

Palmer Square Opportunistic Income Fund

(PSOIX)

February 2026

Investment Objective

The Fund seeks a high level of current income. As a secondary objective, the Fund seeks long-term capital appreciation.

Strategy Overview

Exposure to Palmer Square Expertise in Opportunistic Credit

- Seeks to leverage the Fund's flexible mandate with the intention of locating the best relative value opportunities across corporate credit and structured credit
- Given the current opportunity, the Fund is primarily focused on executing on relative value available in floating rate areas such as collateralized loan obligation ("CLO") debt and bank loans.
- Strategy has diversification potential and may benefit in a rising rate environment
- Managers utilize a rigorous multi-step fundamental process to manage credit risk

What Makes the Palmer Square Opportunistic Income Fund Unique?

- Niche Credit Access/Broad Opportunity Set – given the depth of Palmer Square's corporate and structured credit team, we believe we are able to traffic in less "traveled" credit sectors
 - Research process driven by top-down analysis across corporate and structured credit, analyzing spreads, duration, yield, trends, industry sectors, etc.
- Research bias to investing in securities Palmer Square believes have low potential for default (i.e., first lien, senior secured bank loans, CLOs with plenty of credit subordination)
- Expanded set of credit opportunities coupled with low interest rate duration bias provides diversification potential for fixed income portfolios
- Low spread duration positioning should lessen susceptibility to spread widening risk and volatility, while still maintaining solid yield potential
- Senior members of Palmer Square's Investment Team average 20 years credit investing experience

Portfolio Characteristics² (as of 12/31/2025)

Interest Rate Duration	0.45 yrs

Annual Expense Ratio: Gross 2.01%/Net 2.01%. The Fund's advisor has contractually agreed to waive or reduce its management fees and/or reimburse expenses of the Fund to ensure that total annual Fund operating expenses (excluding taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.50% of the Fund's average daily net assets. This agreement is in effect until December 1, 2026, and it may be terminated before that date only by the Fund's Board of Trustees. The Fund's advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made to the Fund for a period of three years from the date of the waiver or payment. ¹Palmer Square Capital Management LLC's AUM is unaudited. The AUM provided is an estimate as of 12/31/2025 and is inclusive of Palmer Square Capital Management LLC and its affiliates. ²Please see Notes and Disclosures for definitions. Returns greater than one year are annualized. **The performance data quoted represents past performance and that past performance does not guarantee future results. Investment return and principal value will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Notes and Disclosures

Interest Rate Duration measures a portfolio's sensitivity to changes in interest rates. The longer a security's duration, the more sensitive its price will be to changes in interest rates. **Spread Duration** measures a portfolio's sensitivity to changes in spreads and is the percentage price change of a bond's price given a 1% change in the yield spread. **Spread widening** refers to an increase in the yield spread. **Yield To Maturity** is the rate of return anticipated on a bond if held until the end of its lifetime. **Current Yield** is a weighted calculation of the annual coupon rate divided by the price of each individual security within the portfolio and represents the return an investor would expect if the securities were held for a year and the price did not change. **30-Day SEC Yield** represents net investment income earned by the Fund over the 30-day period, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period. The **subsidized (net of fees) SEC yield** is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and includes the effect of any fee waivers. Without waivers, yields would be reduced. The **unsubsidized (gross of fees) SEC yield** is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and does not reflect waivers in effect. **Weighted average price** calculated by adding up the dollars traded and dividing by the total shares traded. **Yield to Expected Call** is a Yield to Call metric that assumes callable bonds are not called on their call date, but at some later date prior to maturity. Yield to Expected Call considers contractual terms in a bond's indenture or other similar governing document. A bond may be called before or after this date, which has the potential to increase or decrease the Yield to Expected Call calculation. All else equal, when a bond's price is below par, Yield to Expected Call is a more conservative yield metric than Yield to Call. If a bond is not callable, Yield to Expected Call calculates the bond's Yield to Maturity.

The allocation and credit quality distribution figures shown are used for illustrative purposes only. Palmer Square does not guarantee to execute that allocation and credit quality distribution. Allocation and exposures information, as well as other referenced categorizations, reflect classifications determined by Palmer Square as well as certain Palmer Square assumptions based on estimated portfolio characteristic information. Allocation and credit quality distribution figures may not sum to 100%. Ratings listed herein are assigned by Standard & Poor's (S&P) and Moody's Investor Service (Moody's). Credit quality ratings are measured on a scale with S&P's credit quality ratings ranging from AAA (highest) to D (lowest) and Moody's credit quality ratings ranging from Aaa (highest) to C (lowest). We use the higher of the two ratings. The credit quality distribution figures do not include unrated by Moody's, S&P, or Fitch, or another Nationally Recognized Statistical Rating Organization. Credit ratings listed are subject to change. Please contact Palmer Square for more information.

Market opportunities and/or yields shown are for illustration purposes only and are subject to change without notice. Palmer Square does not represent that these or any other strategy/opportunity will prove to be profitable or that the Fund's investment objective will be met.

This material represents an assessment of the market environment at a specific point in time, is subject to change without notice, and should not be relied upon by the reader as research or investment advice. With regard to sources of information, certain of the economic and market information contained herein has been obtained from published sources and/or prepared by third parties. While such sources are believed to be reliable, Palmer Square or their respective affiliates, employees, or representatives do not assume any responsibility for the accuracy of such information. Palmer Square is under no obligation to verify its accuracy. Please note the performance of the funds may not be comparable to the performance of any index shown. Palmer Square has not verified, and is under no obligation to verify, the accuracy of index returns. Past performance does not guarantee future results.

The Fund has an interval fund structure pursuant to which the Fund will conduct quarterly repurchase offers, typically for 5-10% of the Fund's outstanding Shares at NAV per Share, subject to applicable law and to approval of the Board of Trustees of the Fund. In all cases such repurchases will be for at least 5% and not more than 25% of the Fund's outstanding shares. In connection with any repurchase offer, the Fund may offer to repurchase only a minimum amount of 5% of its outstanding Shares. A repurchase offer may be oversubscribed, with the result that shareholders may only be able to have a portion of their Shares repurchased. Shareholders may not have access to the money invested for an extended period of time and may not be able to redeem share regardless of how the fund performs at the time or in the amount desired.

An investment in the Fund is not designed to be a complete investment program and should be considered speculative. Investing in the Fund entails substantial risk and may result in a loss of some or all of the amount invested. An investment in the Fund is not appropriate for investors with a short-term investing horizon and/or cannot bear the loss of some or all of their investment .

The risks of an investment in a collateralized debt obligation depend largely on the type of collateral securities and the class of the debt obligation in which the Fund invests. Collateralized debt obligations are generally subject to credit, interest rate, valuation, prepayment, and extension risks. These securities are also subject to risk of default on the underlying asset, particularly during periods of economic downturn. Defaults, downgrades, or perceived declines in creditworthiness of an issuer or guarantor of a debt security held by the Fund, or a counterparty to a financial contract with the Fund, can affect the value of the Fund's portfolio. High yield securities, commonly referred to as "junk bonds", are rated below investment grade may be more negatively impacted by these risks.

Credit loss can vary depending on subordinated securities and non-subordinated securities. If interest rates fall, an issuer may exercise its right to prepay their securities. If this happens, the Fund will not benefit from the rise in market price and will reinvest prepayment proceeds at a later time. The Fund may lose any premium it paid on the security. If interest rates rise, repayments of fixed income securities may occur more slowly than anticipated by the market which may result in driving the prices of these securities down.
