(0.15)	(0.09)	—
Total distributions	(0.63)	(0.44)	(0.37)	(0.22)	(0.02)
Net increase from payments by affiliates (Note 3)	—	—	—	—	—
Net asset value, end of period	\$ 8.68	\$ 8.08	\$ 9.91	\$ 10.13	\$ 9.86
Total return³	16.05%	(14.39)% ⁴	1.55%	4.95%	1.90%
Ratios and Supplemental Data:					
Net assets, end of period (in thousands)	\$ 31,195	\$ 41,827	\$ 307,472	\$ 256,993	\$ 201,442
Ratio of expenses to average net assets (including interest expense and interest and dividends on securities sold short):					
Before fees waived/recovered ⁵	4.62%	2.38%	2.19%	2.58%	3.01%
After fees waived/recovered ⁵	4.04%	2.40%	2.31%	2.65%	2.84%
Ratio of net investment income to average net assets (including interest expense and interest and dividends on securities sold short):					
Before fees waived/recovered	1.34%	5.00%	3.52%	2.49%	0.46%
After fees waived/recovered	1.92%	4.98%	3.40%	2.42%	0.63%
Portfolio turnover rate	255% ⁶	213% ⁶	206% ⁶	230% ⁶	317% ⁶

1 Based on average shares outstanding for the period.

2 Amount represents less than \$0.01 per share.

3 Total returns would have been lower/higher had expenses not been waived/recovered by the Advisor. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

4 Payment from affiliates had no impact to the total return.

5 If interest expense and dividends on securities sold short had been excluded, the expense ratios would have been lowered by 2.65%, 1.01%, 0.57%, 0.61% and 0.59%, for the periods ended April 30, respectively.

6 Please note that the portfolio turnover figures shown above are calculated in accordance with Item 13 of Form N-1A which exclude cash, securities, including options, futures, and cash held against other derivatives whose maturities or expiration dates at the time of acquisition were one year or less. Also not included is notional values of certain derivative contracts.

**Palmer Square Absolute Return Fund
Class A**

Per share operating performance.

For a capital share outstanding throughout each period.

	For the Year Ended April 30,				
	2017	2016	2015	2014	2013
Net asset value, beginning of period	\$ 8.04	\$ 9.88	\$ 10.09	\$ 9.83	\$ 9.67
Income from Investment Operations:					
Net investment income ¹	0.14	0.43	0.31	0.22	0.04
Net realized and unrealized gain (loss) on investments and foreign currency	1.06	(1.86)	(0.18)	0.24	0.13
Total from investment operations	1.20	(1.43)	0.13	0.46	0.17
Less Distributions:					
From net investment income	(0.60)	(0.42)	(0.19)	(0.11)	(0.01)
From net realized gains	—	—	(0.15)	(0.09)	—
Total distributions	(0.60)	(0.42)	(0.34)	(0.20)	(0.01)
Net increase from payments by affiliates (Note 3)	—	0.01	—	—	—
Net asset value, end of period	\$ 8.64	\$ 8.04	\$ 9.88	\$ 10.09	\$ 9.83
Total return²	15.71%	(14.70)% ³	1.30%	4.71%	1.73%
Ratios and Supplemental Data:					
Net assets, end of period (in thousands)	\$ 2,790	\$ 2,222	\$ 5,467	\$ 35,975	\$ 21,515
Ratio of expenses to average net assets (including interest expense and interest and dividends on securities sold short):					
Before fees waived/recovered ⁴	4.87%	2.63%	2.44%	2.83%	3.26%
After fees waived/recovered ⁴	4.29%	2.65%	2.56%	2.90%	3.09%
Ratio of net investment income to average net assets (including interest expense and interest and dividends on securities sold short):					
Before fees waived/recovered	1.09%	4.75%	3.27%	2.24%	0.21%
After fees waived/recovered	1.67%	4.73%	3.15%	2.17%	0.38%
Portfolio turnover rate	255% ⁵	213% ⁵	206% ⁵	230% ⁵	317% ⁵

1 Based on average shares outstanding for the period.

2 Total returns would have been lower/higher had expenses not been waived/recovered by the Advisor. Returns shown do not include payment of sales load of 5.75% of offering price which is reduced on sales of \$50,000 or more. Returns shown do not include payment of a Contingent Deferred Sales Charge (“CDSC”) of 1% on certain redemptions of Class A shares made within one year of purchase. If the sales load or CDSC were included, total returns would be lower. These returns include Rule 12b-1 fees of up to 0.25% and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

3 Payment from affiliates had a positive 0.02% impact to the total return.

4 If interest expense and dividends on securities sold short had been excluded, the expense ratios would have been lowered by 2.65%, 1.01%, 0.57%, 0.61% and 0.59%, for the periods ended April 30, respectively.

5 Please note that the portfolio turnover figures shown above are calculated in accordance with Item 13 of Form N-1A which exclude cash, securities, including options, futures, and cash held against other derivatives whose maturities or expiration dates at the time of acquisition were one year or less. Also not included is notional values of certain derivative contracts.

APPENDIX A – WAIVERS AND DISCOUNTS AVAILABLE FROM INTERMEDIARIES

The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Fund or through a financial intermediary. Intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers or contingent deferred sales load (“CDSC”) waivers, which are discussed below. In all instances, it is the purchaser’s responsibility to notify the Fund or the purchaser’s financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. **For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Fund or through another intermediary to receive these waivers or discounts.**

Waiver of Initial Sales Charge on Purchases of Class A Shares by Certain Financial Institutions:

No initial sales charge is imposed on purchases of Class A shares by the following financial institutions that (i) are compensated by clients on a fee-only basis, or (ii) have entered into an agreement with the Fund to offer Class A shares through no-load network or platforms as described in “Net Asset Value Purchases” beginning on page 33 of this Prospectus:

FOR MORE INFORMATION

Statement of Additional Information (“SAI”)

The SAI provides additional details about the investments and techniques of the Fund and certain other additional information. A current SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Shareholder Reports

Additional information about the Fund’s investments is available in the Fund’s annual and semi-annual reports to shareholders. In the Fund’s annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund’s performance during its most recent fiscal year.

The Fund’s SAI, annual and semi-annual reports are available, free of charge, on the Fund’s website at www.palmersquarefunds.com. You can also obtain a free copy of the SAI or the Fund’s annual and semi-annual reports, request other information, or inquire about the Fund by contacting a broker that sells shares of the Fund or by calling the Fund (toll-free) at 1-866-933-9033 or by writing to:

Palmer Square Funds
P.O. Box 2175
Milwaukee, Wisconsin 53201

Information about the Fund (including the SAI) can be reviewed and copied at the Public Reference Room of the SEC in Washington, DC. You can obtain information on the operation of the Public Reference Room by calling the SEC at 1-202-551-8090. Reports and other information about the Fund are also available:

- Free of charge from the SEC’s EDGAR Database on the SEC’s Internet website at <http://www.sec.gov>;
- For a duplication fee, by writing to the Public Reference Section of the SEC, Washington, DC 20549-0102; or
- For a duplication fee, by electronic request at the following e-mail address: publicinfo@sec.gov.
