Statement of Additional Information

October 30, 2026

PALMER SQUARE INCOME PLUS FUND
Class I (Ticker Symbol: PSYPX)
Class T (Ticker Symbol: PSTPX)

PALMER SQUARE ULTRA-SHORT DURATION INVESTMENT GRADE FUND
Class I (Ticker Symbol: PSDSX)

Each a series of Palmer Square Funds Trust

This Statement of Additional Information ("SAI") is not a prospectus, and it should be read in conjunction with the prospectus dated October 30, 2026 (the "Prospectus"), as may be amended from time to time, of the Palmer Square Income Plus Fund and Palmer Square Ultra-Short Duration Investment Grade Fund (each, a "Fund" and, together, the "Funds"). Each Fund is a series of Palmer Square Funds Trust (the "Trust"). Palmer Square Capital Management LLC (the "Advisor") is the investment adviser to the Funds. A copy of the Prospectus may be obtained by contacting the Funds at the address or telephone number specified below.

As discussed in this SAI, the Funds have adopted the financial statements and performance history of the Predecessor Funds (defined below). The audited financial statements of each of the Palmer Square Income Plus Fund and Palmer Square Ultra-Short Duration Investment Grade Fund for the fiscal period ended June 30, 2026 and the notes thereto are incorporated herein by reference to the Trust's Form N-CSR, which was filed with the U.S. Securities and Exchange Commission on August 27, 2026 (Accession Number: 0002014487-26-000013). A copy of each Fund's Annual Report, Semi-Annual Report, and Financials and Other Information, can be obtained by contacting the Funds at the address or telephone number specified below.

THE TRUST AND THE FUNDS

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on March 5, 2024. The Trust currently consists of five series, including the Funds. This SAI relates only to the Funds and not to the other series of the Trust.

The Trust is registered with the Securities and Exchange Commission ("SEC") as an open-end management investment company. Such a registration does not involve supervision of the management or policies of the Funds. The Prospectus of the Funds and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee or without a fee through the SEC's web site at www.sec.gov.

Each Fund is classified as a diversified fund, which means it is subject to the diversification requirements under the Investment Company Act of 1940, as amended (the "1940 Act"). Under the 1940 Act, a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, government securities, and securities of other investment companies. Each Fund's classification as a diversified fund may only be changed with the approval of the Fund's shareholders.

On November 3, 2025, Palmer Square Income Plus Fund acquired all of the assets and liabilities of Palmer Square Income Plus Fund, a series of Investment Managers Series Trust (the "Income Plus Predecessor Fund"), and Palmer Square Ultra-Short Duration Investment Grade Fund acquired all of the assets and liabilities of Palmer Square Ultra-Short Duration Investment Grade Fund, a series of Investment Managers Series Trust (the "Ultra-Short Duration Predecessor Fund," together with the Income Plus Predecessor Fund, the "Predecessor Funds") in a tax-free reorganization (the "Reorganization"). The Funds commenced operations following the Reorganization. However, as a result of the Reorganization, each Fund assumed the financial statements and accounting and performance history of its respective Predecessor Fund.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The discussion below supplements information contained in the Prospectus pertaining to the investment policies of each Fund.

PRINCIPAL INVESTMENT STRATEGIES, POLICIES AND RISKS

Market Conditions

Financial markets may be adversely affected by economic, political, geopolitical, regulatory and other developments throughout the world. Market volatility may result from actual or perceived changes in economic growth, inflation, interest rates, fiscal and monetary policy, government borrowing, trade policies, tariffs, sanctions, armed conflicts, terrorism, cyberattacks, public health events, natural disasters, energy and commodity market disruptions and other significant events. Such developments may adversely affect issuers, industries, sectors, markets, currencies and individual securities, may reduce market liquidity and may increase market volatility.

Governments, central banks and other policymakers periodically implement monetary, fiscal, regulatory and other measures in response to economic conditions, financial market developments, geopolitical events and other significant circumstances. Such measures may not achieve their intended objectives and may have unintended consequences for financial markets, interest rates, inflation, economic growth, market liquidity and asset valuations. A Fund may be adversely affected by market reactions to actual or anticipated policy changes and by uncertainty regarding future government or central bank actions.

Market disruptions may be sudden, widespread and difficult to predict. Such events may affect a Fund's ability to value investments, implement investment strategies, satisfy redemption requests or dispose of portfolio investments at desirable times or prices.

Debt Securities

The Funds may invest in debt securities. Debt securities are used by issuers to borrow money. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest, but are purchased at a discount from their face values and accrue interest at the applicable coupon rate over a specified time period. Some debt securities pay a periodic coupon that is not fixed; instead payments "float" relative to a reference rate, such as the Secured Overnight Financing Rate ("SOFR"). This "floating rate" debt may pay interest at levels above or below the previous interest payment. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall.

Lower rated debt securities, those rated Ba or below by Moody's Investors Service, Inc. ("Moody's") and/or BB or below by Standard & Poor's Ratings Group ("S&P") or unrated by S&P, Moody's or another nationally recognized statistical rating organization ("NRSRO") but determined by the Advisor to be of comparable quality, are described by the rating agencies as speculative and involve greater risk of default or price changes than higher rated debt securities due to changes in the issuer's creditworthiness or the fact that the issuer may already be in default. The market prices of these securities may fluctuate more than higher quality securities and may decline significantly in periods of general economic difficulty. It may be more difficult to sell or to determine the value of lower rated debt securities.

Certain additional risk factors related to debt securities are discussed below:

Sensitivity to Interest Rate and Economic Changes. Debt securities may be sensitive to economic changes, political and corporate developments, and interest rate changes. In addition, during an economic downturn or periods of rising interest rates, issuers that are highly leveraged may experience increased financial stress that could adversely affect their ability to meet projected business goals, obtain additional financing, and service their principal and interest payment obligations. Furthermore, periods of economic change and uncertainty can be expected to result in increased volatility of market prices and yields of certain debt securities. For example, prices of these securities can be affected by financial contracts held by the issuer or third parties (such as derivatives) related to the security or other assets or indices.

Payment Expectations. Debt securities may contain redemption or call provisions. If an issuer exercises these provisions in a lower interest rate environment, a Fund would have to replace the security with a lower yielding security, resulting in decreased income to investors. If the issuer of a debt security defaults on its obligations to pay interest or principal or is the subject of bankruptcy proceedings, a Fund may incur losses or expenses in seeking recovery of amounts owed to it.

Liquidity. Liquidity risk may result from the lack of an active market, or reduced number and capacity of traditional market participants to make a market in fixed income securities, and may be magnified in a rising interest rate environment or other circumstances where investor redemptions from fixed income mutual funds may be higher than normal, causing increased supply in the market due to selling activity. In such cases, a Fund, due to limitations on investments in illiquid securities and the difficulty in purchasing and selling such securities or instruments, may be unable to achieve its desired level of exposure to a certain sector. To the extent that a Fund's principal investment strategies involve investments in securities of companies with smaller market capitalizations, foreign non-U.S. securities, Rule 144A securities, illiquid sectors of fixed income securities, derivatives or securities with substantial market and/or credit risk, a Fund will tend to have the greatest exposure to liquidity risk. Further, fixed income securities with longer durations until maturity face heightened levels of liquidity risk as compared to fixed income securities with shorter durations until maturity. Finally, liquidity risk also refers to the risk of unusually high redemption requests or other unusual market conditions that may make it difficult for a Fund to fully honor redemption requests within the allowable time period. Meeting such redemption requests could require a Fund to sell securities at reduced prices or under unfavorable conditions, which would reduce the value of the Fund. It may also be the case that other market participants may be attempting to liquidate fixed income holdings at the same time as the Fund, causing increased supply in the market and contributing to liquidity risk and downward pricing pressure.

The Advisor attempts to reduce the risks described above through diversification of the Fund's portfolio, credit analysis of each issuer, and by monitoring broad economic trends as well as corporate and legislative developments, but there can be no assurance that it will be successful in doing so. Credit ratings of debt securities provided by rating agencies indicate a measure of the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between corporate developments and the time a rating is assigned and updated.

Changing Fixed Income Market Conditions. Fixed income markets may be affected by actual or anticipated changes in monetary and fiscal policy, inflation expectations, economic growth, government borrowing, banking sector conditions, market liquidity and investor demand. Actions by the Federal Reserve and other central banks, including changes in policy rates, balance sheet policies and liquidity facilities, may cause increases or decreases in interest rates, credit spreads and market volatility. Such actions may not achieve their intended objectives and may have unintended consequences for financial markets, fixed income instruments and economic conditions generally. Changes in interest rates, inflation expectations or risk perceptions may adversely affect the value, liquidity and performance of a Fund's investments.

In addition, fixed income market liquidity may be affected by reductions in dealer inventories, changes in market-making capacity, regulatory developments, periods of market stress or significant shareholder flows into or out of fixed income investment products. Reduced liquidity may result in increased price volatility, wider bid-ask spreads and a diminished ability to purchase or sell fixed income securities at desirable times or prices. These conditions may be exacerbated during periods of economic uncertainty, inflation, market volatility or other market disruptions.

Bond Ratings. Bond rating agencies may assign modifiers (such as +/–) to ratings categories to signify the relative position of a credit within the rating category. Investment policies that are based on ratings categories should be read to include any security within that category, without considering the modifier. Credit ratings represent the rating agency's opinion regarding the credit quality of a security or issuer and may be revised or withdrawn at any time. Ratings are not recommendations to buy, sell or hold securities and do not address market value or liquidity risk.

Fixed Income Securities

Each Fund may invest in a wide range of fixed-income securities, which may include obligations of any rating or maturity. A Fund may invest in investment grade corporate debt securities. Investment grade corporate bonds generally are those rated BBB- or higher by S&P, Baa3 or higher by Moody's, or the equivalent rating of another NRSRO. Securities rated BBB by S&P are considered investment grade, but Moody's considers securities rated Baa to have speculative characteristics. Each Fund may also invest in below investment grade corporate debt securities (commonly known as "junk bonds" or "high yield bonds"). A Fund will not invest in securities that are rated below D

by S&P or Moody's. A Fund may hold a debt security rated below D if a downgrade occurs after the security has been purchased. Each Fund may also invest in unrated debt securities that the Advisor believes are of comparable quality to the rated securities in which a Fund may purchase.

Corporate Debt Securities. The Funds may invest in corporate debt securities. Corporate debt securities are fixed-income securities issued by businesses to finance their operations, although corporate debt instruments may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary difference being their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including small-, mid- and large-capitalization companies. Corporate debt may be rated investment grade or below investment grade and may carry variable or floating rates of interest.

Because of the wide range of types and maturities of corporate debt securities, as well as the range of creditworthiness of their issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry credit risk, interest rate risk and prepayment risk. Credit risk is the risk that a Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities.

Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms. Prepayment risk occurs when issuers prepay fixed rate debt securities when interest rates fall, forcing a Fund to invest in securities with lower interest rates. Issuers of debt securities are also subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its debt securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

High Yield or "Junk" Bonds. The Funds may invest in junk bonds. Junk bonds generally offer a higher current yield than that available for investment grade issues. However, below investment grade debt securities involve higher risks, in that they are especially subject to adverse changes in general economic conditions and in the industries in which the issuers are engaged, to changes in the financial condition of the issuers and to price fluctuations in response to changes in interest rates. During periods of economic downturn or rising interest rates, highly leveraged issuers may experience financial stress that could adversely affect their ability to make payments of interest and principal and increase the possibility of default. At times in recent years, the prices of many below investment grade debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on below investment grade debt securities rose dramatically, reflecting the risk that holders of such securities could lose a substantial portion of their value as a result of the issuers' financial restructuring or default. There can be no assurance that such price declines will not recur. The market for below investment grade debt issues generally is thinner and less active than that for higher quality securities, which may limit each Fund's ability to sell such securities at fair value in response to changes in the economy or financial markets. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of below investment grade debt securities, especially in a thinly traded market. Changes by recognized rating services in their rating of a debt security may affect the value of these investments. Each Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Advisor will monitor the investment to determine whether continued investment in the security will assist in meeting each Fund's investment objectives.

Convertible Securities. The Funds may invest in convertible securities. Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock or other equity security at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. The investment characteristics of each convertible security vary widely, which allows convertible securities to be employed for a variety of investment strategies. The Funds will exchange or convert convertible securities into shares of underlying common stock when, in the opinion of the Advisor, the investment characteristics of the underlying common stock or other equity security will assist each Fund in achieving its investment objectives. The Funds may also elect to hold or trade convertible securities. In selecting convertible securities, the Advisor evaluates the investment characteristics of the convertible security as a fixed income instrument, and the investment potential of the underlying equity security for capital appreciation. In evaluating these matters with respect to a particular convertible security, the Advisor considers numerous factors, including the economic and political outlook, the value of the security relative to other investment alternatives, trends in the determinants of the issuer's profits, and the issuer's management capability and practices. Convertible securities are subject to the risks associated generally with fixed income securities.

Zero-Coupon Securities. The Funds may invest in zero-coupon securities. Zero-coupon securities make no periodic interest payments, but are sold at a deep discount from their face value. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. The discount varies depending on the time remaining until maturity, as well as market interest rates, liquidity of the security, and the issuer's perceived credit quality. If the issuer defaults, the holder may not receive any return on its investment. Because zero-coupon securities bear no interest, their price fluctuates more than other types of bonds. Since zero-coupon bondholders do not receive interest payments, when interest rates rise, zero-coupon securities fall more dramatically in value than bonds paying interest on a current basis. When interest rates fall, zero-coupon securities rise more rapidly in value because the bonds reflect a fixed rate of return. An investment in zero-coupon securities may cause the Funds to recognize income and make distributions to shareholders before it receives any cash payments on its investment.

Unrated Debt Securities. The Funds may also invest in unrated debt securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.

Government Obligations

The Funds may invest in U.S. government obligations. Such obligations include Treasury bills, certificates of indebtedness, notes and bonds. U.S. government obligations include securities issued or guaranteed as to principal and interest by the U.S. government, its agencies or instrumentalities. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis. U.S. government obligations include securities issued or guaranteed by government-sponsored enterprises.

Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities, including government-sponsored enterprises, where it is not obligated to do so. In addition, U.S. government obligations are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

Agency Obligations. Certain U.S. government agency, instrumentality and government-sponsored enterprise obligations are supported by the full faith and credit of the United States, while others are supported only by the issuing entity's ability to borrow from the U.S. Treasury, by discretionary authority of the U.S. government to purchase the entity's obligations, or solely by the credit of the issuing entity. Securities issued by government-sponsored enterprises, including

FNMA and FHLMC, are not direct obligations of the United States and generally are not guaranteed by the full faith and credit of the United States unless expressly provided by law. There can be no assurance that the U.S. government will provide financial support to a government-sponsored enterprise or other issuer if it is not legally obligated to do so. As a result, obligations issued by such entities remain subject to credit risk and may be adversely affected by deterioration in the financial condition of the issuer, changes in market perceptions regarding government support, legislative or regulatory developments, or other adverse events affecting the issuer or the markets in which it operates.

Derivatives

Each Fund may utilize a variety of derivatives contracts, such as futures, options, swaps and forward contracts, both for investment purposes and for hedging purposes. Hedging involves special risks including the possible default by the other party to the transaction, illiquidity and, to the extent the Advisor's assessment of certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if hedging had not been used. Nonetheless, with respect to certain investment positions, a Fund may not be sufficiently hedged against market fluctuations, in which case an investment position could result in a loss greater than if the Advisor had been sufficiently hedged with respect to such position.

The Advisor will not, in general, attempt to hedge all market or other risks inherent in a Fund's positions, and may hedge certain risks, if at all, only partially. Specifically, the Advisor may choose not, or may determine that it is economically unattractive, to hedge certain risks, either in respect of particular positions or in respect of the Fund's overall portfolio. Moreover, it should be noted that the Fund's portfolio always will be exposed to unidentified systematic risk factors and to certain risks that cannot be completely hedged, such as credit risk (relating both to particular securities and to counterparties). A Fund's portfolio composition may result in various directional market risks remaining unhedged, although the Advisor may rely on diversification to control such risks to the extent that the Advisor believes it is desirable to do so.

The regulation of derivatives markets in the United States is a rapidly changing area of law and is subject to modification by government and judicial action. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), signed into law in 2010, granted significant authority to the SEC and the Commodity Futures Trading Commission ("CFTC") to impose comprehensive regulations on the over-the-counter ("OTC") and cleared derivatives markets. These regulations include, but are not limited to, mandatory clearing of certain derivatives and requirements relating to disclosure, margin and trade reporting. New regulations could adversely affect the value, availability and performance of certain derivative instruments, may make them more costly, and may limit or restrict their use by the Funds.

The Funds operate under Rule 18f-4 under the 1940 Act (the "Derivatives Rule"), which among other things, governs the use of derivative instruments and certain financing transactions (e.g., reverse repurchase agreements) by registered investment companies. The Derivatives Rule requires investment companies that enter into derivatives transactions and certain other transactions that create future payment or delivery obligations to, among other things, (i) comply with a value-at-risk ("VaR") leverage limit, and (ii) adopt and implement a comprehensive written derivatives risk management program. These and other requirements apply unless (a) a Fund qualifies as a "limited derivatives user," which the Derivatives Rule defines as a fund that limits its derivatives exposure to 10% of its net assets, or (b) a Fund does not engage in derivatives transactions as defined in the Derivatives Rule. At present, Palmer Square Ultra-Short Duration Investment Grade Fund qualifies as a limited derivatives user. The Derivatives Rule may not be effective to limit each Fund's risk of loss. In particular, measurements of VaR rely on historical data and may not accurately measure the degree of risk reflected in each Fund's derivatives or other investments. Other potentially adverse regulatory obligations can develop suddenly and without notice.

Certain additional risk factors related to derivatives are discussed below:

Derivatives Risk. Transactions in some types of interest rate swaps and index credit default swaps on North American and European indices are required to be cleared. In a cleared derivatives transaction, a Fund's counterparty is a clearing house (such as CME Clearing, ICE Clearing or LCH. Clearnet), rather than a bank or broker. Since a Fund is not a member of clearing houses and only members of a clearing house can participate directly in the clearing house, a Fund will hold cleared derivatives through accounts at clearing members, who are futures commission merchants that are members of the clearing houses and who have the appropriate regulatory approvals to engage in swaps. A Fund will make and receive payments owed under cleared derivatives transactions (including margin payments) through its

accounts at clearing members. Clearing members guarantee performance of their clients' obligations to the clearing house. In contrast to bilateral derivatives transactions, following a period of advance notice to the Fund, clearing members generally can require termination of existing cleared derivatives transactions at any time and increases in margin above the margin that it required at the beginning of a transaction. Clearing houses also have broad rights to increase margin requirements for existing transactions and to terminate transactions. Any such increase or termination could interfere with the ability of a Fund to pursue its investment strategy. Also, a Fund is subject to execution risk if it enters into a derivatives transaction that is required to be cleared (or that the Advisor expects to be cleared), and no clearing member is willing or able to clear the transaction on the Fund's behalf. While the documentation in place between a Fund and its clearing members generally provides that the clearing members will accept for clearing all transactions submitted for clearing that are within credit limits specified by the clearing members in advance, a Fund could be subject to this execution risk if a Fund submits for clearing transactions that exceed such credit limits, if the clearing house does not accept the transactions for clearing, or if the clearing members do not comply with their agreement to clear such transactions. In that case, the transaction might have to be terminated, and a Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the transaction. In addition, new regulations could, among other things, restrict the Fund's ability to engage in, or increase the cost to a Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to a Fund or increasing margin or capital requirements. If a Fund is not able to enter into a particular derivatives transaction, the Fund's investment performance and risk profile could be adversely affected as a result.

Counterparty Risk. Counterparty risk with respect to OTC derivatives may be affected by new regulations promulgated by the CFTC and SEC affecting the derivatives market. As described under "Derivatives Risk" above, some derivatives transactions will be required to be cleared, and a party to a cleared derivatives transaction is subject to the credit risk of the clearing house and the clearing member through which it holds its cleared position, rather than the credit risk of its original counterparty to the derivative transaction. Clearing members are required to segregate all funds received from customers with respect to cleared derivatives transactions from the clearing member's proprietary assets. However, all funds and other property received by a clearing broker from its customers are generally held by the clearing broker on a commingled basis in an omnibus account, which may also invest those funds in certain instruments permitted under the applicable regulations. The assets of a Fund might not be fully protected in the event of the bankruptcy of the Fund's clearing member because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker's customers for a relevant account class. Also, the clearing member transfers to the clearing house the amount of margin required by the clearing house for cleared derivatives transactions, which amounts are generally held in an omnibus account at the clearing house for all customers of the clearing member. For commodities futures positions, the clearing house may use all of the collateral held in the clearing member's omnibus account to meet a loss in that account, without regard to which customer in fact supplied that collateral. Accordingly, in addition to bearing the credit risk of its clearing member, each customer to a futures transaction also bears "fellow customer" risk from other customers of the clearing member. However, with respect to cleared swaps, regulations promulgated by the CFTC require that the clearing member notify the clearing house of the amount of initial margin provided by the clearing member to the clearing house that is attributable to each customer. Because margin in respect of cleared swaps must be earmarked for specific clearing member customers, the clearing house may not use the collateral of one customer to cover the obligations of another customer. However, if the clearing member does not provide accurate reporting, a Fund is subject to the risk that a clearing house will use the Fund's assets held in an omnibus account at the clearing house to satisfy payment obligations of a defaulting customer of the clearing member to the clearing house. In addition, a clearing member may generally choose to provide to the clearing house the net amount of variation margin required for cleared swaps for all of the clearing member's customers in the aggregate, rather than the gross amount of each customer. A Fund is therefore subject to the risk that a clearing house will not make variation margin payments owed to the Fund if another customer of the clearing member has suffered a loss and is in default.

Options on Securities and Securities Indices

A Fund may invest in options on securities and securities indices. A call option entitles the purchaser, in return for the premium paid, to purchase specified securities at a specified price during the option period. A put option entitles the purchaser, in return for the premium paid, to sell specified securities during the option period. A Fund may invest in both European-style and American-style options. A European-style option is only exercisable immediately prior to its expiration. American-style options are exercisable at any time prior to the expiration date of the option.

Writing Call Options. A Fund may write covered call options. A call option is "covered" if a Fund owns the security underlying the call or has an absolute right to acquire the security without additional cash consideration or, if additional cash consideration is required, cash or cash equivalents in such amounts as held in a segregated account by the Fund's custodian. The writer of a call option receives a premium and gives the purchaser the right to buy the security underlying the option at the exercise price. The writer has the obligation upon exercise of the option to deliver the underlying security against payment of the exercise price during the option period. If the writer of an exchange-traded option wishes to terminate its obligation, the writer may effect a "closing purchase transaction." This is accomplished by buying an option of the same series as the option previously written. A writer may not effect a closing purchase transaction after it has been notified of the exercise of an option.

Effecting a closing transaction in a written call option will permit a Fund to write another call option on the underlying security with either a different exercise price, expiration date or both. Also, effecting a closing transaction will permit the cash or proceeds from the concurrent sale of any securities subject to the option to be used for other investments of a Fund. If a Fund desires to sell a particular security from its portfolio on which it has written a call option, it will effect a closing transaction prior to or concurrent with the sale of the security.

A Fund will realize a gain from a closing transaction if the cost of the closing transaction is less than the premium received from writing the option or if the proceeds from the closing transaction are more than the premium paid to purchase the option. A Fund will realize a loss from a closing transaction if the cost of the closing transaction is more than the premium received from writing the option or if the proceeds from the closing transaction are less than the premium paid to purchase the option. However, because increases in the market price of a call option will generally reflect increases in the market price of the underlying security, any loss to a Fund resulting from the repurchase of a call option is likely to be offset in whole or in part by appreciation of the underlying security owned by the Fund.

In addition to covered call options, a Fund may write uncovered (or "naked") call options on securities, including shares of exchange-traded funds ("ETFs"), and indices.

Writing Covered Index Call Options. A Fund may sell index call options. A Fund may also execute a closing purchase transaction with respect to the option it has sold and then sell another option with either a different exercise price and/or expiration date. A Fund's objective in entering into such closing transactions is to increase option premium income, to limit losses or to protect anticipated gains in the underlying stocks. The cost of a closing transaction, while reducing the premium income realized from the sale of the option, should be offset, at least in part, by the appreciation in the value of the underlying index, and by the opportunity to realize additional premium income from selling a new option.

When a Fund sells an index call option, it does not deliver the underlying stocks or cash to the broker through whom the transaction is effected. In the case of an exchange-traded option, a Fund establishes an escrow account. A Fund's custodian (or a securities depository acting for the custodian) acts as the Fund's escrow agent. The escrow agent enters into documents known as escrow receipts with respect to the stocks included in the Fund (or escrow receipts with respect to other acceptable securities). The escrow agent releases the stocks from the escrow account when the call option expires or the Fund enters into a closing purchase transaction. Until such release, the underlying stocks cannot be sold by the Fund. A Fund may enter into similar collateral arrangements with the counterparty when it sells OTC index call options.

The purchaser of an index call option sold by a Fund may exercise the option at a price fixed as of the closing level of the index on exercise date. Unless a Fund has liquid assets sufficient to satisfy the exercise of the index call option, a Fund would be required to liquidate portfolio securities to satisfy the exercise. The market value of such securities may decline between the time the option is exercised and the time a Fund is able to sell the securities. If a Fund fails to anticipate an exercise, it may have to borrow from a bank (in amounts not exceeding 5% of the Fund's total assets) pending settlement of the sale of the portfolio securities and thereby incur interest charges. If trading is interrupted on the index, a Fund would not be able to close out its option positions.

Risks of Transactions in Options. There are several risks associated with transactions in options on securities and indices. Options may be more volatile than the underlying securities and, therefore, on a percentage basis, an investment in options may be subject to greater fluctuation in value than an investment in the underlying securities themselves. There are also significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objective. In addition, a liquid secondary market for particular options may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or

closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options of underlying securities; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or clearing corporation may not be adequate to handle current trading volume at all times; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by a clearing corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. The extent to which a Fund may enter into options transactions may be limited by the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), for qualification of a Fund as a regulated investment company.

Over-the-Counter Options. The Funds may engage in transactions involving OTC options as well as exchange-traded options. Certain additional risks are specific to OTC options. A Fund may engage a clearing corporation to exercise exchange-traded options, but if a Fund purchased an OTC option, it must then rely on the dealer from which it purchased the option if the option is exercised. Failure by the dealer to do so would result in the loss of the premium paid by a Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while over-the-counter options may not. Consequently, a Fund may generally be able to realize the value of an over-the-counter option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when a Fund writes an over-the-counter option, a Fund may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom the Fund originally wrote the option. While the Funds will seek to enter into OTC options only with dealers who will agree to and are expected to be capable of entering into closing transactions with the Funds, there can be no assurance that a Fund will at any time be able to liquidate an OTC option at a favorable price at any time prior to expiration. Unless a Fund, as a covered OTC call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, a Fund may be unable to liquidate an OTC option. With respect to options written by a Fund, the inability to enter into a closing transaction may result in material losses to the Fund.

The SEC has taken the position that purchased OTC options are illiquid securities. A Fund may treat the cover used for written OTC options as liquid if the dealer agrees that the Fund may repurchase the OTC option it has written for a maximum price to be calculated by a predetermined formula. In such cases, the OTC option would be considered illiquid only to the extent the maximum purchase price under the formula exceeds the intrinsic value of the option. Accordingly, each Fund will treat OTC options as subject to the Fund's limitation on illiquid securities. If the SEC changes its position on the liquidity of OTC options, the Funds will change the treatment of such instruments accordingly.

Securities Index Options. A Fund may invest in options on indices, including broad-based security indices. Puts and calls on indices are similar to puts and calls on other investments except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities. When a Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple ("multiplier"), which determines the total dollar value for each point of such difference. When a Fund buys a call on an index, it pays a premium and has the same rights as to such call as are indicated above. When a Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund's exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When a Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and exercise price times the multiplier if the closing level is less than the exercise price.

The risks of investment in options on indices may be greater than options on securities. Because index options are settled in cash, if a Fund writes a call on an index it cannot provide in advance for its potential settlement obligations by acquiring and holding the underlying index. A Fund can offset some of the risk of writing a call index option by holding a diversified portfolio of securities or instruments similar to those on which the underlying index is based. However, a Fund cannot, as a practical matter, acquire and hold a portfolio containing exactly the same securities or instruments as underlie the index and, as a result, bears a risk that the value of the securities or instruments held will vary from the value of the index.

Even if a Fund could assemble a portfolio that exactly reproduced the composition of the underlying index, it still would not be fully covered from a risk standpoint because of the "timing risk" inherent in writing index options. When an index option is exercised, the amount of cash that the holder is entitled to receive is determined by the difference between the exercise price and the closing index level on the date when the option is exercised. As with other kinds of options, a Fund as the call writer will not learn of the assignment until the next business day at the earliest. The time lag between exercise and notice of assignment poses no risk for the writer of a covered call on a specific underlying security or instrument, such as common stock, because there the writer's obligation is to deliver the underlying security or instrument, not to pay its value as of a fixed time in the past. So long as the writer already owns the underlying security or instrument, it can satisfy its settlement obligations by simply delivering it, and the risk that its value may have declined since the exercise date is borne by the exercising holder. In contrast, even if the writer of an index call holds investments that exactly match the composition of the underlying index, it will not be able to satisfy its assignment obligations by delivering those investments against payment of the exercise price. Instead, it will be required to pay cash in an amount based on the closing index value on the exercise date. By the time it learns that it has been assigned, the index may have declined, with a corresponding decline in the value of its portfolio. This "timing risk" is an inherent limitation on the ability of index call writers to cover their risk exposure by holding security or instrument positions.

If a Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, a Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

Futures and Options on Futures

A Fund may use interest rate, foreign currency, index and other futures contracts. A Fund may use options on futures contracts. A futures contract provides for the future sale by one party and purchase by another party of a specified quantity of the security or other financial instrument at a specified price and time. A futures contract on an index is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract originally was written. Although the value of an index might be a function of the value of certain specified securities, physical delivery of these securities is not always made. A public market exists in futures contracts covering a number of indices, as well as financial instruments, including, without limitation: U.S. Treasury bonds; U.S. Treasury notes; GNMA Certificates; three-month U.S. Treasury bills; 90-day commercial paper; bank certificates of deposit; Eurodollar certificates of deposit; the Australian dollar; the Canadian dollar; the British Pound; the Japanese Yen; the Swiss Franc; the Mexican Peso; and certain multinational currencies, such as the Euro. It is expected that other futures contracts will be developed and traded in the future.

A Fund may purchase and write (sell) call and put futures options. Futures options possess many of the same characteristics as options on securities and indices (discussed above). A futures option gives the holder the right, in return for the premium paid, to assume a long position (call) or short position (put) in a futures contract at a specified exercise price upon expiration of, or at any time during the period of, the option. Upon exercise of a call option, the holder acquires a long position in the futures contract and the writer is assigned the opposite short position. In the case of a put option, the opposite is true. When a purchase or sale of a futures contract is made by a Fund, the Fund is required to deposit with its futures commission merchant a specified amount of liquid assets ("initial margin"). The margin required for a futures contract is set by the exchange on which the contract is traded and may be modified during the term of the contract. The initial margin is in the nature of a performance bond or good faith deposit on the futures contract that is returned to a Fund upon termination of the contract, assuming all contractual obligations have been satisfied. A Fund expects to earn taxable interest income on its initial margin deposits. A Fund, as a writer of an

option, may have no control over whether the underlying futures contracts may be sold (call) or purchased (put) and as a result, bears the market risk of an unfavorable change in the valuation of the futures contracts underlying the written option. A Fund, as a purchaser of an option, bears the risk that the counterparties to the option may not have the ability to meet the terms of the option contract.

The Palmer Square Income Plus Fund invests in futures, options on futures and other instruments subject to regulation by the CFTC in reliance upon and in accordance with CFTC Regulation 4.5. Under Regulation 4.5, if a Fund uses futures, options on futures, or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options are "in-the-money" at the time of purchase of a new position) may not exceed 5% of the Fund's liquidation value, or alternatively, the aggregate net notional value of those positions at the time may not exceed 100% of the Fund's liquidation value (after taking into account unrealized profits and unrealized losses on any such positions). The Advisor, on behalf of each Fund, has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" in accordance with CFTC Regulation 4.5. As of the date of this SAI, the Fund is not deemed to be a "commodity pool" or "commodity pool operator" under the Commodity Exchange Act ("CEA"), and it is not subject to registration or regulation as such under the CEA. In addition, as of the date of this SAI, the Advisor is not deemed to be a "commodity pool operator" or "commodity trading adviser" with respect to the advisory services it provides to the Funds. In the future, if a Fund's use of futures, options on futures, or swaps requires the Advisor to register as a commodity pool operator with the CFTC with respect to the Fund, the Advisor will do so at that time.

A futures contract held by a Fund is valued daily at the official settlement price of the exchange on which it is traded. Each day the Fund pays or receives cash, called "variation margin", equal to the daily change in value of the futures contract. This process is known as "marking to market". Variation margin does not represent a borrowing or loan by a Fund but is instead a settlement between the Fund and the broker of the amount one would owe the other if the futures contract expired. In computing daily net asset value, a Fund will mark to market its open futures positions. A Fund also is required to deposit and to maintain margin with respect to put and call options on futures contracts written by it. Such margin deposits will vary depending on the nature of the underlying futures contract (and the related initial margin requirements), the current market value of the option and other futures positions held by a Fund. Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (involving the same exchange, underlying security or index and delivery month). If an offsetting purchase price is less than the original sale price, a Fund realizes a capital gain, or if it is more, a Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, a Fund realizes a capital gain, or if it is less, a Fund realizes a capital loss. The transaction costs also must be included in these calculations.

A Fund may write covered straddles consisting of a call and a put written on the same underlying futures contract. A straddle will be covered when sufficient assets are deposited to meet a Fund's immediate obligations. A Fund may use the same liquid assets to cover both the call and put options if the exercise price of the call and put are the same, or if the exercise price of the call is higher than that of the put.

Swaps

The Funds may enter into interest rate, currency and index swaps and the purchase or sale of related caps, floors and collars. The Funds may enter into these transactions to preserve a return or spread on a particular investment or portion of its portfolio, to protect against currency fluctuations or to protect against any increase in the price of securities it anticipates purchasing at a later date. Swaps may be used in conjunction with other instruments to offset interest rate, currency or other underlying risks. For example, interest rate swaps may be offset with "caps," "floors" or "collars". A "cap" is essentially a call option which places a limit on the amount of floating rate interest that must be paid on a certain principal amount. A "floor" is essentially a put option which places a limit on the minimum amount that would be paid on a certain principal amount. A "collar" is essentially a combination of a long cap and a short floor where the limits are set at different levels.

The Funds will usually enter into swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with a Fund receiving or paying, as the case may be, only the net amount of the two payments.

Total Return Swaps. A Fund may enter into total return swaps for investment purposes. Total return swaps are contracts in which one party agrees to make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indices during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets. Total return swaps may be used to obtain exposure to a security or market without owning or taking physical custody of such security or market, including in cases in which there may be disadvantages associated with direct ownership of a particular security. In a typical total return equity swap, payments made by a Fund or the counterparty are based on the total return of a particular reference asset or assets (such as an equity security, a combination of such securities, or an index). That is, one party agrees to pay another party the return on a stock, basket of stocks, or stock index in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Total return swaps involve not only the risk associated with the investment in the underlying securities, but also the risk of the counterparty not fulfilling its obligations under the agreement.

Credit Default Swaps. The Funds may enter into credit default swaps for investment purposes. A credit default swap may have as reference obligations one or more securities that are not currently held by a Fund. The Funds may be either the buyer or seller in the transaction. Credit default swaps may also be structured based on the debt of a basket of issuers, rather than a single issuer, and may be customized with respect to the default event that triggers purchase or other factors. As a seller, a Fund would generally receive an upfront payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full face amount of deliverable obligations of the reference obligations that may have little or no value. If a Fund were a buyer and no credit event occurs, the Fund would recover nothing if the swap is held through its termination date. However, if a credit event occurs, the buyer may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference obligation that may have little or no value. The use of swaps by a Fund entails certain risks, which may be different from, or possibly greater than, the risks associated with investing directly in the securities and other investments that are the referenced asset for the swap. Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with stocks, bonds, and other traditional investments. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index, but also of the swap itself, without the benefit of observing the performance of the swap under all the possible market conditions. Because some swaps have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. Certain swaps have the potential for unlimited loss, regardless of the size of the initial investment.

The Funds may also purchase credit default swaps in order to hedge against the risk of default of the debt of a particular issuer or basket of issuers, in which case a Fund would function as the counterparty referenced in the preceding paragraph. This would involve the risk that the investment may expire worthless and would only generate income in the event of an actual default by the issuer(s) of the underlying obligation(s) (or, as applicable, a credit downgrade or other indication of financial instability). It would also involve the risk that the seller may fail to satisfy its payment obligations to a Fund in the event of a default. The purchase of credit default swaps involves costs, which will reduce a Fund's return.

Currency Swaps. The Funds may enter into currency swaps for investment purposes. Currency swaps are similar to interest rate swaps, except that they involve multiple currencies. A Fund may enter into a currency swap when it has exposure to one currency and desires exposure to a different currency. Typically the interest rates that determine the currency swap payments are fixed, although occasionally one or both parties may pay a floating rate of interest. Unlike an interest rate swap, however, the principal amounts are exchanged at the beginning of the contract and returned at the end of the contract. In addition to paying and receiving amounts at the beginning and termination of the agreements, both sides will also have to pay in full periodically based upon the currency they have borrowed. Changes in foreign exchange rates and changes in interest rates, as described above, may negatively affect currency swaps.

Interest Rate Swaps. The Funds may enter into an interest rate swap in an effort to protect against declines in the value of fixed income securities held by a Fund. In such an instance, a Fund may agree to pay a fixed rate (multiplied by a notional amount) while a counterparty agrees to pay a floating rate (multiplied by the same notional amount). If interest rates rise, resulting in a diminution in the value of a Fund's portfolio, the Fund would receive payments under the swap that would offset, in whole or in part, such diminution in value.

Options on Swaps. The Funds may enter into options on swaps. An option on a swap, or a "swaption," is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap or to shorten, extend, cancel or otherwise modify an existing swap, at some designated future time on specified terms. In return, the purchaser pays a "premium" to the seller of the contract. The seller of the contract receives the premium and bears the risk of unfavorable changes on the underlying swap. A Fund may write (sell) and purchase put and call swaptions. A Fund may also enter into swaptions on either an asset-based or liability-based basis, depending on whether the Fund is hedging its assets or its liabilities. A Fund may write (sell) and purchase put and call swaptions to the same extent it may make use of standard options on securities or other instruments. A Fund may enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its holdings, as a duration management technique, to protect against an increase in the price of securities the Fund anticipates purchasing at a later date, or for any other purposes, such as for speculation to increase returns. Swaptions are generally subject to the same risks involved in a Fund's use of options.

Depending on the terms of the particular option agreement, a Fund will generally incur a greater degree of risk when it writes a swaption than it will incur when it purchases a swaption. When a Fund purchases a swaption, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when a Fund writes a swaption, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

OTC Derivatives Transactions

A Fund may enter into OTC derivatives transactions. The Dodd-Frank Act established a new statutory framework that comprehensively regulated the OTC derivatives markets for the first time. Prior to the Dodd-Frank Act, the OTC derivatives markets were traditionally traded on a bilateral basis (so-called "bilateral OTC transactions"). Now certain OTC derivatives contracts are required to be centrally cleared and traded on exchanges or electronic trading platforms called swap execution facilities ("SEFs").

Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. Without the availability of a clearing corporation, bilateral OTC transaction pricing is normally done by reference to information from market makers, which information is carefully monitored by the Advisor and verified in appropriate cases. As bilateral OTC transactions are entered into directly with a dealer, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under recently-adopted CFTC regulations, counterparties of registered swap dealers and major swap participants have the right to elect segregation of initial margin in respect of uncleared swaps. If a counterparty makes such an election, any initial margin that is posted to the swap dealer or major swap participant must be segregated in individual customer accounts held at an independent third party custodian. In addition, the collateral may only be invested in certain categories of instruments identified in the CFTC's regulations. Agreements covering these segregation arrangements must generally provide for consent by both the counterparty and the swap dealer or major swap participant to withdraw margin from the segregated account. Given these limitations on the use of uncleared swaps collateral, there is some likelihood that the electing counterparty will experience an increase in the costs associated with trading swaps with the relevant swap dealer or major swap participant. Certain other protections apply to a counterparty to uncleared swaps under the CFTC's regulations even if the counterparty does not elect segregation of its initial margin. These regulations are newly adopted, and it remains unclear whether they will be effective in protecting initial margin in the manner intended in the event of significant market stress or the insolvency of a swap dealer or major swap participant.

Furthermore, a bilateral OTC transaction may only be terminated voluntarily by entering into a closing transaction with the dealer with which a Fund originally dealt. Any such cancellation may require a Fund to pay a premium to that dealer. In those cases in which a Fund has entered into a covered transaction and cannot voluntarily terminate the transaction, a Fund will not be able to sell the underlying security until the transaction expires or is exercised or different cover is substituted. A Fund will seek to enter into OTC transactions only with dealers which agree to, and which are expected to be capable of, entering into closing transactions with the Fund. There is also no assurance that a Fund will be able to liquidate an OTC transaction at any time prior to expiration.

The requirement to execute certain OTC derivatives contracts on SEFs may offer certain advantages over traditional bilateral OTC trading, such as ease of execution, price transparency, increased liquidity and/or favorable pricing. However, SEF trading may make it more difficult and costly for a Fund to enter into highly tailored or

customized transactions and may result in additional costs and risks. Market participants such as a Fund that execute derivatives contracts through a SEF, whether directly or through a broker intermediary, are required to submit to the jurisdiction of the SEF and comply with SEF and CFTC rules and regulations which impose, among other things, disclosure and recordkeeping obligations. In addition, a Fund will generally incur SEF or broker intermediary fees when it trades on a SEF. A Fund may also be required to indemnify the SEF or broker intermediary for any losses or costs that may result from the Fund's transactions on the SEF.

Mortgage-Backed Securities

The Funds may invest in mortgage-backed securities and derivative mortgage-backed securities, and may also invest in "principal only" and "interest only" components. Mortgage-backed securities are securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. As with other debt securities, mortgage-backed securities are subject to credit risk and interest rate risk. However, the yield and maturity characteristics of mortgage-backed securities differ from traditional debt securities. A major difference is that the principal amount of the obligations may normally be prepaid at any time because the underlying assets (i.e., loans) generally may be prepaid at any time. The relationship between prepayments and interest rates may give some mortgage-backed securities less potential for growth in value than conventional fixed-income securities with comparable maturities. In addition, in periods of falling interest rates, the rate of prepayments tends to increase. During such periods, the reinvestment of prepayment proceeds by a Fund will generally be at lower rates than the rates that were carried by the obligations that have been prepaid. If interest rates rise, borrowers may prepay mortgages more slowly than originally expected. This may further reduce the market value of mortgage-backed securities and lengthen their durations. Because of these and other reasons, a mortgage-backed security's total return, maturity and duration may be difficult to predict precisely.

Mortgage-backed securities come in different classes that have different risks. Junior classes of mortgage-backed securities are designed to protect the senior class investors against losses on the underlying mortgage loans by taking the first loss if there are liquidations among the underlying loans. Junior classes generally receive principal and interest payments only after all required payments have been made to more senior classes. If a Fund invests in junior classes of mortgage-related securities, it may not be able to recover all of its investment in the securities it purchases. In addition, if the underlying mortgage portfolio has been overvalued, or if mortgage values subsequently decline, a Fund may suffer significant losses. Investments in mortgage-backed securities involve the risks of interruptions in the payment of interest and principal (delinquency) and the potential for loss of principal if the property underlying the security is sold as a result of foreclosure on the mortgage (default). These risks include the risks associated with direct ownership of real estate, such as the effects of general and local economic conditions on real estate values, the conditions of specific industry segments, the ability of tenants to make lease payments and the ability of a property to attract and retain tenants, which in turn may be affected by local market conditions such as oversupply of space or a reduction of available space, the ability of the owner to provide adequate maintenance and insurance, energy costs, government regulations with respect to environmental, zoning, rent control and other matters, and real estate and other taxes. If the underlying borrowers cannot pay their mortgage loans, they may default and the lenders may foreclose on the property.

The ability of borrowers to repay mortgage loans underlying mortgage-backed securities will typically depend upon the future availability of financing and the stability of real estate values. For mortgage loans not guaranteed by a government agency or other party, the only remedy of the lender in the event of a default is to foreclose upon the property. If borrowers are not able or willing to pay the principal balance on the loans, there is a good chance that payments on the related mortgage-related securities will not be made. Certain borrowers on underlying mortgages may become subject to bankruptcy proceedings, in which case the value of the mortgage-backed securities may decline.

Asset-Backed Securities

The Funds may invest in asset-backed securities that, through the use of trusts and special purpose vehicles, are securitized with various types of assets, such as automobile receivables, credit card receivables and home-equity loans in pass-through structures similar to the mortgage-related securities described above. In general, the collateral supporting asset-backed securities is of shorter maturity than the collateral supporting mortgage loans and is less likely to experience substantial prepayments. However, asset-backed securities are not backed by any governmental agency. Credit card receivables are generally unsecured, and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. In addition, some issuers of automobile receivables permit the

servicers to retain possession of the underlying obligations. If the servicers were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the related automobile receivables. The impairment of value of collateral or other assets underlying an asset-based security, such as a result of non-payment of loans or non-performance of other collateral or underlying assets, may reduce the value of such asset-based security and result in losses to a Fund.

Collateralized Debt Obligations. Collateralized debt obligations ("CDOs") include collateralized loan obligations ("CLOs"), collateralized bond obligations ("CBOs"), and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. CLOs are types of asset-backed securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which a Fund invests. CDOs carry additional risks including, but not limited to, (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments, (ii) the collateral may decline in value or default, (iii) a Fund may invest in CDOs that are subordinate to other classes, and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Collateralized Loan Obligations. CLOs are a type of CDO. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The loans generate cash flow that is allocated among one or more classes of securities ("tranches") that vary in risk and yield. The most senior tranche has the best credit quality and the lowest yield compared to the other tranches. The equity tranche has the highest potential yield but also has the greatest risk, as it bears the bulk of defaults from the underlying loans and helps to protect the more senior tranches from risk of these defaults. However, despite the protection from the equity and other more junior tranches, more senior tranches can experience substantial losses due to actual defaults and decreased market value due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to CLO securities as a class.

Normally, CLOs are privately offered and sold and are not registered under state or federal securities laws. Therefore, investments in CLOs may be characterized by a Fund as illiquid securities. However, an active dealer market may exist for CLOs allowing a CLO to qualify for transactions pursuant to Rule 144A under the Securities Act of 1933, as amended (the "Securities Act") and to be deemed liquid.

The riskiness of investing in CLOs depends largely on the quality and type of the collateral loans and the tranche of the CLO in which a Fund invests. In addition to the normal risks associated with fixed-income securities (such as interest rate risk and credit risk) and the risks associated with investing in CDOs, CLOs carry additional risks including that interest on certain tranches of a CLO may be paid in-kind (meaning that unpaid interest is effectively added to principal), which involves continued exposure to default risk with respect to such payments. Certain CLOs may receive credit enhancement in the form of a senior-subordinate structure, over-collateralization or bond insurance, but such enhancement may not always be present and may fail to protect a Fund against the risk of loss due to defaults on the collateral. Certain CLOs may not hold loans directly, but rather, use derivatives such as swaps to create "synthetic" exposure to the collateral pool of loans. Such CLOs entail the risks of derivative instruments.

Coverage Tests and Cash Flow Diversion. CLOs generally are subject to various overcollateralization, interest coverage and other performance tests designed to protect more senior tranches. If a CLO fails to satisfy one or more of these tests, cash flows that otherwise would have been distributed to junior debt or equity tranches may be diverted to repay more senior tranches, acquire additional collateral or otherwise improve coverage levels. As a result, payments on a CLO tranche held by a Fund may be reduced, delayed or eliminated, and the value and liquidity of the Fund's investment may be adversely affected.

Settlement Risk. Purchases and sales of CLO securities may be subject to extended settlement periods. During the settlement period, a Fund may be exposed to market, counterparty and liquidity risks and may be unable to use cash committed to a transaction for other investment purposes. Delayed settlement may also affect a Fund's ability to meet redemption requests or cause the Fund to obtain liquidity from other sources.

Lower-Rated CLO Tranches. The Funds may invest in CLO debt tranches of various credit quality ratings, which may be subordinated to more senior CLO debt tranches and therefore subject to greater credit, liquidity, valuation and market risks. Lower-rated CLO tranches are generally more vulnerable to deterioration in collateral performance, increases in loan defaults, reductions in recoveries, ratings downgrades and failures of CLO coverage tests. In addition, lower-rated CLO tranches may experience greater price volatility, reduced liquidity and greater sensitivity to adverse economic and credit market conditions than higher-rated CLO tranches.

Loan Accumulation Facilities. The Funds invest in loan accumulation facilities, which are short to medium term facilities that will serve as the placement agent or arranger on a CLO transaction and which acquire loans on an interim basis that are expected to form part of such CLO. Investments in loan accumulation facilities may have risks similar to those applicable to investments in CLOs, including market, credit and leverage risks. In addition, if a planned CLO is not consummated, or the loans held in a loan accumulation facility are not eligible for purchase by the CLO, a Fund may be responsible for either holding or disposing of the loans. This could expose a Fund to credit and/or mark-to-market losses, and other risks.

Private Placements and Restricted Securities

The Funds may invest in private placement and restricted securities. Private placement securities are securities that have been privately placed and are not registered under the Securities Act. They are eligible for sale only to certain eligible investors. Private placements often may offer attractive opportunities for investment not otherwise available on the open market. Private placements typically may be sold only to qualified institutional buyers (or, in the case of the initial sale of certain securities, to accredited investors as defined in Rule 501(a) under the Securities Act), or in a privately negotiated transaction or to a limited number of purchasers, or in limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration.

Private placements and other restricted securities may only be sold in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act. Where registration is required, a Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time a Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, a Fund might obtain a less favorable price than that which prevailed when it decided to sell. Restricted securities issued pursuant to Rule 144A under the Securities Act that have a readily available market usually are not deemed illiquid for purposes of the limitation on investment in illiquid securities by a Fund discussed below under "Illiquid Securities." However, investing in Rule 144A securities could result in increasing the level of the Fund's illiquidity if qualified institutional buyers become, for a time, uninterested in purchasing these securities.

Investing in private placement and other restricted securities is subject to certain risks. Because there may be relatively few potential purchasers for such securities, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, a Fund could find it more difficult to sell such securities when it may be advisable to do so or it may be able to sell such securities only at prices lower than if such securities were more widely held. At times, it also may be more difficult to determine the fair value of such securities for purposes of computing a Fund's net asset value due to the absence of a trading market.

Each Fund intends to limit the purchase of private placements and other restricted securities, together with other securities considered to be illiquid, to not more than 15% of its net assets.

Structured Investments

The Funds may invest in structured investments. A structured investment is a security having a return tied to an underlying index or other security or asset class. Structured investments generally are individually negotiated agreements and may be traded OTC. Structured investments are organized and operated to restructure the investment characteristics of the underlying security. This restructuring involves the deposit with or purchase by an entity, such as a corporation or trust, on specified instruments (such as commercial bank loans) and the issuance by that entity or one or more classes of securities ("structured securities") backed by, or representing interests in, the underlying instruments. The cash flow on the underlying instruments may be apportioned among the newly issued structured securities to create securities with different investment characteristics, such as varying maturities, payment priorities and interest rate provisions, and the extent of such payments made with respect to structured securities is dependent on the extent of the cash flow on the underlying instruments. Because structured securities typically involve no

credit enhancement, their credit risk generally will be equivalent to that of the underlying instruments. Investments in structured securities are generally of a class of structured securities that is either subordinated or unsubordinated to the right of payment of another class. Subordinated structured securities typically have higher yields and present greater risks than unsubordinated structured securities. Structured securities are typically sold in private placement transactions, and there currently is no active trading market for structured securities. Investments in government and government-related and restructured debt instruments are subject to special risks, including the inability or unwillingness to repay principal and interest, requests to reschedule or restructure outstanding debt and requests to extend additional loan amounts.

Certain issuers of structured investments may be deemed to be "investment companies" as defined in the 1940 Act. As a result, a Fund's investment in these structured investments may be limited by the restrictions contained in the 1940 Act. Structured investments are typically sold in private placement transactions, and there currently is no active trading market for structured investments.

Strip Securities

The Funds may purchase separately traded interest and principal component parts of such obligations that are transferable through the Federal book entry system, known as Separately Traded Registered Interest and Principal Securities ("STRIPS") and Coupon Under Book Entry Safekeeping ("CUBES"). These instruments are issued by banks and brokerage firms and are created by depositing U.S. Treasury notes and U.S. Treasury bonds into a special account at a custodian bank; the custodian holds the interest and principal payments for the benefit of the registered owner of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. Receipts include Treasury Receipts ("TRs"), Treasury Investment Growth Receipts ("TIGRs") and Certificates of Accrual on Treasury Securities ("CATS").

STRIPS, CUBES, TRs, TIGRs and CATS are sold as zero coupon securities, which means that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. This discount is amortized over the life of the security, and such amortization will constitute the income earned on the security for both accounting and tax purposes. Because of these features, these securities may be subject to greater interest rate volatility than interest-paying U.S. Treasury obligations. Bonds issued by the Resolution Funding Corporation ("REFCORP") can also be stripped in this fashion. REFCORP Strips are eligible investments for the Fund.

Floating Rate and Inverse Floating Rate Securities

The Funds may invest in debt securities with interest payments or maturity values that are not fixed, but float in conjunction with (or inversely to) an underlying index or price. These securities may be backed by sovereign or corporate issuers, or by collateral such as mortgages. The indices and prices upon which such securities can be based include interest rates, currency rates and commodities prices. Floating rate securities pay interest according to a coupon which is reset periodically. The reset mechanism may be formula based, or reflect the passing through of floating interest payments on an underlying collateral pool. Inverse floating rate securities are similar to floating rate securities except that their coupon payments vary inversely with an underlying index by use of a formula. Inverse floating rate securities tend to exhibit greater price volatility than other floating rate securities. Interest rate risk and price volatility on inverse floating rate obligations can be high, especially if leverage is used in the formula.

When-Issued or Delayed-Delivery Securities

The Funds may purchase securities on a when-issued or delayed delivery basis. For example, delivery of and payment for these securities can take place a month or more after the date of the purchase commitment. The purchase price and the interest rate payable, if any, on the securities are fixed on the purchase commitment date or at the time the settlement date is fixed. The value of such securities is subject to market fluctuations and, in the case of fixed income securities, no interest accrues to a Fund until settlement takes place. When purchasing a security on a when-issued or delayed-delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. Accordingly, at the time a Fund makes the commitment to purchase securities on a when-issued or delayed delivery basis, it will record the transaction, reflect the value each day of such securities in determining its net asset value and, if applicable, calculate the maturity for the purposes of average maturity from that date. At the time of its acquisition, a when-issued security may be valued at less than the purchase price. The Funds will make

commitments for such when-issued transactions only when they have the intention of actually acquiring the securities. If, however, the Funds choose to dispose of the right to acquire a when-issued security prior to its acquisition, it could, as with the disposition of any other portfolio obligation, recognize taxable capital gain or loss due to market fluctuation. Also, the Funds may be disadvantaged if the other party to the transaction defaults. It is the current policy of the Palmer Square Ultra-Short Duration Investment Grade Fund not to enter into when-issued commitments exceeding in the aggregate 25% of the market value of the Fund's total assets, less liabilities other than the obligations created by when-issued commitments.

A transaction in when-issued or delayed-delivery securities would be deemed not to involve a senior security (i.e., it will not be considered a derivatives transaction or subject to asset segregation requirements), provided that (i) a Fund intends to physically settle the transaction, and (ii) the transaction will settle within 35 days of its trade date. If such a transaction were considered to be a derivatives transaction it would be subject to the requirements of the Derivatives Rule described in the "Derivatives" section of this SAI.

Loan Participations

The Funds may purchase participations in commercial loans. Such investments may be secured or unsecured. Loan participations typically represent direct participation, together with other parties, in a loan to a corporate borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Funds may participate in such syndications, or may buy part of a loan, becoming a part lender. When purchasing indebtedness and loan participations, a Fund assumes the credit risk associated with the corporate borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The indebtedness and loan participations in which a Fund intends to invest may not be rated by any NRSRO.

A loan is often administered by an agent bank acting as agent for all holders. The agent bank administers the terms of the loan, as specified in the loan agreement. In addition, the agent bank is normally responsible for the collection of principal and interest payments from the corporate borrower and the apportionment of these payments to the credit of all institutions which are parties to the loan agreement. Unless, under the terms of the loan or other indebtedness, a Fund has direct recourse against the corporate borrower, a Fund may have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies against a corporate borrower. Purchasers of loans and other forms of direct indebtedness depend primarily upon the creditworthiness of the corporate borrower for payment of principal and interest. If a Fund does not receive scheduled interest or principal payments on such indebtedness, the Fund's share price and yield could be adversely affected. Loans that are fully secured offer a Fund more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower's obligation, or that the collateral can be liquidated.

The Funds may invest in loan participations with credit quality comparable to that of issuers of their securities investments. Indebtedness of companies whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. Some companies may never pay off their indebtedness, or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, a Fund bears a substantial risk of losing the entire amount invested. A Fund may make investments in indebtedness and loan participations to achieve capital appreciation, rather than to seek income. A Fund generally will treat the corporate borrower as the "issuer" of indebtedness held by the Fund. In the case of loan participations where a bank or other lending institution serves as a financial intermediary between a Fund and the corporate borrower, if the participation does not shift to a Fund the direct debtor-creditor relationship with the corporate borrower, SEC interpretations require a Fund to treat both the lending bank or other lending institution and the corporate borrower as "issuers." Loans and other types of direct indebtedness may not be readily marketable and may be subject to restrictions on resale. Consequently, some indebtedness may be difficult or impossible to dispose of readily at what the Advisor believes to be a fair price. In addition, valuation of illiquid indebtedness involves a greater degree of judgment in determining the Fund's net asset value than if that value were based on available market quotations, and could result in significant variations in the Fund's daily share price. At the same time, some loan interests are traded among certain financial institutions and accordingly may be deemed liquid. As the market for different types of indebtedness develops, the liquidity of these instruments is expected to improve. In addition, a Fund currently intends to treat indebtedness for which there is no readily available market as illiquid for purposes of the Fund's limitation on illiquid investments. Investments in loan participations are considered to be debt obligations.

Delayed Funding Loans and Revolving Credit Facilities

The Funds may enter into, or acquire participations in, delayed funding loans and revolving credit facilities. Delayed funding loans and revolving credit facilities are borrowing arrangements in which the lender agrees to make loans up to a maximum amount upon demand by the borrower during a specified term. A revolving credit facility differs from a delayed funding loan in that as the borrower repays the loan, an amount equal to the repayment may be borrowed again during the term of the revolving credit facility. Delayed funding loans and revolving credit facilities usually provide for floating or variable rates of interest. These commitments may have the effect of requiring a Fund to increase its investment in a company at a time when it might not otherwise decide to do so (including at a time when the company's financial condition makes it unlikely that such amounts will be repaid). To the extent that a Fund is committed to advance additional funds, it will at all times segregate or "earmark" liquid assets, in an amount sufficient to meet such commitments.

The Funds may invest in delayed funding loans and revolving credit facilities with credit quality comparable to that of issuers of its securities investments. Delayed funding loans and revolving credit facilities may be subject to restrictions on transfer, and only limited opportunities may exist to resell such instruments. As a result, a Fund may be unable to sell such investments at an opportune time or may have to resell them at less than fair market value. A Fund currently intends to treat delayed funding loans and revolving credit facilities for which there is no readily available market as illiquid for purposes of the Fund's limitation on illiquid investments. For a further discussion of the risks involved in investing in loan participations and other forms of direct indebtedness see "Loan Participations" above. Delayed funding loans and revolving credit facilities are considered to be debt obligations for purposes of the Trust's investment restriction relating to the lending of funds or assets by the Fund.

Reference Rate and Benchmark Risk

A Fund may invest in securities and other financial instruments that pay interest based on SOFR or other benchmark or reference rates. Changes in the availability, liquidity, methodology, administration, interpretation or regulation of a reference rate may adversely affect the value, liquidity or return of a Fund's investments. Reference rates may not perform in the same manner as historical benchmark rates, including LIBOR, and may not accurately track broader market interest rates.

Differences among the reference rates applicable to a Fund's investments, financing arrangements, hedging transactions or other obligations may create basis risk and adversely affect investment performance. In addition, changes to benchmark methodologies, the implementation of substitute or successor reference rates, uncertainty concerning contractual fallback provisions or disputes regarding the interpretation of benchmark replacement provisions may adversely affect the amount, timing or valuation of payments associated with certain investments and may result in reduced market liquidity.

OTHER INVESTMENT STRATEGIES, POLICIES AND RISKS

Equity Securities

Preferred Stock

The Funds may invest in preferred stock. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and a share of the proceeds resulting from the issuer's liquidation, although preferred stock is usually subordinate to the debt securities of the issuer. Some preferred stocks also entitle their holders to receive additional liquidation proceeds on the same basis as the holders of the issuer's common stock. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. In addition, a Fund may receive stocks or warrants as a result of an exchange or tender of fixed income securities. Preference stock, which is more common in emerging markets than in developed markets, is a special type of common stock that shares in the earnings of an issuer, has limited voting rights, may have a dividend preference, and may also have a liquidation preference. Depending on the features of the particular security, holders of preferred and preference stock may bear the risks regarding common stock or fixed income securities.

Warrants and Rights

Each Fund may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle (but do not obligate) the holder to buy equity securities at a specific price for a specific period of time but will do so only if such equity securities are deemed appropriate by the Advisor. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing stockholders to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights do not have voting rights, do not earn dividends, and do not entitle the holder to any rights with respect to the assets of the company that has issued them. They do not represent ownership of the underlying companies but only the right to purchase shares of those companies at a specified price on or before a specified exercise date. Warrants and rights tend to be more volatile than the underlying stock, and if at a warrant's expiration date the stock is trading at a price below the price set in the warrant, the warrant will expire worthless. Conversely, if at the expiration date the stock is trading at a price higher than the price set in the warrant or right, a Fund can acquire the stock at a price below its market value. The prices of warrants and rights do not necessarily parallel the prices of the underlying securities. An investment in warrants or rights may be speculative.

Foreign Investments

The Funds may make foreign investments. Investments in the securities of foreign issuers and other non-U.S. investments may involve risks in addition to those normally associated with investments in the securities of U.S. issuers or other U.S. investments. All foreign investments are subject to risks of foreign political and economic instability, adverse movements in foreign exchange rates, and the imposition or tightening of exchange controls and limitations on the repatriation of foreign capital. Other risks stem from potential changes in governmental attitude or policy toward private investment, which in turn raises the risk of nationalization, increased taxation or confiscation of foreign investors' assets. Additionally, the imposition of sanctions, trade restrictions (including tariffs) and other government restrictions by the United States and/or other governments may adversely affect the values of a Fund's foreign investments.

The financial problems in global economies over the past several years, including the European sovereign debt crisis, may continue to cause high volatility in global financial markets. In addition, global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may also be affected if one or more countries leave the Euro currency or by other policy changes made by governments or quasi-governmental organizations.

Additional non-U.S. taxes and expenses may also adversely affect a Fund's performance, including foreign withholding taxes on foreign securities' dividends. Brokerage commissions and other transaction costs on foreign securities exchanges are generally higher than in the United States. Foreign companies may be subject to different

accounting, auditing and financial reporting standards. To the extent foreign securities held by a Fund are not registered with the SEC or with any other U.S. regulator, the issuers thereof will not be subject to the reporting requirements of the SEC or any other U.S. regulator. Accordingly, less information may be available about foreign companies and other investments than is generally available on issuers of comparable securities and other investments in the United States. Foreign securities and other investments may also trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities and other investments.

Changes in foreign exchange rates will affect the value in U.S. dollars of any foreign currency-denominated securities and other investments held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from any foreign securities and other investments will be received and realized in foreign currencies, and a Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar occurring after a Fund's income has been earned and computed in U.S. dollars may require a Fund to liquidate portfolio securities or other investments to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time a Fund incurs expenses in U.S. dollars and the time such expenses are paid, a Fund may be required to liquidate additional portfolio securities or other investments to purchase the U.S. dollars required to meet such expenses.

The Funds may purchase foreign bank obligations. In addition to the risks described above that are generally applicable to foreign investments, the investments that the Funds make in obligations of foreign banks, branches or subsidiaries may involve further risks, including differences between foreign banks and U.S. banks in applicable accounting, auditing and financial reporting standards, and the possible establishment of exchange controls or other foreign government laws or restrictions applicable to the payment of certificates of deposit or time deposits that may affect adversely the payment of principal and interest on the securities and other investments held by the Funds.

Depositary Receipts. The Funds may invest in depositary receipts. American Depositary Receipts ("ADRs") are negotiable receipts issued by a U.S. bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company's office or agent in a foreign country. Investing in ADRs presents risks that may not be equal to the risk inherent in holding the equivalent shares of the same companies that are traded in the local markets even though a Fund will purchase, sell and be paid dividends on ADRs in U.S. dollars. These risks include fluctuations in currency exchange rates, which are affected by international balances of payments and other economic and financial conditions; government intervention; speculation; and other factors. With respect to certain foreign countries, there is the possibility of expropriation or nationalization of assets, confiscatory taxation, political and social upheaval, and economic instability. A Fund may be required to pay foreign withholding or other taxes on certain ADRs that it owns, but investors may or may not be able to deduct their pro rata share of such taxes in computing their taxable income, or take such shares as a credit against their U.S. federal income tax. See "Federal Income Tax Matters." ADRs may be sponsored by foreign issuers or may be unsponsored. Unsponsored ADRs are organized independently and without the cooperation of the foreign issuer of the underlying securities. While readily exchangeable with stock in local markets, unsponsored ADRs may be less liquid than sponsored ADRs. Additionally, there generally is less publicly available information with respect to unsponsored ADRs.

Emerging Markets. The Funds may invest in companies organized or doing substantial business in emerging market countries or developing countries as defined by the World Bank, International Financial Corporation, or the Morgan Stanley Capital International (MSCI) emerging market indices or other comparable indices. Investing in emerging markets involves additional risks and special considerations not typically associated with investing in other more established economies or markets. Such risks may include (i) increased risk of nationalization or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty, including war; (iii) higher dependence on exports and the corresponding importance of international trade; (iv) greater volatility, less liquidity and smaller capitalization of markets; (v) greater volatility in currency exchange rates; (vi) greater risk of inflation; (vii) greater controls on foreign investment and limitations on realization of investments, repatriation of invested capital and on the ability to exchange local currencies for U.S. dollars; (viii) increased likelihood of governmental involvement in and control over the economy; (ix) governmental decisions to cease support of economic reform programs or to impose centrally planned economies; (x) differences in regulatory, accounting, auditing, and financial reporting and recordkeeping standards, which may result in the unavailability of material information about issuers; (xi) less extensive regulation of the markets; (xii) longer settlement periods for transactions and less reliable clearance

and custody arrangements; (xiii) less developed corporate laws regarding fiduciary duties of officers and directors and the protection of investors; (xiv) certain considerations regarding the maintenance of a Fund's securities with local brokers and securities depositories and (xv) the imposition of withholding or other taxes on dividends, interest, capital gains, other income or gross sale or disposition proceeds.

Repatriation of investment income, assets and the proceeds of sales by foreign investors may require governmental registration and/or approval in some emerging market countries. The Funds could be adversely affected by delays in or a refusal to grant any required governmental registration or approval for such repatriation, or by withholding taxes imposed by emerging market countries on interest or dividends paid on securities held by the Funds or gains from the disposition of such securities.

In emerging markets, there is often less government supervision and regulation of business and industry practices, stock exchanges, over-the-counter markets, brokers, dealers, counterparties and issuers than in other more established markets. The Public Company Accounting Oversight Board ("PCAOB"), which regulates auditors of U.S. public companies, for example, is unable to inspect audit work and practices in certain countries. If the PCAOB is unable to oversee the operations of accounting firms in such countries, inaccurate or incomplete financial records of an issuer's operations may not be detected, which could negatively impact a Fund's investments in such company. Any regulatory supervision that is in place may be subject to manipulation or control. Some emerging market countries do not have mature legal systems comparable to those of more developed countries. Moreover, the process of legal and regulatory reform may not be proceeding at the same pace as market developments, which could result in investment risk. Legislation to safeguard the rights of private ownership may not yet be in place in certain areas, and there may be the risk of conflict among local, regional and national requirements. In certain cases, the laws and regulations governing investments in securities may not exist or may be subject to inconsistent or arbitrary application or interpretation. Both the independence of judicial systems and their immunity from economic, political or nationalistic influences remain largely untested in many countries. It may also be difficult or impossible for a Fund to pursue legal remedies or to obtain and enforce judgments in local courts.

Many Chinese companies have created variable interest entities ("VIEs") as a means to circumvent limits on foreign ownership of equity in Chinese companies. Investments in companies that use a VIE structure may pose additional risks because the investment is made through an intermediary entity that exerts control of the underlying operating business through contractual means rather than equity ownership and, as a result, may limit the rights of an investor. Although VIEs are a longstanding industry practice and well known to officials and regulators in China, VIE structures are not formally recognized under Chinese law. Investors face uncertainty about future actions by the government of China that could significantly affect an operating company's financial performance and the enforceability of the VIE's contractual arrangements. It is uncertain whether Chinese officials or regulators will withdraw their implicit acceptance of the VIE structure, or whether any new laws, rules, or regulations relating to VIE structures will be adopted or, if adopted, what impact they would have on the interests of foreign shareholders. Under extreme circumstances, China might prohibit the existence of VIEs, or sever their ability to transmit economic and governance rights to foreign individuals and entities; if so, the market value of the Funds' associated portfolio holdings would likely suffer significant, detrimental, and possibly permanent effects, which could result in substantial investment losses.

There may also be restrictions on imports from certain countries, such as Russia, and dealings with certain state-sponsored entities. For example, following Russia's large-scale invasion of Ukraine, the President of the United States signed an Executive Order in February 2022 prohibiting U.S. persons from entering transactions with the Central Bank of Russia and Executive Orders in March 2022 prohibiting U.S. persons from importing oil and gas from Russia as well as other popular Russian exports, such as diamonds, seafood and vodka. There may also be restrictions on investments in Chinese companies. For example, the President of the United States of America signed an Executive Order in June 2021 affirming and expanding the U.S. policy prohibiting U.S. persons from purchasing or investing in publicly-traded securities of companies identified by the U.S. government as "Chinese Military-Industrial Complex Companies." The list of such companies can change from time to time, and as a result of forced selling or an inability to participate in an investment the Advisor otherwise believes is attractive, a Fund may incur losses.

Foreign Currency Transactions. The Funds may conduct foreign currency transactions on a spot, i.e., cash basis at the prevailing rate in the foreign exchange market or by entering into a forward foreign currency contract. A forward foreign currency contract ("forward contract") involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date

of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are considered to be derivatives. A Fund enters into forward contracts in order to "lock in" the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, a Fund may enter into forward contracts to hedge against risks arising from securities a Fund owns or anticipates purchasing or the U.S. dollar value of interest and dividends paid on those securities.

If a Fund delivers the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency by selling some of the Fund's assets that are denominated in that specific currency. A Fund may close out a forward contract obligating it to purchase a foreign currency by selling an offsetting contract, in which case it will realize a gain or a loss.

Foreign currency transactions involve certain costs and risks. The Funds incur foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Advisor is inaccurate in predicting currency movements. The projection of short-term currency market movements is extremely difficult, and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Funds to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Funds are obligated to deliver under the forward contract and the decision is made to sell the security and deliver the foreign currency. The use of forward contracts as a hedging technique does not eliminate the fluctuation in the prices of the underlying securities a Fund owns or intends to acquire, but it fixes a rate of exchange in advance. Although forward contracts can reduce the risk of loss if the values of the hedged currencies decline, these instruments also limit the potential gain that might result from an increase in the value of the hedged currencies.

There is no systematic reporting of last sale information for foreign currencies, and there is no regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis. Quotation information available is generally representative of very large transactions in the interbank market. The interbank market in foreign currencies is a global around-the-clock market. Since foreign currency transactions occurring in the interbank market involve substantially larger amounts than those that may be involved in the use of foreign currency options, the Funds may be disadvantaged by having to deal in an odd lot market (generally consisting of transactions of less than $1 million) for the underlying foreign currencies at prices that are less favorable than for round lots.

Short Sales

A Fund may seek to hedge investments or realize additional gains through the use of short sales. A short sale is a transaction in which a Fund sells a security it does not own in anticipation that the market price of that security will decline. If the price of the security sold short increases between the time of the short sale and the time a Fund replaces the borrowed security, a Fund will incur a loss; conversely, if the price declines, a Fund will realize a capital gain. Any gain will be decreased, and any loss will be increased, by the transaction costs incurred by the Fund, including the costs associated with providing collateral to the broker-dealer (usually cash and liquid securities) and the maintenance of collateral with its custodian. A Fund also may be required to pay a premium to borrow a security, which would increase the cost of the security sold short. Although a Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

The broker-dealer will retain the net proceeds of the short sale to the extent necessary to meet margin requirements until the short position is closed out.

When the Advisor believes that the price of a particular security held by a Fund may decline, it may make "short sales against the box" to hedge the unrealized gain on such security. Selling short against the box involves selling a security which a Fund owns for delivery at a specified date in the future. A Fund will incur transaction costs to open, maintain and close short sales against the box.

Investment Company Shares

A Fund may invest in shares of other investment companies (each, an "Underlying Fund"), including open-end funds, closed-end funds, unit investment trusts ("UITs") and ETFs, as well as foreign investment companies, to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI. Each Fund's investment in

other investment companies may include investments in other funds managed by the Advisor. The Advisor will waive its management fees with respect to the portion of the applicable Fund's assets invested in other funds managed by the Advisor.

Under Section 12(d)(1)(A) of the 1940 Act, a Fund may acquire shares of an Underlying Fund in amounts which, as determined immediately after the acquisition is made, do not exceed (i) 3% of the total outstanding voting stock of such Underlying Fund, (ii) 5% of the value of the Fund's total assets, and (iii) 10% of the value of the Fund's total assets when combined with all other Underlying Fund shares held by the Fund. A Fund may exceed these statutory limits when permitted by SEC order or other applicable law or regulatory guidance, such as is the case with many ETFs. Rule 12d1-4 under the 1940 Act, which permits a Fund to invest in other investment companies beyond the statutory limits, is subject to certain conditions. Rule 12d1-4, among other things, (1) applies to both "acquired funds" and "acquiring funds," each as defined under the rule; (2) includes limits on control and voting of acquired funds' shares; (3) requires that the investment advisers of acquired funds and acquiring funds relying on the rule make certain specified findings based on their evaluation of the relevant fund of funds structure; (4) requires acquired funds and acquiring funds that are relying on the rule, and which do not have the same investment adviser, to enter into fund of funds investment agreements, which must include specific terms; and (5) includes certain limits on complex fund of funds structures.

Generally, under Sections 12(d)(1)(F) and 12(d)(1)(G) of the 1940 Act and SEC rules adopted pursuant to the 1940 Act, a Fund may acquire the shares of affiliated and unaffiliated Underlying Funds subject to the following guidelines and restrictions:

- A Fund may own an unlimited amount of the shares of any registered open-end fund or registered unit investment trust that is affiliated with the Fund, so long as any such Underlying Fund has a policy that prohibits it from acquiring any shares of registered open-end funds or registered UITs in reliance on certain sections of the 1940 Act.
- A Fund and its "affiliated persons" may own up to 3% of the outstanding stock of any fund, subject to the following restrictions:
    i. a Fund and each Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to funds of funds;
    ii. each Underlying Fund is not obligated to redeem more than 1% of its total outstanding shares during any period less than 30 days; and
    iii. a Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or (ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.

Underlying Funds typically incur fees that are separate from those fees incurred directly by the Fund. A Fund's purchase of such investment company shares results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. In addition, the shares of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The net asset value and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of the Fund.

Under certain circumstances an open-end investment company in which a Fund invests may determine to make payment of a redemption by the Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, a Fund may hold such securities until the Advisor determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund.

Investment decisions by the investment advisers to the registered investment companies in which a Fund invests are made independently of the Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances a Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Closed-End Funds

The Funds may invest in shares of closed-end funds. Investments in closed-end funds are subject to various risks, including reliance on management's ability to meet the closed-end fund's investment objective and to manage the closed-end fund portfolio; fluctuation in the net asset value of closed-end fund shares compared to the changes in the value of the underlying securities that the closed-end fund owns; and bearing a pro rata share of the management fees and expenses of each underlying closed-end fund resulting in a Fund's shareholders being subject to higher expenses than if he or she invested directly in the closed-end fund(s).

Exchange-Traded Funds

The Funds may invest in ETFs. ETFs are pooled investment vehicles that may be actively managed or may seek to track the performance of specific indices. ETFs may be organized as open-end funds or as unit investment trusts. Their shares are listed on stock exchanges and can be traded throughout the day at market-determined prices.

An ETF generally issues shares in large aggregations known as "Creation Units" in exchange for a "Portfolio Deposit" consisting of (a) a portfolio of securities designated by the ETF, (b) a cash payment equal to a pro rata portion of the dividends accrued on the ETF's portfolio securities since the last dividend payment by the ETF, net of expenses and liabilities, and (c) a cash payment or credit designed to equalize the net asset value of the shares and the net asset value of a Portfolio Deposit.

Shares of ETFs are not individually redeemable, except upon the reorganization, merger, conversion or liquidation of the ETF. To redeem shares of an ETF, an investor must accumulate enough shares of the ETF to reconstitute a Creation Unit. The liquidity of small holdings of ETF shares, therefore, will depend upon the existence of a secondary market for such shares. Upon redemption of a Creation Unit, the investor will receive securities designated by the ETF ("Redemption Securities") and a cash payment in an amount equal to the difference between the net asset value of the shares being redeemed and the net asset value of the Redemption Securities.

The price of ETF shares is based upon (but not necessarily identical to) the value of the securities held by the ETF. Accordingly, the level of risk involved in the purchase or sale of ETF shares is similar to the risk involved in the purchase or sale of traditional common stock, with the exception that the pricing mechanism for ETF shares is based on a basket of stocks. Disruptions in the markets for the securities underlying ETF shares purchased or sold by a Fund could result in losses on such shares. There is no assurance that the requirements of the national securities exchanges necessary to maintain the listing of shares of any ETF will continue to be met.

Exchange-Traded Notes ("ETNs")

The Funds may invest in ETNs. An investment in an ETN involves risks, including possible loss of principal. ETNs are unsecured debt securities issued by a bank that are linked to the total return of a market index. Risks of investing in ETNs also include limited portfolio diversification, uncertain principal payment, and illiquidity. Additionally, the investor fee will reduce the amount of return on maturity or at redemption, and as a result the investor may receive less than the principal amount at maturity or upon redemption, even if the value of the relevant index has increased. An investment in an ETN may not be suitable for all investors.

Other Pooled Investment Vehicles

Each Fund may invest in pooled investment vehicles, including limited partnerships. To the extent that a Fund invests in pooled investment vehicles, such investments may be deemed illiquid. In addition, each Fund will bear its ratable share of such vehicles' expenses, including its management expenses and performance fees. Performance fees are fees paid to the vehicle's manager based on the vehicle's investment performance (or returns) as compared to some benchmark. The fees a Fund pays to invest in a pooled investment vehicle may be higher than the fees it would pay if the manager of the pooled investment vehicle managed the Fund's assets directly. Further, the performance fees payable to the manager of a pooled investment vehicle may create an incentive for the manager to make investments that are riskier or more speculative than those it might make in the absence of an incentive fee.

Indexed Securities

The Funds may purchase securities whose prices are indexed to the prices of other securities, securities indices, currencies, precious metals or other commodities, or other financial indicators. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic. Gold-indexed securities, for example, typically provide for a maturity value that depends on the price of gold, resulting in a security whose price tends to rise and fall together with gold prices. Currency-indexed securities typically are short-term to intermediate-term debt securities whose maturity values or interest rates are determined by reference to the values of one or more specified foreign currencies, and may offer higher yields than U.S. dollar-denominated securities of equivalent issuers. Currency-indexed securities may be positively or negatively indexed; that is, their maturity value may increase when the specified currency value increases, resulting in a security that performs similarly to a foreign-denominated instrument, or their maturity value may decline when foreign currencies increase, resulting in a security whose price characteristics are similar to a put on the underlying currency. Currency-indexed securities may also have prices that depend on the value of a number of different foreign currencies relative to each other.

The performance of indexed securities depends to a great extent on the performance of the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the United States and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Recent issuers of indexed securities have included banks, corporations, and certain U.S. government agencies. Indexed securities may be more volatile than the underlying instruments.

Commodity Contracts

The Funds may purchase and sell commodity futures contracts and options; may enter into foreign exchange contracts; may enter into swaps and other financial transactions not requiring the delivery of physical commodities; and may purchase or sell physical commodity contracts or options on such contracts in compliance with applicable commodities laws. Investing in commodities in this manner carries risks. The Funds may also invest in instruments related to commodities, including structured notes, securities of commodities finance and operating companies. A Fund's exposure to the commodities markets may subject a Fund to greater volatility than investments in traditional securities. The value of commodity-linked instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, and other risks affecting a particular industry or commodity. A Fund will only invest in commodities transactions that the Advisor believes can be readily liquidated.

There are additional factors associated with commodity futures contracts which may subject a Fund's investments in them to greater volatility than investments in traditional securities. In the commodity futures markets there are often costs of physical storage associated with purchasing the underlying commodity. The price of the commodity futures contract will reflect the storage costs of purchasing the physical commodity, including the time value of money invested in the physical commodity. To the extent that the storage costs for an underlying commodity change while a Fund is invested in futures contracts on that commodity, the value of the futures contract may change proportionately. In the commodity futures markets, producers of the underlying commodity may decide to hedge the price risk of selling the commodity by selling futures contracts today to lock in the price of the commodity at delivery tomorrow. In order to induce speculators to purchase the other side of the same futures contract, the commodity producer generally must sell the futures contract at a lower price than the expected future spot price of the commodity. Conversely, if most hedgers in the futures market are purchasing futures contracts to hedge against a rise in prices, then speculators will only sell the other side of the futures contract at a higher futures price than the expected future spot price of the commodity. The changing nature of the hedgers and speculators in the commodities markets will influence whether futures prices are above or below the expected future spot price, which can have significant implications for a Fund. If the nature of hedgers and speculators in futures markets has shifted when it is time for a Fund to reinvest the proceeds of a maturing futures contract in a new futures contract, a Fund might reinvest at higher or lower futures prices, or choose to pursue other investments. The commodities which underlie commodity futures contracts may be subject to additional economic and non-economic variables, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. These factors may have a larger impact on commodity prices and commodity-linked instruments, including futures contracts, than on traditional securities.

Certain commodities are also subject to limited pricing flexibility because of supply and demand factors. Others are subject to broad price fluctuations as a result of the volatility of the prices for certain raw materials and the instability of the supplies of other materials.

Short-Term Investments

The Funds may invest in any of the following securities and instruments.

Certificates of Deposit, Bankers' Acceptances and Time Deposits. A Fund may acquire certificates of deposit, bankers' acceptances and time deposits in U.S. dollar or foreign currencies. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank or savings and loan association for a definite period of time that earn a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate. A Fund may only acquire certificates of deposit, bankers' acceptances, and time deposits issued by commercial banks or savings and loan associations that, at the time of the Fund's investment, have capital, surplus and undivided profits in excess of $100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than $100 million if the principal amount of such obligations are fully insured by the U.S. government. If a Fund holds instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred if the Fund invests only in debt obligations of U.S. domestic issuers. See "Foreign Investments" above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located, the possible confiscation or nationalization of foreign deposits, the possible establishment of exchange controls, or the adoption of other foreign governmental restrictions which may adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds and the interest income generated from lending operations. General economic conditions and the quality of loan portfolios affect the banking industry.

As a result of federal and state laws and regulations, domestic banks are required to maintain specified levels of reserves, are limited in the amount that they can loan to a single borrower, and are subject to regulations designed to promote financial soundness. However, such laws and regulations may not necessarily apply to foreign banks, thereby affecting the risk involved in bank obligations that a Fund may acquire.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. Each Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

A Fund's investment in commercial paper and short-term notes will consist of issues rated at the time of purchase "A-3" or higher by S&P, "Prime-3" or higher by Moody's, or similarly rated by another NRSRO or, if unrated, will be determined by the Advisor to be of comparable quality. Commercial paper ratings are assigned by nationally recognized statistical rating organizations and generally reflect the rating agency's assessment of an issuer's ability to meet its short-term obligations.

Repurchase Agreements

The Funds may enter into repurchase agreements with respect to their portfolio securities. Pursuant to such agreements, a Fund acquires securities from financial institutions such as banks and broker-dealers deemed to be creditworthy by the Advisor, subject to the seller's agreement to repurchase and a Fund's agreement to resell such securities at a mutually agreed upon date and price. The repurchase price generally equals the price paid by a Fund plus interest negotiated on the basis of current short-term rates (which may be more or less than the rate on the underlying portfolio security). Securities subject to repurchase agreements will be held by the custodian or in the Federal Reserve/Treasury Book-Entry System or an equivalent foreign system. The seller under a repurchase agreement will be required to maintain the value of the underlying securities at not less than 102% of the repurchase price under the agreement. If the seller defaults on its repurchase obligation, a Fund will suffer a loss to the extent that the

proceeds from a sale of the underlying securities are less than the repurchase price under the agreement. Bankruptcy or insolvency of such a defaulting seller may cause a Fund's rights with respect to such securities to be delayed or limited. Repurchase agreements are considered to be loans under the 1940 Act.

Reverse Repurchase Agreements

The Funds may enter into "reverse" repurchase agreements to avoid selling securities during unfavorable market conditions to meet redemptions. Pursuant to a reverse repurchase agreement, a Fund will sell portfolio securities and agree to repurchase them from the buyer at a particular date and price. Whenever a Fund enters into a reverse repurchase agreement, it will either (i) consistent with Section 18 of the 1940 Act, maintain asset coverage of at least 300% of the value of the repurchase agreement or (ii) treat the reverse repurchase agreement as a derivatives transaction for purposes of Rule 18f-4, including, as applicable, the VaR based limit on leverage risk. A Fund pays interest on amounts obtained pursuant to reverse repurchase agreements. Reverse repurchase agreements are considered to be borrowings by a Fund.

Borrowing

The Funds may engage in limited borrowing activities. Borrowing creates an opportunity for increased return, but, at the same time, creates special risks. Furthermore, if a Fund were to engage in borrowing, an increase in interest rates could reduce the value of the Fund's shares by increasing the Fund's interest expense. Subject to the limitations described under "Investment Limitations" below, a Fund may be permitted to borrow for temporary purposes and/or for investment purposes. Such a practice will result in leveraging of a Fund's assets and may cause a Fund to liquidate portfolio positions when it would not be advantageous to do so. This borrowing may be secured or unsecured. Provisions of the 1940 Act require a Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the Fund's total assets made for temporary purposes. Any borrowings for temporary purposes in excess of 5% of the Fund's total assets will count against this asset coverage requirement. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, a Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint if a Fund sells securities at that time. Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of a Fund's portfolio. Money borrowed will be subject to interest charges which may or may not be recovered by appreciation of the securities purchased, if any. A Fund also may be required to maintain minimum average balances in connection with such borrowings or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

Illiquid Securities

Each Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities are securities that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities. Illiquid securities may be difficult to value, and a Fund may have difficulty or be unable to dispose of such securities promptly or at reasonable prices.

Rule 22e-4 under the 1940 Act requires, among other things, that each Fund establish a liquidity risk management program ("LRMP") that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines "liquidity risk" as the risk that a fund could not meet requests to redeem shares issued by a Fund without significant dilution of the remaining investors' interests in the fund. Each Fund has implemented a LRMP to meet the relevant requirements. Additionally, the Board, including a majority of the Independent Trustees, approved the designation of the Advisor as each Fund's LRMP administrator to administer such program, and will review no less frequently than annually a written report prepared by the Advisor that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a "highly liquid investment," "moderately liquid investment," "less liquid investment" or "illiquid investment." The liquidity risk classifications of a Fund's investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that a Fund investment is deemed to be an "illiquid investment" or a "less liquid investment," a Fund can expect to be exposed to greater liquidity risk. There is no guarantee the LRMP will be effective in its operations, and complying with Rule 22e-4, including bearing related costs, could impact a Fund's performance and its ability to seek its investment objectives.

A Fund will not purchase illiquid securities if, as a result of the purchase, more than 15% of the Fund's net assets are invested in such securities. If at any time the Advisor determines that the value of illiquid securities held by a Fund exceeds 15% of the Fund's net assets, the Advisor will take such steps as it considers appropriate to reduce the percentage as soon as reasonably practicable.

Lending Portfolio Securities

Consistent with applicable regulatory requirements and a Fund's investment restrictions, a Fund may lend portfolio securities to securities broker-dealers or financial institutions, provided that such loans are callable at any time by a Fund (subject to notice provisions described below), and are at all times secured by cash or cash equivalents, which are maintained in a segregated account pursuant to applicable regulations and that are at least equal to the market value, determined daily, of the loaned securities. The advantage of such loans is that a Fund continues to receive the income on the loaned securities while at the same time earns interest on the cash amounts deposited as collateral, which will be invested in short-term obligations. Each Fund will not lend portfolio securities if such loans are not permitted by the laws or regulations of any state in which its shares are qualified for sale. A Fund's loans of portfolio securities will be collateralized in accordance with applicable regulatory requirements and no loan will cause the value of all loaned securities to exceed 331/3% of the value of a Fund's net assets.

A loan may generally be terminated by the borrower on one business day's notice, or by a Fund on five business days' notice. If the borrower fails to deliver the loaned securities within five days after receipt of notice or fails to maintain the requisite amount of collateral, a Fund could use the collateral to replace the securities while holding the borrower liable for any excess of replacement cost over collateral. As with any extensions of credit, there are risks of delay in recovery and in some cases even loss of rights in the collateral should the borrower of the securities fail financially. However, these loans of portfolio securities will only be made to firms deemed by a Fund's management to be creditworthy and when the income that can be earned from such loans justifies the attendant risks. Upon termination of the loan, the borrower is required to return the securities to the Fund. Any gain or loss in the market price during the loan period would inure to the Fund. The risks associated with loans of portfolio securities are substantially similar to those associated with repurchase agreements. Thus, if the counterparty to the loan petitions for bankruptcy or becomes subject to the U.S. Bankruptcy Code, the law regarding the rights of a Fund is unsettled. As a result, under extreme circumstances, there may be a restriction on a Fund's ability to sell the collateral, and a Fund would suffer a loss. When voting or consent rights that accompany loaned securities pass to the borrower, a Fund will follow the policy of calling the loaned securities, to be delivered within one day after notice, to permit the exercise of such rights if the matters involved would have a material effect on the Fund's investment in such loaned securities. A Fund will pay reasonable finder's, administrative and custodial fees in connection with a loan of its securities.

Developments in the China Region

After nearly 30 years of unprecedented growth, the People's Republic of China now faces a slowing economy. The real estate market, which many observers believed to be inflated, has begun to decline. Local governments, which had borrowed heavily to bolster growth, face high debt burdens and limited revenue sources. As a result, demand for Chinese exports by the United States and countries in Europe, and demands for Chinese imports from such countries, may weaken due to the effects of more limited economic growth. Additionally, Chinese actions to lay claim to disputed islands have caused relations with China's regional trading partners to suffer, and could cause further disruption to regional and international trade. From time to time, China has experienced outbreaks of infectious illnesses, and the country may be subject to other public health threats, infectious illnesses, diseases or similar issues in the future. Any spread of an infectious illness, public health threat or similar issue could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, and generally have a significant impact on the Chinese economy. In the long run, China's ability to develop and sustain a credible legal, regulatory, monetary, and socioeconomic system could influence the course of outside investment.

European and Geopolitical Developments

Economic, political, regulatory and social developments in Europe and other regions of the world may adversely affect financial markets, issuers, economies and currencies. Ongoing armed conflicts, geopolitical tensions, sanctions, trade disputes, tariffs, cyberattacks, terrorism, disruptions to energy and commodity markets, changes in governmental policies and other significant developments may adversely affect market liquidity, investor confidence, economic

growth and asset valuations. Political and economic conditions in Europe continue to evolve, including changes in relationships among European countries, the United Kingdom, the European Union and other trading partners, and may result in increased market volatility, currency fluctuations, business disruptions or regulatory uncertainty.

The effects of such developments may be difficult to predict and may be widespread. Market reactions to actual or anticipated policy changes, sanctions, military conflicts, trade restrictions, regulatory developments or other geopolitical events may adversely affect the value, liquidity and performance of a Fund's investments. These events may have a greater impact on issuers, industries or regions that have significant economic, financial or trading relationships with affected countries or regions.

Operational Risk

An investment in a Fund can involve operational risks arising from factors such as processing errors, human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third party service providers. Among other things, these errors or failures, as well as other technological issues, may adversely affect the Fund's ability to calculate its net asset value in a timely manner, including over a potentially extended period of time. These errors or failures may also result in a loss or compromise of information, regulatory scrutiny, reputational damage or other events, any of which could have a material adverse effect on the Fund. While the Fund seeks to minimize such events through internal controls and oversight of third party service providers, there is no guarantee that the Fund will not suffer losses if such events occur.

Artificial Intelligence ("AI") Risk

The rapid development and increasingly widespread use of certain artificial intelligence technologies, including machine learning models and generative artificial intelligence (collectively "AI Technologies"), may adversely impact markets, the overall performance of a Fund's investments, or the services provided to the Fund by its service providers. For example, issuers in which the Fund invests and/or service providers to the Fund (including, without limitation, the Fund's investment adviser, fund accountant, custodian, or transfer agent) may use and/or expand the use of AI Technologies in their business operations, and the challenges with properly managing its use could result in reputational harm, competitive harm, legal liability, and/or an adverse effect on business operations. AI Technologies are highly reliant on the collection and analysis of large amounts of data and complex algorithms, and it is possible that the information provided through use of AI Technologies could be insufficient, incomplete, inaccurate or biased, leading to adverse effects for the Fund, including, potentially, operational errors and investment losses.

Additionally, the use of AI Technologies could impact the market as a whole, including by way of use by malicious actors for market manipulation, fraud and cyberattacks, and may face regulatory scrutiny in the future, which could limit the development of this technology and impede the growth of companies that develop and use AI. To the extent the Fund invests in or has investment exposure to companies that are involved in various aspects of AI Technologies, it is particularly sensitive to the risks of those types of companies. These risks include, but are not limited to, small or limited markets for such securities, changes in business cycles, world economic growth, technological progress, rapid obsolescence, and government regulation. Such companies may have limited product lines, markets, financial resources or personnel. Securities of such companies, especially smaller, start-up companies, tend to be more volatile than securities of companies that do not rely heavily on technology. Rapid change to technologies that affect a company's products could have a material adverse effect on such company's operating results. Companies that are extensively involved in AI Technologies also may rely heavily on a combination of patents, copyrights, trademarks and trade secret laws to establish and protect their proprietary rights in their products and technologies. There can be no assurance that the steps taken by these companies to protect their proprietary rights will be adequate to prevent the misappropriation of their technology or that competitors will not independently develop technologies that are substantially equivalent or superior to such companies' technology. Such companies may engage in significant amounts of spending on research and development, and there is no guarantee that the products or services produced by these companies will be successful. Actual usage of AI Technologies by the Fund's service providers and issuers in which the Fund invests will vary. AI Technologies and their current and potential future applications, and the regulatory frameworks within which they operate, continue to rapidly evolve, and it is impossible to predict the full extent of future applications or regulations and the associated risks to the Fund.

Cybersecurity Risk

Investment companies, such as the Funds, and their service providers may be subject to operational and information security risks resulting from cyberattacks. Cyberattacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cybersecurity breaches. Cyberattacks affecting the Funds or the Advisor, the Funds' custodian or transfer agent, or intermediaries or other third-party service providers may adversely impact the Fund. For instance, cyberattacks may interfere with the processing of shareholder transactions, impact a Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject a Fund to regulatory fines or financial losses, and cause reputational damage. A Fund may also incur additional costs for cybersecurity risk management purposes. While the Funds and their service providers have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, such plans and systems have inherent limitations due in part to the ever-changing nature of technology and cybersecurity attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, the Funds cannot control any cybersecurity plans or systems implemented by its service providers.

Similar types of cybersecurity risks are also present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause a Fund's investment in such portfolio companies to lose value. The rapid development and increasingly widespread use of AI could increase the effectiveness of cyberattacks and exacerbate the risks.

Temporary Investments

The Funds may take temporary defensive measures that are inconsistent with a Fund's normal fundamental or non-fundamental investment policies and strategies in response to adverse market, economic, political, or other conditions as determined by the Advisor. Such measures could include, but are not limited to, investments in (1) highly liquid short-term fixed income securities issued by or on behalf of municipal or corporate issuers, obligations of the U.S. government and its agencies, commercial paper, and bank certificates of deposit; (2) repurchase agreements involving any such securities; and (3) other money market instruments. A Fund also may invest in shares of money market mutual funds to the extent permitted under applicable law. Money market mutual funds are investment companies, and the investments in those companies by a Fund are in some cases subject to certain fundamental investment restrictions. As a shareholder in a mutual fund, a Fund will bear its ratable share of its expenses, including management fees, and will remain subject to payment of the fees to the Advisor, with respect to assets so invested. A Fund may not achieve its investment objectives during temporary defensive periods.

INVESTMENT RESTRICTIONS

Each Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a majority of the outstanding voting securities of the Fund, as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" of a Fund means the vote of the holders of the lesser of (i) 67% of the shares of a Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. Each Fund's investment objectives are non-fundamental policies and may be changed without shareholder approval.

Each Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) a Fund may borrow from banks in amounts not exceeding one-third of its net assets (including the amount borrowed); and (ii) this restriction shall not prohibit a Fund from engaging in options transactions or short sales or investing in financial futures, swaps, when-issued or delayed delivery securities, or reverse repurchase agreements.

2. Act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;

3. Invest 25% or more of its total assets, calculated at the time of purchase, in any one industry (other than securities issued by the U.S. government, its agencies or instrumentalities);

4. Purchase or sell real estate or interests in real estate or real estate limited partnerships (although a Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate, such as real estate investment trusts (REITs));

5. Make loans of money, except (a) for purchases of debt securities consistent with the investment policies of a Fund, (b) by engaging in repurchase agreements, or (c) through the loan of portfolio securities in an amount up to 331/3% of the Fund's net assets; or

6. Purchase or sell commodities, except that a Fund may purchase and sell futures contracts and options; may enter into foreign exchange contracts; may enter into swaps and other financial transactions not requiring the delivery of physical commodities; and may purchase or sell precious metal commodity contracts or options on such contracts in compliance with applicable commodities laws.

Each Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

Each Fund may not invest, in the aggregate, more than 15% of its net assets in securities that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by a Fund will not be considered a violation. With respect to borrowings, in the event that borrowings exceed the one-third limitation, a Fund will, within three days thereafter (not including Sundays and holidays) or such longer period as the SEC may prescribe by rules and regulations, reduce the amount of its borrowings to the extent necessary to comply with the one-third limitation.

MANAGEMENT OF THE FUNDS

Trustees and Officers

There are three members of the Board, none of whom are interested persons of the Trust, as that term is defined in the 1940 Act (the "Independent Trustees"). Christopher C. Nelson serves as Chairperson of the Board.

The Trust has determined that its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the Independent Trustees of the Trust constitute a majority of the Board, the number of Independent Trustees that constitute the Board, the amount of assets under management in the Trust, and the number of funds overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from Fund management.

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office; Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the* Fund Complex Overseen by Trustee	Other Directorships Held by Trustee During the Past Five Years
"Independent" Trustees:				
Christopher C. Nelson (born 1974) Trustee and Chairperson of the Board	Indefinite; Trustee and Chairperson since March 2024	Wealth Advisor, SeaCrest Wealth Management (2018 – Present).	7	Palmer Square Opportunistic Income Fund (includes 1 portfolio); Palmer Square Capital BDC
James Neville Jr. (born 1964) Trustee	Indefinite; Since March 2024	Portfolio Manager, Great Plains Principal Trading (January 2012 – present). Proprietary Trader (1987 – 2011).	7	Palmer Square Opportunistic Income Fund (includes 1 portfolio); Palmer Square Capital BDC
Megan Webber, CPA (born 1975) Trustee	Indefinite; Since March 2024	Director of Investment Reporting, The Anschutz Corporation (2000 – present). Supervising Audit Senior, KPMG, LLP (1997 – 2000).	7	Palmer Square Opportunistic Income Fund (includes 1 portfolio); Palmer Square Capital BDC

* The "Fund Complex" includes all registered investment companies, including all of their portfolios, advised by the Advisor or its affiliates.

The officers of the Trust are included in the table below.

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office; Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations
Jeffrey D. Fox (1975) President and Principal Executive Officer	Indefinite; since March 2024	President (March 2020 – present) and Managing Director (April 2013 – present), Palmer Square Capital Management, LLC; Director, Palmer Square Capital BDC.
Courtney Gengler (born 1986) Principal Financial Officer	Indefinite; Since September 2024	Senior Vice President, June 2024 – present, Palmer Square Capital Management LLC
Katie Elliott (born 1979) Chief Compliance Officer	Indefinite; Since February 2026	Senior Compliance Officer and Legal Counsel, Palmer Square Capital Management LLC (April 2025 – present); Compliance and Regulatory Counsel, Tortoise Capital Advisors (August 2018 – April 2024); Chief Compliance Officer, Tortoise Securities, LLC (April 2020 – January 2024).

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office; Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations
Benjamin Wiesenfeld (born 1977) Secretary	Indefinite; Since November 2025	Chief Compliance Officer and General Counsel, Palmer Square Capital Management (November 2025 – present), Chief Compliance Officer and Deputy Chief Compliance Officer, Pacific Select Fund (June 2020 – October 2025), Chief Compliance Officer, Pacific Select Distributors (September 2020 – October 2025), Chief Compliance Officer, Pacific Private Fund Advisors (April 2023 – October 2025).

The address for the Trustees and officers is 1900 Shawnee Mission Parkway, Suite 315, Mission Woods, KS 66205.

Compensation

Effective April 1, 2026, the Trust pays to each Independent Trustee, for services to the Trust, a $60,000 annual retainer, paid in quarterly installments. Prior to April 1, 2026, the Trust paid to each Independent Trustee, for services to the Trust, a $30,000 annual retainer, paid in quarterly installments. The aggregate compensation that the Independent Trustees received from the Fund Complex for the fiscal year ended June 30, 2026 is set forth below.

Name of Person/Position	Aggregate Compensation From the Funds	Pension or Retirement Benefits Accrued as Part of Funds' Expenses ($)	Estimated Annual Benefits Upon Retirement ($)	Total Compensation from Funds and Fund Complex (5 Funds) Paid to Trustees
Independent Trustees:				
Christopher C. Nelson.	$18,232	—	—	$120,000
James Neville Jr.	$18,232	—	—	$120,000
Megan Webber	$18,232	—	—	$120,000

Trustee Ownership of Shares

The Funds are required to show the dollar amount ranges of each Trustee's "beneficial ownership" of Shares and of each Fund and on an aggregate basis, all registered investment companies overseen by the Trustee in the same family of investment companies as the Funds as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended (the "1934 Act").

As of December 31, 2025, the Trustees did not own any shares of the Funds nor any shares in all registered investment companies overseen by the Trustee in the same family of investment companies as the Funds.

As of December 31, 2025, neither the Independent Trustees nor members of their immediate family, owned securities beneficially or of record in the Advisor, the Distributor (as defined below), or an affiliate of the Advisor or Distributor. Accordingly, neither the Independent Trustees nor members of their immediate family, have direct or indirect interest, the value of which exceeds $120,000, in the Advisor, the Distributor or any of their affiliates. In addition, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate families have conducted any transactions (or series of transactions) in which the amount involved exceeds $120,000 and to which the Advisor, the Distributor or any affiliate thereof was a party.

Additional Information Concerning the Board and the Trustees

The Board of Trustees is comprised of three members, each of whom is an Independent Trustee. Christopher C. Nelson serves as Chairperson of the Board. The organization of the Board of Trustees reflects the judgment of the Trustees that it is in the interest of the Funds and their shareholders to have an independent Board. Senior representatives of the Advisor familiar with the day-to-day operations of the Funds are present at Board meetings to provide information to the Trustees. In addition, senior representatives of the Advisor oversee the business of the

Funds and communicate with the Trustees as necessary between the meetings. The Trustees believe that the small size of the Board assures significant participation by each Board member. Additionally, the Board carries out certain of its functions through an Audit Committee and a Nominating and Governance Committee. The Audit Committee and the Nominating and Governance Committee are discussed further below.

The Trustees were selected to join the Board based upon the following factors, among others: character and integrity; willingness to serve; and willingness and ability to commit the time necessary to perform the duties of a Trustee. In addition, the Trustees have the following specific experience, qualifications, attributes and/or skills relevant to the operations of the Funds:

- Mr. Nelson has over 25 years of significant investment management experience, including at several investment management and wealth management firms.
- Mr. Neville has substantial experience in investment management, with over 35 years of experience in portfolio management and trading.
- Ms. Webber has significant senior executive experience with respect to financial reporting and accounting, including at a privately held company and through service in a senior position at a large independent public accounting firm.

In its periodic self-assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Funds. The summaries set forth above as to the qualifications, attributes and skills of the Trustees are required by the registration form adopted by the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

The Board of Trustees has two standing committees: the Audit Committee and the Nominating and Governance Committee.

- The function of the Audit Committee is to review the scope and results of each Fund's annual audit and any matters bearing on the audit of each Fund's financial statements and to assist the Board's oversight of the integrity of each Fund's pricing and financial reporting. The Audit Committee is comprised of all of the Independent Trustees and is chaired by Megan Webber. The Audit Committee also serves as the Qualified Legal Compliance Committee ("QLCC") for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer. The QLCC meets as needed. The Audit Committee met three times during the fiscal year ended June 30, 2026.
- The Nominating and Governance Committee is responsible for reviewing matters pertaining to composition, committees, and operations of the Board and meets from time to time as needed. The Nominating and Governance Committee will consider nominees properly recommended by a Fund's shareholders. Shareholders who wish to recommend a nominee should send nominations that include, among other things, biographical data and the qualifications of the proposed nominee to the applicable Fund's Secretary. The Nominating and Governance Committee is comprised of all of the Independent Trustees and is chaired by James Neville Jr. The Nominating and Governance Committee did not meet during the fiscal year ended June 30, 2026.

The Independent Trustees also regularly meet outside the presence of management. The Board has determined that its organization and leadership structure are appropriate in light of its fiduciary and oversight obligations and the special obligations of the Independent Trustees. The Board also believes that its structure facilitates the orderly and efficient flow of information to the Independent Trustees from management.

Consistent with its responsibility for oversight of the Funds in the interests of shareholders, the Board among other things oversees risk management of each Fund's investment programs and business affairs directly and through the Audit Committee. The Board has emphasized to the Advisor the importance of maintaining vigorous risk management programs and procedures. The Funds face a number of risks, such as investment risk, valuation risk, reputational risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Funds. Under the overall oversight of the Board, the Advisor and other service providers to the Funds employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Funds' CCO, the Advisor's management, and other service providers (such as the Funds' independent registered public accounting firm) make periodic reports to the Board or to the Audit Committee with respect to various aspects of risk management. The Board recognizes that not all risks that may affect the Funds can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve each Fund's investment objectives, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Control Persons, Principal Shareholders, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding Shares of any class of a Fund's outstanding equity securities. A control person is a shareholder that owns beneficially or through controlled companies more than 25% of the voting securities of the Funds or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Funds. To the best knowledge of the Trust, shareholders of record owning 5% or more of the outstanding shares of the Funds as of October 1, 2026 are set forth below:

Palmer Square Income Plus Fund — Class I

Nominee Name/Address	Percentage of Ownership
National Financial Services LLC P.O. Box 673004 Dallas, TX 75267	44.47%
Charles Schwab & Co., Inc. P.O. Box 64930 Phoenix, AZ 85082	27.94%
Arlington Trust Company, LLC John Hand Building 2000 Morris Avenue, Suite 1300 Birmingham, AL 35203	10.32%
First National Bank of Omaha P.O. Box 3128 Omaha, NE 68103	5.18%

Palmer Square Income Plus Fund — Class T

Nominee Name/Address	Percentage of Ownership
Union Bank & Trust Company PO Box 82535 Lincoln, NE 68506	99.99%

Palmer Square Ultra-Short Duration Investment Grade Fund

Nominee Name/Address	Percentage of Ownership
Charles Schwab & Co., Inc. P.O. Box 64930 Phoenix, AZ 85082	46.45%
National Financial Services LLC P.O. Box 673004 Dallas, TX 75267	36.87%
BMO Bank N.A. 320 S. Canal St. Chicago, IL 60606	16.20%

As of October 1, 2026, the Funds' officers and trustees as a group owned less than 1% of any class of outstanding Shares.

The Advisor

Palmer Square Capital Management LLC, or the Advisor, is a Delaware limited liability company with its principal offices located at 1900 Shawnee Mission Parkway, Suite 315, Mission Woods, KS 66205. The Funds have entered into an investment advisory agreement (the "Advisory Agreement") with the Advisor. Christopher D. Long, Founder, CEO and Chairman of Palmer Square and a portfolio manager of each Fund, and Angie K. Long, Chief Investment Officer of Palmer Square, and a portfolio manager of each Fund, have a controlling interest in the Advisor.

Pursuant to the Advisory Agreement, the Advisor provides investment advice to the Funds and oversees the day-to-day operations of the Funds, subject to the direction and oversight of the Board. Under the Advisory Agreement, the Advisor is also responsible for arranging transfer agency, custody, fund administration and accounting, and other related services necessary for the Funds to operate. The Advisor administers each Fund's business affairs, provides office facilities and equipment and certain clerical, bookkeeping, and administrative services. Under the Advisory Agreement, the Advisor receives a management fee paid at an annual rate of 0.49% of the average daily net assets of Palmer Square Income Plus Fund and an annual rate of 0.25% of the average daily net assets of Palmer Square Ultra-Short Duration Investment Grade Fund. In exchange, the Adviser will act as investment adviser to the Funds with respect to the investment of each Fund's assets, and supervise and arrange for the day-to-day operations of the Funds and the purchase of securities for, and the sale of securities held in the investment portfolio of, the Funds.

After an initial period of two years, the Advisory Agreement with respect to each Fund is renewable from year to year so long as its continuance is approved at least annually (1) by the vote, cast in person at a meeting called for that purpose (or in another manner permitted by the 1940 Act or pursuant to exemptive relief therefrom), of a majority of those Trustees who are not "interested persons" of the Advisor or the Trust; or (2) by the majority vote of the outstanding shares. The Advisory Agreement automatically terminates on assignment and is terminable on a 60-day written notice either by the Trust or the Advisor.

The Advisory Agreement provides that the Advisor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Funds in connection with the Investment Advisory Agreement, except for a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services, or for a loss resulting from willful misfeasance, bad faith or gross negligence on its part in the performance of its duties or from reckless disregard by the Advisor of its duties under the Advisory Agreement.

The following table sets forth the advisory fees, fee waivers and/or expense reimbursements/(recoupment), as applicable, of each Predecessor Fund (prior to the Reorganization) and each Fund for the specified periods.

	Advisory Fee Paid		
Fund	Fiscal Period Ended June 30, 2024	Fiscal Period Ended June 30, 2025	Fiscal Year Ended June 30, 2026
Palmer Square Income Plus Fund	$4,211,016	$4,839,335	$4,974,609
Palmer Square Ultra-Short Duration Investment Grade Fund	$198,198	$146,764	$152,163

Fund Expenses

Each Fund is responsible for its own expenses (all of which will be borne directly or indirectly by the Fund's shareholders), including among others, investment management fees; costs of transfer agency, custody, fund administration, legal, audit and other services; interest expenses; costs of leverage, borrowing, short sales, securities lending or similar transactions; taxes; brokerage commissions and other expenses incurred in connection with the execution of portfolio transactions on behalf of the Fund; expenses of printing and distributing regulatory reports (e.g., shareholder reports, prospectuses, and statements of additional information) and communications to Fund shareholders; expenses incurred in connection with any distribution plan adopted by the Fund pursuant to Rule 12b-1 under the 1940 Act; insurance and fidelity bond expenses; fees and salaries payable to the Fund's Board members and officers who are not "interested persons" of the Fund or the Advisor; all expenses incurred in connection with the Board members' services, including travel expenses and legal fees of Trust counsel and counsel for those members of the Board who are not "interested persons" of the Fund; litigation expenses; and extraordinary expenses not incurred in the ordinary course of business.

The Advisor has contractually agreed to waive its fees and/or pay for operating expenses of each Fund to ensure that the total annual fund operating expenses (excluding, as applicable, any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with Form N-1A), expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed the limits set forth in the Prospectus (the "expense cap"). Each agreement is effective until October 31, 2027, and it may be terminated before that date only by the Board of Trustees.

Any reduction in advisory fees or payment of the Funds' expenses made by the Advisor in a fiscal year may be reimbursed by each Fund for a period ending three full fiscal years after the date of reduction of payment if the Advisor so requests. This reimbursement may be requested from each Fund if the reimbursement will not cause the Fund's operating expenses to exceed the expense limitation in effect at the time such fees were waived or payments made taking into account the reimbursement. In no case will the reimbursement amount exceed the total amount of fees waived and no reimbursement will include any amounts previously reimbursed to the Advisor. Each Fund must pay current ordinary operating expenses before the Advisor is entitled to any reimbursement of fees and/or Fund expenses.

Portfolio Managers

The Funds are jointly managed by Angie K. Long, Christopher D. Long and Jon R. Brager.

Other Accounts Managed by the Portfolio Managers. As of June 30, 2026, information on other accounts managed by the Funds' portfolio managers is as follows.

	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
Portfolio Managers	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)
Angie K. Long, CFA	7	$2,474	109	$31,041	54	$2,463
Christopher D. Long	4	$1,722	108	$31,000	78	$2,468
Jon Brager, CFA	0	$0	24	$8,495	0	$0

	Number of Accounts with Advisory Fee Based on Performance					
	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
Portfolio Managers	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)
Angie K. Long, CFA	1	$1,011	97	$28,378	0	$0
Christopher D. Long	1	$1,011	97	$28,378	0	$0
Jon Brager, CFA	0	$0	24	$8,495	0	$0

Compensation of Portfolio Managers. The portfolio managers receive a fixed base salary and a discretionary bonus. Each portfolio manager is an equity owner of the Advisor and shares in the Advisor's profits. The portfolio managers' compensation arrangements are not determined on the basis of specific funds or accounts managed.

Material Conflicts of Interest. It is possible that conflicts of interest may arise in connection with the portfolio managers' management of each Fund's investments on the one hand and the investments of other accounts or vehicles for which the portfolio managers are responsible on the other. For example, a portfolio manager may have conflicts of interest in allocating management time, resources and investment opportunities among the Funds and the other accounts or vehicles the portfolio manager advises. In addition, due to differences in the investment strategies or restrictions among the Funds and the other accounts, a portfolio manager may take action with respect to another account that differs from the action taken with respect to the Funds. In some cases, another account managed by a portfolio manager may provide more revenue to the Advisor. While this may appear to create additional conflicts of interest for the portfolio manager in the allocation of management time, resources and investment opportunities, the Advisor strives to ensure that portfolio managers endeavor to exercise their discretion in a manner that is equitable to all interested persons. In this regard, in the absence of specific account-related impediments, it is the policy of the Advisor to allocate investment ideas pro rata to all accounts with the same primary investment objective.

The goal of the Advisor is to provide high quality investment services to all of its clients, while meeting its fiduciary obligation to treat all clients fairly. The Advisor has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures that it believes address the conflicts associated with managing multiple accounts for multiple clients.

Ownership of the Funds by the Portfolio Managers. As of June 30, 2026, the portfolio managers own equity securities of the Funds as follows.

Fund Name/Portfolio Manager	Dollar Range of Securities Beneficially Owned
Palmer Square Income Plus Fund	
Angie K. Long, CFA	None
Christopher D. Long	None
Jon R. Brager, CFA	None
Palmer Square Ultra-Short Duration Investment Grade Fund	
Angie K. Long, CFA	None
Christopher D. Long	None
Jon R. Brager, CFA	None

Service Providers

Fund Administrator and Fund Accountant

JPMorgan Chase Bank, N.A., located at 70 Fargo Street, Boston, MA 02210, acts as administrator of each Fund pursuant to a Fund Services Agreement with the Trust. Pursuant to the Fund Services Agreement, each Fund pays the Administrator a fee for administration services. The fee is payable monthly based on each Fund's average daily net assets.

The following table sets forth the aggregate amount of expenses paid by each Predecessor Fund (prior to the Reorganization) and each Fund to their administrators for its services as custodian, transfer agent and/or fund administrator for the specified periods.

	Administration and Accounting Fees Paid		
Fund	Fiscal Period Ended June 30, 2024	Fiscal Period Ended June 30, 2025	Fiscal Year Ended June 30, 2026
Palmer Square Income Plus Fund	$595,988	$649,779	$355,279
Palmer Square Ultra-Short Duration Investment Grade Fund	$100,703	$97,646	$127,125

Custodian

JPMorgan Chase Bank, N.A., located at 270 Park Avenue, New York, NY 10017, is each Fund's custodian pursuant to a Global Custody Agreement with the Trust.

Transfer Agent

UMB Fund Services, Inc., located at 235 West Galena Street, Milwaukee, Wisconsin 53212, acts as each Fund's fund transfer agent.

Independent Registered Public Accounting Firm

Tait, Weller & Baker LLP, located at 50 S. 16th Street, Philadelphia, Pennsylvania 19102, serves as each Fund's independent registered public accounting firm. Its services include auditing the Funds' financial statements and the performance of related tax services.

Counsel to the Trust

Vedder Price P.C., located at 222 North LaSalle Street, Chicago, IL 60601, serves as legal counsel to the Trust.

Distributor and Distribution Agreement

Foreside Fund Services, LLC, a wholly-owned subsidiary of Foreside Financial Group, LLC (dba ACA Group), is the distributor (also known as the principal underwriter) of the shares of the Funds and is located at 190 Middle Street, Suite 301, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of FINRA. The Distributor is not affiliated with the Trust, the Advisor, or any other service provider for the Funds.

Under a Distribution Agreement with the Trust dated October 6, 2025 (the "Distribution Agreement"), the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Funds. The Distributor continually distributes shares of the Funds on a commercially reasonable efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Funds. With respect to certain financial intermediaries and related fund "supermarket" platform arrangements, the Funds and/or the Advisor, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Funds.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Funds through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Funds for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 distribution plan is effective. The Advisor pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds' outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Funds on no less than 60 days' written notice when authorized either by a vote of a majority of the outstanding voting securities of the Funds or by vote of a majority of the members of the Board who are not "interested persons" (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the

operation of the Distribution Agreement, or by the Distributor, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor's obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor's willful misfeasance, bad faith, or gross negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

Shareholder Service Plan

The Board has adopted, on behalf of each Fund, a Shareholder Service Plan (the "Service Plan") under which the Advisor will provide, or arrange for others (such as banks, trust companies, broker-dealers and other financial intermediaries (each, a "Service Organization")) to provide, certain specified non-distribution shareholder servicing functions for Fund shares owned by its respective customers, including but not limited to (a) establishing and maintaining accounts and records relating to customers who invest in the Fund; (b) aggregating and processing orders involving Fund shares; (c) processing dividend and other distribution payments from the Funds on behalf of customers; (d) preparing tax reports or forms on behalf of customers; (e) forwarding communications from the Fund; (f) providing sub-accounting with respect to Fund shares; (g) providing customers with a service that invests the assets of their accounts in Fund shares pursuant to specific or pre-authorized instructions; and (h) providing such other similar services as the Advisor may reasonably request to the extent it or a Service Organization is permitted to do so under applicable statutes, rules or regulations. Each Fund, with the exception of Class T shares, will pay the Advisor or Service Organizations, as applicable, at an annual rate of up to 0.15% of the Fund's average daily net assets, payable monthly. The amount paid by each Fund to any Service Organization may be expressed in terms of a dollar amount per shareholder account in the Fund held by clients of the Service Organization, and/or in terms of percentage of the net assets of such accounts.

Marketing and Support Payments

The Advisor, out of its own resources and without additional cost to a Fund or its shareholders, may provide cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. These payments are in addition to other fees described in the Fund's Prospectus and this SAI, and are generally provided for shareholder services or marketing support. Payments for marketing support are typically for inclusion of a Fund on sales lists, including electronic sales platforms. Investors may wish to take these payments into account when considering and evaluating recommendations to purchase shares of a Fund.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Advisory Agreement, the Advisor determines which securities are to be purchased and sold by the Funds and which broker-dealers are eligible to execute the Funds' portfolio transactions. The purchases and sales of securities in the OTC market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for the Funds also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which the Funds will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Advisor will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Advisor that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. The Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Funds, to be useful in varying degrees, but of indeterminable value.

While it is the Funds' general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Funds, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Funds or to the Advisor, even if the specific services are not directly useful to the Funds and may be useful to the Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Funds may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Advisor's overall responsibilities to the Funds.

Investment decisions for a Fund are made independently from those of other client accounts that may be managed or advised by the Advisor. Nevertheless, it is possible that at times, identical securities will be acceptable for both the Funds and one or more of such client accounts. In such event, the position of the Funds and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Funds at the same time, the Funds may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Funds may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Advisor's other client accounts.

The Funds do not effect securities transactions through brokers in accordance with any formula, nor do they effect securities transactions through brokers for selling shares of the Funds. However, broker-dealers who execute brokerage transactions may effect purchases of shares of the Funds for their customers.

The tables below show the aggregate dollar amount of brokerage commissions paid by the Funds and the Predecessor Funds (prior to the Reorganization) for the most recent fiscal years.

Name of Fund	Brokerage Commissions Paid
Palmer Square Income Plus Fund	
Fiscal Year Ended June 30, 2026	$16,723
Fiscal Year Ended June 30, 2025	$4,203
Fiscal Year Ended June 30, 2024	$1,576
Palmer Square Ultra-Short Duration Investment Grade Fund	
Fiscal Year Ended June 30, 2026	$1,297
Fiscal Year Ended June 30, 2025	$131
Fiscal Year Ended June 30, 2024	$10

Directed Brokerage. For the fiscal year ended June 30, 2026, the Funds did not participate in any directed brokerage.

Regular Broker-Dealers. As of the close of the fiscal year ended June 30, 2026, the Funds did not own securities of their "regular broker-dealers" (as defined by Rule 10b-1 under the 1940 Act) or of their parents. (Generally, a regular broker or dealer of an investment company is one of the ten brokers or dealers that received the greatest dollar amount of brokerage commissions from participating in portfolio transactions, engaged as principal in the largest dollar amount of portfolio transactions, or sold the largest dollar amount of portfolio securities during the Fund's most recent fiscal year).

PORTFOLIO TURNOVER

Although the Funds generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Advisor, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year.

A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will generally be taxed at ordinary income tax rates for federal income tax purposes.

The portfolio turnover rates of the Funds and the Predecessor Funds (prior to the Reorganization) for the fiscal years ended June 30, 2025 and June 30, 2026 are as follows:

Fund	2025	2026
Palmer Square Income Plus Fund	97%	82%
Palmer Square Ultra-Short Duration Investment Grade Fund	124%	103%

CODE OF ETHICS

The Trust and the Advisor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities that may be purchased or held by the Funds.

PROXY VOTING POLICY

The Trust has adopted Proxy Voting Policies and Procedures ("Trust Proxy Policies") on behalf of the Funds, which delegate the responsibility for voting each Fund's proxies to the Advisor, subject to the Board's oversight. The Trust Proxy Policies require that the Advisor vote proxies received in a manner consistent with the best interests of the Funds. The Trust Proxy Policies also require the Advisor to present to the Board, at least annually, the Advisor's Proxy Voting Policies and Procedures ("Advisor Proxy Policies") and a record of each proxy voted by the Advisor on behalf of the Funds, including a report on the resolution of all proxies identified by the Advisor as involving a conflict of interest. See Appendix A for the Advisor's Proxy Policies and Guidelines. The Advisor Proxy Policies are intended to serve as a guideline and to further the economic value of each security held by the Funds.

If a proxy proposal raises a material conflict between the Advisor's interests and a Fund's interests, the Advisor will resolve the conflict by following the Advisor's policy guidelines or the recommendation of an independent third party.

The Funds are required to annually file Form N-PX, which lists each Fund's complete proxy voting record for the 12-month period ended June 30th each year. Once filed, a Fund's proxy voting record will be available without charge, upon request, by calling toll-free 1-800-736-1145 and on the SEC's web site at www.sec.gov.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Distributor and the Funds' transfer agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control, and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Trust has adopted policies and procedures regarding disclosure of portfolio holdings information (the "Disclosure Policy"). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Trust. The Disclosure Policy applies to the Funds, the Advisor, and other internal parties involved in the administration, operation or custody of the Funds, including, but not limited to JPMorgan Chase Bank, N.A., the Board of Trustees, counsel to the Trust, Vedder Price P.C., and the Funds' independent registered public accounting firm, Tait, Weller & Baker LLP (collectively, the "Service Providers"). Pursuant to the Disclosure Policy, non-public information concerning the Funds' portfolio holdings may be disclosed to its Service Providers only if such disclosure is consistent with the antifraud provisions of the federal securities laws and the fiduciary duties owed by the Funds and the Advisor to the Funds' shareholders. The Funds and its Service Providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in the Funds or in other investment companies or accounts managed by the Advisor, or any affiliated person of the Advisor) in connection with the disclosure of portfolio holdings information of the Funds. The Funds' Disclosure Policy is implemented and overseen by the CCO of the Trust, subject to the oversight of the Board of Trustees. Periodic reports regarding these procedures will be provided to the Trust's Board.

Portfolio holdings information will be deemed public when it has been (1) posted to the Funds' public website at www.palmersquarefunds.com or (2) disclosed in periodic regulatory filings on the SEC's website (www.sec.gov). Management of the Funds may make publicly available its portfolio holdings as of the most recent calendar quarter on the Funds' public website no earlier than five days after the date of such information (e.g., information as of January 31 may be made available no earlier than February 5).

Non-Public Portfolio Holdings Information Policy. All portfolio holdings information that has not been disseminated in a manner making it available to investors generally as described above is considered non-public portfolio holdings information for the purposes of the Disclosure Policy. Pursuant to the Disclosure Policy, the Funds or its Service Providers may disclose non-public portfolio holdings information to certain third parties who fall within pre-authorized categories on a daily basis, with no lag time unless otherwise specified below. These third parties include: (i) the Funds' Service Providers and others who need access to such information in the performance of their contractual or other duties and responsibilities to the Funds (e.g., custodians, accountants, the Advisor, administrators, attorneys, officers and Trustees) and who are subject to duties of confidentiality imposed by law or contract, (ii) brokers who execute trades for the Funds, (iii) evaluation service providers (as described below) and (iv) shareholders receiving in-kind redemptions (as described below).

Evaluation Service Providers. These third parties include mutual fund evaluation services, such as Morningstar, Inc. and Lipper, Inc. if the Funds have a legitimate business purpose for disclosing the information, provided that the third party expressly agrees to maintain the non-public portfolio holdings information in confidence and not to trade portfolio securities based on the non-public portfolio holdings information. Subject to the terms and conditions of any agreement between the Funds or its authorized service providers and the third party, if these conditions for disclosure are satisfied, there shall be no restriction on the frequency with which the Funds' non-public portfolio holdings information is released, and no lag period shall apply. In addition, persons who owe a duty of trust or confidence to the Funds or its Service Providers (such as legal counsel) may receive non-public portfolio holdings information without entering into a non-disclosure agreement.

Shareholder In-Kind Distributions. A Fund may, in certain circumstances, pay redemption proceeds to a shareholder by an in-kind distribution of portfolio securities (instead of cash). In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of a Fund up to seven (7) calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain the confidentiality of the portfolio holdings information and not to trade portfolio securities based on the non-public holdings information.

Other Entities. Pursuant to the Disclosure Policy, a Fund or the Advisor may disclose non-public portfolio holdings information to a third party who does not fall within the pre-approved categories, and who are not executing broker-dealers; however, prior to the receipt of any non-public portfolio holdings information by such third party,

the recipient must have entered into a non-disclosure agreement and the disclosure arrangement must have been approved by the CCO of the Trust. The CCO will report to the Board of Trustees on a quarterly basis regarding any recipients of non-public portfolio holdings information approved pursuant to this paragraph. There are no other ongoing arrangements as of the date of this SAI.

The Advisor and its affiliates may provide investment advice to clients other than the Funds that have investment objectives that may be substantially similar to those of the Funds. These clients also may have portfolios consisting of holdings substantially similar to those of the Funds and generally have access to current portfolio holdings information for their accounts. These clients do not owe the Advisor or a Fund a duty of confidentiality with respect to disclosure of their portfolio holdings.

Current Arrangements Regarding Disclosure of Portfolio Holdings As of the date of this SAI, the Trust or one of the Funds has ongoing business arrangements with the following entities which involve making portfolio holdings information available to such entities as an incidental part of the services they provide to the Trust: (i) Palmer Square Capital Management LLC (the Advisor) and JPMorgan Chase Bank, N.A. (the Trust's Administrator and Custodian) pursuant to investment advisory, administration and custody agreements, respectively, under which the Trust's portfolio holdings information is provided daily on a real-time basis (i.e., with no lag time); (ii) Tait, Weller & Baker LLP (independent registered public accounting firm) and Vedder Price P.C. (attorneys) to which the Trust provides portfolio holdings information on a regular basis with varying lag times after the date of the information; (iii) Confluence Unity NXT to which the Trust provides portfolio holdings information on a monthly basis in connection with the filing of Form N-PORT; (iv) State Street which assists each Fund with classifying its holdings pursuant to its liquidity risk management program and each Fund's portfolio holdings information is provided monthly on a one- to ten-day time lag; (v) Morningstar, Inc., Lipper Inc., Refinitiv, Thomson Financial, Vickers Stock Research Corporation, and Bloomberg L.P., to which each Fund's portfolio holdings information is provided quarterly after the end of the previous fiscal quarter, with a 60-day time lag and no earlier than the date such information is filed on the SEC's EDGAR system on Form N-PORT (for the first and third fiscal quarters) or Form N-CSR (for the second and fourth fiscal quarters), as applicable; and (vi) Gainskeeper, Inc. and its affiliates, pursuant to an administrative agency agreement under which the Trust provides each Fund's portfolio tax lot holdings and transaction level data information on a daily basis.

DETERMINATION OF NET ASSET VALUE

The NAV of a Fund's shares will fluctuate and is determined as of the close of regular trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m. Eastern Time) each business day. The NAV may be calculated earlier if permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV is computed by dividing (a) the difference between the value of a Fund's securities, cash and other assets and the amount of the Fund's expenses and liabilities by (b) the number of shares outstanding. Each NAV takes into account all of the expenses and fees of the Fund, including management fees and administration fees, which are accrued daily.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV}$$

The Funds' investments are generally valued using readily available market quotations when such quotations are readily available and reliable. When market quotations are not readily available and reliable, investments are valued at fair value as determined in good faith by the Advisor, acting in its capacity as the Funds' valuation designee, pursuant to procedures approved by the Board. Pursuant to those procedures, the Board has designated the Advisor as the Funds' valuation designee ("Valuation Designee"), responsible for determining whether market quotations are readily available and reliable, and making good faith determinations of fair value when appropriate. Market quotations may not be readily available or may be deemed unreliable for a variety of reasons, including significant market events occurring after a market closes, trading halts, market disruptions, limited trading activity, stale pricing, or other events that may materially affect the value of a security.

The Valuation Designee carries out its responsibilities with respect to fair value determinations through its valuation committee (the "Valuation Committee"). As the Valuation Designee, the Advisor is responsible for the establishment and application, in a consistent manner, of appropriate methodologies for determining the fair value of investments, periodically reviewing the selected methodologies used for continuing appropriateness and accuracy, and making any changes or adjustments to the methodologies as appropriate. The Valuation Designee is also responsible for the identification, periodic assessment, and management of material risks, including material conflicts of interest, associated with fair value determinations, taking into account each Fund's investments, significant changes in each Fund's investment strategies or policies, market events, and other relevant factors. The Valuation Designee is also responsible for selecting, overseeing and evaluating pricing services, which provide pricing estimates or information to assist in determining the fair value of Fund investments. The Valuation Designee is subject to the general oversight of the Board.

Debt securities for which market quotations are readily available are valued based upon bid, ask or mean price as provided by the approved independent pricing service. If market quotations for such securities are not available from a pricing service, such debt securities will be valued at the mean between the last bid and ask prices obtained from two or more dealers unless there is only one dealer, in which case that dealer's last bid and ask price is used, in each case as selected by the Valuation Committee.

The value of debt securities for which market quotations are not readily available will be based upon a consideration of yields or prices of obligations of comparable quality, coupon, maturity and type, indications as to value from recognized dealers, and general market conditions, as reflected in the price provided by an independent pricing service. Debt securities generally are valued using prices supplied by approved independent pricing services. The Valuation Committee reviews such pricing information and may determine that a price provided by a pricing service is not reliable or does not reflect fair value, in which case the security will be valued in good faith pursuant to the Fund's valuation procedures.

Short-term securities, including bonds, notes, debentures and other debt securities, and money market instruments such as certificates of deposit, commercial paper, bankers' acceptances and obligations of domestic and foreign banks, maturing more than 60 days from the valuation date for which reliable quotations are readily available shall each be valued at current market quotations as provided by an independent pricing service or by a principal market maker selected by the Valuation Committee.

New debt issues such as bonds and collateralized loan obligations ("CLOs") as well as refinanced CLOs and CMBS, which typically are not priced by a third-party pricing service for a period of time after being issued, shall be priced at cost until the earlier of (a) a third-party pricing service begins pricing the issue or (b) fifteen business days after purchase. Newly purchased securities that are not new issues may at times not be priced by a third-party service for several days after purchase. These securities shall be priced at cost for a period of five business days after purchase or until a third-party service begins pricing the issue, whichever comes first.

Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the spot rate of such currencies against U.S. dollars at 4:00 p.m. Eastern Time from the NYSE. If such quotations are not available, the rate of exchange will be determined in good faith by the Valuation Committee.

Other assets for which market quotations are not readily available or are deemed unreliable are valued at fair value in good faith pursuant to the Advisor's valuation procedures adopted under Rule 2a-5 and subject to Board oversight.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Funds' Prospectus. Shares of the Funds are sold at the next offering price calculated after receipt of an order for purchase. In order to purchase shares of the Funds, you must invest the initial minimum investment for the relevant class of shares. However, each Fund reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Funds.

Each Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in the Fund's view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of a Fund within a calendar year). Furthermore, the Fund may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than seven calendar days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (ii) for any period during which an emergency exists affecting the sale of a Fund's securities or making such sale or the fair determination of the value of the Fund's net assets not reasonably practicable; or (iii) for such other periods as the SEC may permit for the protection of a Fund's shareholders. In addition, if shares are purchased using a check and a redemption is requested before the check has cleared, the Funds may postpone payment of the redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemptions In-Kind

The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (the lesser of (i) $250,000 or (ii) 1% of the Fund's assets). Each Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by an in-kind distribution of portfolio securities (instead of cash). The securities so distributed would be valued at the same amounts as those assigned to them in calculating the NAV for the Fund shares being redeemed. If a shareholder receives an in-kind distribution, the shareholder could incur brokerage or other charges in converting the securities to cash.

The Funds do not intend to hold any significant percentage of their portfolios in illiquid securities, although a Fund, like virtually all mutual funds, may from time to time hold securities that are illiquid. In the unlikely event a Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If a Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

FEDERAL INCOME TAX MATTERS

The following is a summary of certain material U.S. federal income tax considerations affecting each Fund and its U.S. holders. The discussion is very general. Current and prospective shareholders are therefore urged to consult their own tax advisers with respect to the specific federal, state, local and foreign tax consequences of investing in a Fund. The summary is based on the laws in effect on the date of this SAI and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect. The discussion set forth herein does not constitute tax advice. The IRS could disagree with any conclusions set forth in this section. Investors are urged to consult their own tax advisers to determine the specific tax consequences to them of investing in a Fund, including applicable federal, state, local and foreign tax consequences to them or the effect of possible changes in tax laws.

In addition, no attempt is made to address tax considerations applicable to an investor with a special tax status, such as a financial institution, real estate investment trust, insurance company, regulated investment company, individual retirement account, other tax-exempt organization, dealer in securities or currencies, person holding shares of a Fund as part of a hedging, integrated, conversion or straddle transaction or constructive sale, trader in securities that has elected the mark-to-market method of accounting for its securities, U.S. holder (as defined below) whose functional currency is not the U.S. dollar, investor with "applicable financial statements" within the meaning of section 451(b) of the Code, or Non-U.S. holders (except as otherwise specifically provided below). Furthermore, this discussion does not reflect possible application of the alternative minimum tax. Unless otherwise noted, this discussion assumes each Fund's shares are held by U.S. holders and that such shares are held as capital assets.

A "U.S. holder" is a beneficial owner of the shares of a Fund that is for U.S. federal income tax purposes:

- a citizen or individual resident of the United States (including certain former citizens and former long-term residents);
- a corporation or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust with respect to which a court within the United States is able to exercise primary supervision over its administration and one or more United States persons (as such term is defined under the Code) have the authority to control all of its substantial decisions or the trust has made a valid election in effect under applicable Treasury regulations to be treated as a United States person for U.S. federal income tax purposes.

A "Non-U.S. holder" is a beneficial owner of shares of a Fund that is an individual, corporation, trust or estate and is not a U.S. holder. If a partnership (including any entity treated as a partnership for U.S. federal income tax purposes) holds shares of a Fund, the tax treatment of a partner in the partnership generally will depend upon the status of the partner and the activities of the partnership.

Each Fund is treated as a separate entity from other series of the Trust for federal income tax purposes. Each Fund intends to elect to be, and intends to qualify each year for treatment as, a regulated investment company under Subchapter M of the Code ("regulated investment company") by complying with all applicable requirements of the Code, including, among other things, requirements as to the sources of the Fund's income, diversification of the Fund's assets and timing of Fund distributions. To so qualify, a Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in "qualified publicly traded partnerships" (i.e., partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income); (b) diversify its holdings so that, at the end of each quarter of the Fund's taxable year, (i) at least 50% of the market value of the Fund's assets is represented by cash, securities of other regulated investment companies, U.S. government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund's assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested, including through corporations

in which the Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other regulated investment companies) of any one issuer, in the securities (other than the securities of other regulated investment companies) of any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more "qualified publicly traded partnerships," and (c) distribute an amount equal to the sum of at least 90% of its investment company taxable income (computed without regard to the dividends-paid deduction) and 90% of its net tax-exempt income, if any, for the tax year (including, for purposes of satisfying this distribution requirement, certain distributions made by the Fund after the close of its taxable year that are treated as made during such taxable year).

As a regulated investment company, a Fund will not be subject to U.S. federal income tax on the portion of its net investment income and capital gains that it distributes to its shareholders, provided that it satisfies a minimum distribution requirement. In order to also avoid liability for a non-deductible federal excise tax, a Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period generally ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax. A Fund will be subject to income tax at the applicable corporate tax rate on any taxable income or gains that it does not distribute to its shareholders. Each Fund's policy is to distribute to its shareholders all investment company taxable income (determined without regard to the deduction for dividends paid) and any net capital gain (the excess of net long-term capital gain over net short-term capital loss) for each fiscal year in a manner that complies with the distribution requirements of the Code, so that a Fund will not be subject to any federal income or excise taxes.

If, for any taxable year, a Fund were to fail to qualify as a regulated investment company or were to fail to meet certain minimum distribution requirements under the Code, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by a Fund in computing its taxable income. In addition, in the event of a failure to qualify, a Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, including any distributions of net capital gain, would be taxable to U.S. holders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of U.S. holders taxed as individuals and (ii) for the dividends received deduction in the case of corporate U.S. holders. Moreover, if a Fund were to fail to qualify as a regulated investment company in any year, it would be required to distribute out its earnings and profits accumulated in that year in order to qualify again as a regulated investment company. Under certain circumstances, a Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so a Fund might incur significant Fund-level taxes and might be forced to dispose of certain assets. If a Fund failed to qualify as a regulated investment company for a period greater than two taxable years, a Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a regulated investment company in a subsequent year.

U.S. holders generally will be subject to federal income taxes on distributions made by a Fund whether paid in cash or additional shares. Distributions of net investment income (including interest, dividend income and net short-term capital gain in excess of any net long-term capital loss, less certain expenses), other than qualified dividend income, will be taxable to U.S. holders as ordinary income. Distributions of qualified dividend income generally will be taxed to non-corporate U.S. holders at the federal income tax rates applicable to net capital gain, provided a Fund reports the amount distributed as qualified dividend income.

In general, dividends may be reported by a Fund as qualified dividend income if they are attributable to qualified dividend income received by the Fund. Qualified dividend income generally means dividend income received from the Fund's investments in common and preferred stock of U.S. companies and stock of certain qualified foreign corporations, provided that certain holding period and other requirements are met by both a Fund and its shareholders. If 95% or more of the Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, a Fund may report all distributions of such income as qualified dividend income.

A foreign corporation is treated as a qualified foreign corporation for this purpose if it is incorporated in a possession of the United States or it is eligible for the benefits of certain income tax treaties with the United States and meets certain additional requirements. Certain foreign corporations that are not otherwise qualified foreign

corporations will be treated as qualified foreign corporations with respect to dividends paid by them if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. PFICs (as defined below) are not qualified foreign corporations for this purpose.

Dividends paid by a Fund may qualify in part for the dividends received deduction available to corporate U.S. holders, provided a Fund reports the amount distributed as a qualifying dividend and certain holding period and other requirements under the Code are satisfied. The reported amount, however, cannot exceed the aggregate amount of qualifying dividends received by a Fund for its taxable year. Eligibility for qualified dividend income treatment and the dividends received deduction may be reduced or eliminated if, among other things, (i) the U.S. holder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property or (ii) certain holding period requirements are not satisfied at both a Fund and shareholder levels. In addition, qualified dividend income treatment is not available if a U.S. holder elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest.

Under Section 163(j) of the Code, a taxpayer's business interest expense is generally deductible to the extent of the taxpayer's business interest income plus certain other amounts. If a Fund earns business interest income, it may report a portion of its dividends as "Section 163(j) interest dividends," which its shareholders may be able to treat as business interest income for purposes of Section 163(j) of the Code. The Fund's "Section 163(j) interest dividend" for a tax year will be limited to the excess of its business interest income over the sum of its business interest expense and other deductions properly allocable to its business interest income. In general, the Fund's shareholders may treat a distribution reported as a Section 163(j) interest dividend as interest income only to the extent the distribution exceeds the sum of the portions of the distribution reported as other types of tax-favored income. To be eligible to treat a Section 163(j) interest dividend as interest income, a shareholder may need to meet certain holding period requirements in respect of a Fund shares and must not have hedged its position in a Fund shares in certain ways.

Distributions of net capital gain, if any, that a Fund reports as capital gain dividends will be taxable to non-corporate U.S. holders as long-term capital gain without regard to how long a U.S. holder has held shares of the Fund. A Fund may retain certain amounts of capital gains and designate them as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amounts so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by a Fund on those undistributed amounts against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase their federal income tax basis in their shares by an amount equal to the excess of the amounts of undistributed net capital gain included in their respective income over their respective income tax credits.

For U.S. federal income tax purposes, a Fund is permitted to carry forward indefinitely a net capital loss from any taxable year to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to a Fund and may not be distributed as capital gains to shareholders. Generally, a Fund may not carry forward any losses other than net capital losses. Under certain circumstances, a Fund may elect to treat certain losses as though they were incurred on the first day of the taxable year immediately following the taxable year in which they were actually incurred.

Distributions in excess of earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the U.S. holder's basis in his, her or its Fund shares. A distribution treated as a return of capital will reduce the U.S. holder's basis in his, her or its shares, which will result in an increase in the amount of gain (or a decrease in the amount of loss) that will be recognized by the shareholder for tax purposes on a later sale of such shares. After the U.S. holder's basis is reduced to zero, any distributions in excess of earnings and profits will be treated as a capital gain, assuming the U.S. holder holds his, her or its shares as capital assets.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a U.S. holder who is an individual for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount ($250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, $125,000 if married filing separately, and $200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of U.S. holders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (among other categories of income) are generally taken into account in computing a U.S. holder's net investment income.

Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable for federal income tax purposes as if received on December 31 of the calendar year in which declared. In addition, certain distributions made after the close of a taxable year of a Fund may be "spilled back" and treated for certain purposes as paid by a Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a regulated investment company's undistributed income and gain subject to the 4% excise tax described above, such "spilled back" dividends are treated as paid by the regulated investment company when they are actually paid.

A redemption of Fund shares may result in recognition of a taxable gain or loss. The gain or loss will generally be treated as a long-term capital gain or loss if the shares are held for more than one year and as a short-term capital gain or loss if the shares are held for one year or less. Any loss realized upon a redemption or exchange of shares held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long term capital gains during such six-month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the same Fund or other substantially identical stock or securities are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

If a shareholder recognizes a loss with respect to a Fund's shares of $2 million or more for an individual shareholder or $10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is so reportable does not affect the legal determination of whether the taxpayer's treatment of the loss is proper.

A Fund's transactions in options and other similar transactions, such as futures, may be subject to special provisions of the Code that, among other things, affect the character of any income realized by a Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses, affect the holding period of the Fund's securities, affect whether distributions will be eligible for the dividends received deduction or be treated as qualified dividend income and affect the determination of whether capital gain and loss is characterized as long-term or short-term capital gain or loss.

These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions may also require a Fund to "mark-to-market" certain types of the positions in its portfolio (i.e., treat them as if they were closed out), which may cause a Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. The Funds will monitor these transactions and will make the appropriate entries in its books and records, and if a Fund deems it advisable, will make appropriate elections if available in order to mitigate the effect of these rules, prevent disqualification of the Funds as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes.

A Fund's transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted above, distributions of net short-term capital gain are generally taxable to U.S. holders as ordinary income while distributions of net long-term capital gain are taxable to U.S. holders as long-term capital gain, regardless of how long the U.S. holder has held shares of the Fund.

A Fund's entry into a short sale transaction, an option or certain other contracts, such as futures, could be treated as the constructive sale of an appreciated financial position, causing a Fund to realize gain, but not loss, on the position.

If a Fund invests in certain pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if a Fund elects to include market discount in income currently), the Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, a Fund must distribute, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income to shareholders to avoid federal income and excise taxes. Therefore,

a Fund may have to sell portfolio securities (potentially under disadvantageous circumstances) to generate cash, or may have to undertake leverage by borrowing cash, to satisfy these distribution requirements. Dispositions of portfolio securities may result in additional gains and additional distribution requirements.

If a Fund invests in a market discount bond, it will be required to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount, unless a Fund elects to include the market discount in income as it accrues as discussed above. A market discount bond is a security acquired in the secondary market at a price below its redemption value (or its adjusted issue price if it is also an original issue discount bond).

A Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries, which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the United States may reduce or eliminate such taxes in some cases. So long as a Fund qualifies for treatment as a regulated investment company and incurs "qualified foreign taxes," if more than 50% of its net assets at the close of its taxable year consist of stock or securities of foreign corporations, which for this purpose may include obligations of foreign governmental issuers, a Fund may elect to "pass through" to its shareholders the amount of such foreign taxes paid. If this election is made, information with respect to the amount of the foreign income taxes that are allocated to a Fund's shareholders will be provided to them and any shareholder subject to tax on dividends will be required (i) to include in ordinary gross income (in addition to the amount of the taxable dividends actually received) his/her/its proportionate share of the foreign taxes paid that are attributable to such dividends; and (ii) either to deduct his/her/its proportionate share of such foreign taxes in computing his/her/its taxable income or to claim that amount as a foreign tax credit (subject to applicable limitations) against U.S. income taxes.

U.S. holders who do not itemize deductions for U.S. federal income tax purposes will not be able to deduct their pro rata portion of qualified foreign taxes paid by the Fund, although such shareholders will be required to include their shares of such taxes in gross income if a Fund makes the election described above. Qualified foreign taxes generally include taxes that would be treated as income taxes under U.S. tax regulations but do not include most other taxes, such as stamp taxes, securities transaction taxes, and similar taxes. No deduction for such taxes will be permitted to individual U.S. holders in computing their alternative minimum tax liability.

If a Fund makes the election to pass through qualified foreign taxes and a shareholder chooses to take a credit for the foreign taxes deemed paid by such shareholder, the amount of the credit that may be claimed in any year may not exceed the same proportion of the U.S. tax against which such credit is taken that the shareholder's taxable income from foreign sources (but not in excess of the shareholder's entire taxable income) bears to the shareholder's entire taxable income. For this purpose, long-term and short-term capital gains a Fund realizes and distributes to shareholders will generally not be treated as income from foreign sources in their hands, nor will distributions of certain foreign currency gains subject to Section 988 of the Code or of any other income realized by a Fund that is deemed, under the Code, to be U.S.-source income in the hands of the Fund. This foreign tax credit limitation may also be applied separately to certain specific categories of foreign-source income and the related foreign taxes. As a result of these rules, which may have different effects depending upon each shareholder's particular tax situation, certain shareholders may not be able to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Shareholders who are not liable for U.S. federal income taxes, including tax-exempt shareholders, will ordinarily not benefit from this election. If a Fund does make the election, it will provide required tax information to shareholders. The Funds generally may deduct any foreign taxes that are not passed through to its shareholders in computing its income available for distribution to shareholders to satisfy applicable tax distribution requirements. Under certain circumstances, if a Fund receives a refund of foreign taxes paid in respect of a prior year, the value of the Fund's shares could be affected, or any foreign tax credits or deductions passed through to shareholders in respect of the Fund's foreign taxes for the current year could be reduced.

Foreign exchange gains or losses realized by a Fund in connection with certain transactions involving foreign currency-denominated debt securities, certain options and futures contracts relating to foreign currency, foreign currency forward contracts, foreign currencies, or payables or receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains or losses to be treated as ordinary gain or loss and may affect the amount, timing and character of distributions to shareholders.

The Funds may purchase the securities of certain foreign companies treated as passive foreign investment companies ("PFICs") for federal income tax purposes. PFICs may be the only or primary means by which a Fund may invest in some countries. If a Fund invests in equity securities of PFICs, it may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such securities even if such income is distributed as a taxable dividend to shareholders. Additional charges in the nature of interest may be imposed on a Fund with respect to deferred taxes arising from such distributions or gains. Capital gains on the sale of such holdings will be deemed to be ordinary income regardless of how long such PFICs are held. A "qualified electing fund" election or a "mark to market" election may generally be available that would ameliorate these adverse tax consequences, but such elections could require the Funds to recognize taxable income or gain (subject to the distribution requirements applicable to regulated investment companies, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax on a Fund, a Fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the Fund. In order for a Fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to a Fund on an annual basis, which it might not agree to do. A Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments.

If a sufficient percentage of the interests in a foreign issuer are held by the Fund, independently or together with certain other U.S. persons, that issuer may be treated as a "controlled foreign corporation" (a "CFC") with respect to the Fund, in which case a Fund will be required to take into account each year, as ordinary income, its share of certain portions of that issuer's income, whether or not such amounts are distributed. A Fund may have to dispose of its portfolio securities (potentially resulting in the recognition of taxable gain or loss, and potentially under disadvantageous circumstances) to generate cash, or may have to borrow the cash, to meet its distribution requirements and avoid Fund-level taxes. In addition, some Fund gains on the disposition of interests in such an issuer may be treated as ordinary income. A Fund may limit and/or manage its holdings in issuers that could be treated as CFCs in order to limit its tax liability or maximize its after-tax return from these investments.

In addition, if a Fund owned 10% or more of the voting power of a foreign entity treated as a corporation for U.S. federal income tax purposes for the last tax year of the foreign entity beginning before January 1, 2018, a Fund may have been required to include in its income its share of certain deferred foreign income of that foreign entity. Under those circumstances, a Fund may have been able to make an election to pay tax liability in respect of its share of any such income over eight years. It is possible these deferred payments could affect the value of shares, even though all or some of the Fund's shareholders at the time of any deferred payment may have derived no economic benefit from the foreign entity's deferred income.

Each Fund is required to withhold (as "backup withholding") a portion of reportable payments, including dividends, capital gain distributions and the proceeds of redemptions and exchanges or repurchases of Fund shares, paid to U.S. holders who have not complied with certain IRS regulations. The backup withholding rate is currently 24%. In order to avoid this withholding requirement, U.S. holders, other than certain exempt entities, must certify on IRS Forms W-9 or on certain other documents, that the Social Security Numbers or other Taxpayer Identification Numbers they provide are their correct numbers and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. A Fund may nevertheless be required to backup withhold if it receives notice from the IRS or a broker that a number provided is incorrect or that backup withholding is applicable as a result of previous underreporting of interest or dividend income.

Ordinary dividends and certain other payments made by a Fund to Non-U.S. holders are generally subject to withholding tax at a 30% rate (or a lower rate as may be determined in accordance with any applicable treaty). In order to obtain a reduced rate of withholding, a Non-U.S. holder will be required to provide an IRS Form W-8BEN or similar form certifying its entitlement to benefits under a treaty. The withholding tax does not apply to regular dividends paid to a Non-U.S. holder who provides an IRS Form W-8ECI, certifying that the dividends are effectively connected with the Non-U.S. holder's conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the Non-U.S. holder were a U.S. holder. A corporate Non-U.S. holder receiving effectively connected dividends may also be subject to additional "branch profits tax" imposed at a rate of 30% (or a lower treaty rate).

The 30% withholding tax described in the preceding paragraph generally will not apply to distributions of net capital gain, to redemption proceeds, or to dividends that a Fund reports as (a) interest-related dividends, to the extent such dividends are derived from a Fund's "qualified net interest income," or (b) short-term capital gain dividends, to the

extent such dividends are derived from a Fund's "qualified short-term gain." "Qualified net interest income" is a Fund's net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. "Qualified short-term gain" generally means the excess of the net short-term capital gain of a Fund for the taxable year over its net long-term capital loss, if any. In order to qualify for an exemption from withholding, a Non-U.S. holder will need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or other applicable form). Backup withholding will not be applied to payments that are subject to this 30% withholding tax.

Unless certain non-U.S. entities that hold Fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to a Fund's dividends payable to such entities. A Non-U.S. holder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that such Non-U.S. holder and the applicable foreign government comply with the terms of such agreement.

Shareholders and prospective shareholders of the Funds should consult their own tax advisers concerning the effect of owning shares of a Fund in light of their particular tax situations.

DIVIDENDS AND DISTRIBUTIONS

Each Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund's net investment income, substantially all of which will be declared as dividends to the Fund's shareholders.

The amount of income dividend payments by a Fund is dependent upon the amount of net investment income received by a Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board. The Funds do not pay "interest" or guarantee any fixed rate of return on an investment in its shares.

Each Fund also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain a Fund may realize from transactions involving investments held for less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any available carryover of capital losses), although a distribution from capital gains, will be distributed to shareholders with and as a part of the income dividends paid by a Fund and will generally be taxable to U.S. holders as ordinary income for federal income tax purposes. If during any year a Fund realizes a net gain on transactions involving investments held for more than the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, a Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses available to be carried over) generally will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax adviser.

Any dividend or distribution paid by a Fund reduces the Fund's NAV on the date paid by the amount of the dividend or distribution per share. Accordingly, a dividend or distribution paid shortly after a purchase of shares by a U.S. holder will generally be taxable, even if it effectively represents a partial return of the U.S. holder's capital.

Dividends and other distributions will be made in the form of additional shares of a Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of dividends and distributions by notifying the transfer agent in writing, but any such change will be effective only as to dividends and other distributions for which the record date is seven or more business days after the transfer agent has received the written request.

A Fund's investments in partnerships, if any, including in qualified publicly traded partnerships, may result in a Fund being subject to state, local or foreign income, franchise or withholding tax liabilities.

GENERAL INFORMATION

The Trust's Amended and Restated Agreement and Declaration of Trust ("Declaration of Trust") permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest. Each share of a Fund represents an interest in a Fund proportionately equal to the interest in the assets belonging to that series. Upon each Fund's liquidation, all shareholders would share pro rata in the net assets of a Fund available for distribution to shareholders.

Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. The Funds are not required to hold annual meetings of shareholders but will hold special meetings of shareholders when, in the judgment of the Board, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more trustees. Shareholders also have, in certain circumstances, the right to remove one or more trustees without a meeting.

The Trust may be terminated at any time by a vote of a majority of the trustees and written notice to the shareholders. Any series of Shares may be dissolved at any time by vote of a majority of the Trustees and written notice to the shareholders of such series. Any action to dissolve the Trust will also be deemed to be an action to dissolve each series and each Class thereof and any action to dissolve a series will also be deemed to be an action to terminate each Class thereof.

Shareholders may send communications to the Board. Shareholders should send communications intended for the Board by addressing the communications to the Board, in care of the Secretary of the Trust and sending the communication to 1900 Shawnee Mission Parkway, Suite 315, Mission Woods, Kansas 66205. A shareholder communication must (i) be in writing and be signed by the shareholder, (ii) provide contact information for the shareholder, (iii) identify the Fund to which it relates, and (iv) identify the series and number of shares held by the shareholder. The Secretary of the Trust may, in good faith, determine that a shareholder communication should not be provided to the Board because it does not reasonably relate to the Trust or its operations, management, activities, policies, service providers, Board, officers, shareholders or other matters relating to an investment in a Fund or is otherwise ministerial in nature. Other shareholder communications received by the Trust not directly addressed and sent to the Board will be reviewed and generally responded to by management, and will be forwarded to the Board only at management's discretion based on the matters contained therein.

The Declaration of Trust provides that no Trustee or officer of the Trust shall be subject to any personal liability in connection with the assets or affairs of the Trust except for losses in connection with his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. The Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, shareholders, trustees, officers, employees and agents covering possible tort and other liabilities. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Trust was unable to meet its obligations.

The Declaration of Trust does not require the issuance of share certificates. If share certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

The Declaration of Trust establishes a process pursuant to which a shareholder may bring a derivative action on behalf of the Trust, certain aspects of which are discussed here. In particular, a shareholder may bring a derivative action on behalf of the Trust only if the following conditions are met: (i) the shareholder must make a pre-suit demand upon the Trustees to bring the subject action unless an effort to cause the Trustees to bring such an action is not likely to succeed (the Declaration of Trust further specifies the only circumstances under which a demand on the Trustees is not likely to succeed and therefore would be excused); and (ii) unless a demand is not required under (i), the Trustees must be afforded a reasonable amount of time (in any case, not less than 90 days) to consider such shareholder request and to investigate the basis of such claim. Such provisions do not apply to claims brought under the federal securities laws.

The Declaration of Trust further provides that, to the fullest extent permitted by law, any claims, suits, actions or proceedings arising out of or relating in any way to a Fund or its business and affairs, the Delaware Statutory Trust Act, the Declaration of Trust or the Bylaws or asserting a claim governed by the internal affairs (or similar) doctrine shall be exclusively brought, unless the Fund, in its sole discretion, consents in writing to an alternative forum, in the Court of Chancery of the State of Delaware or, if such court does not have subject matter jurisdiction thereof, any other

court in the State of Delaware with subject matter jurisdiction. Such requirements may require shareholders to have to bring state law claims in an inconvenient or less favorable forum. Such court may be less convenient and/or less favorable for a shareholder than one or more other courts. The exclusive state court jurisdiction provisions shall not apply to claims under the Securities Act, the 1940 Act or other federal securities laws and the federal securities laws shall govern the determination of a court with appropriate jurisdiction with respect to such claims. For claims arising under the federal securities laws, the Declaration of Trust provides that the federal court with appropriate jurisdiction is the United States District Court for the Southern District of New York, which provision may be unenforceable under the federal securities laws because both the Securities Act and the 1940 Act permit such claims to be brought in both state and federal court. Such requirement may require shareholders to bring claims under the federal securities laws in an inconvenient or less favorable forum. The Declaration of Trust also provides that to the fullest extent permitted by law, a shareholder waives any and all rights to a trial by jury in such claim, suit, action or proceeding.

No provision of the Declaration of Trust shall be effective to require a waiver of compliance with any provision of, or restrict any shareholder rights granted by, the Securities Act, the Securities Exchange Act of 1934, as amended, or the 1940 Act, or of any valid rule, regulation or order of the Commission thereunder.

FINANCIAL STATEMENTS

Incorporated by reference herein are the Funds' Annual Financials and Other Information for the fiscal year ended June 30, 2026, which are included as part of the Funds' Form N-CSR filings and include the "Report of Independent Registered Public Accounting Firm", "Schedule of Investments", "Statement of Assets and Liabilities", "Statement of Operations", "Statement of Changes in Net Assets", "Financial Highlights" and "Notes to Financial Statements". A copy of each Fund's Annual Financials and Other Information, Annual Report and Semi-Annual Report can be obtained at no charge by calling 800-736-1145 or writing the Funds.

APPENDIX — A
PROXY VOTING POLICIES AND GUIDELINES

Advisor
Palmer Square Capital Management LLC

Proxy Voting Guidelines

In accordance with Rules 30b1-4 (new) & 206(4)-6 (new) & 204-2 (amended) of the Investment Advisers Act of 1940, Palmer Square Capital Management LLC ("Palmer Square") is providing all clients with a summary of its proxy voting procedures.

- Upon opening an account with Palmer, clients are given the option to delegate proxy-voting discretion to Palmer Square by completing the appropriate documents. Palmer Square will only exercise proxy-voting discretion over client shares in the instances where clients give Palmer Square discretionary authority to vote on their behalf.
- It is Palmer Square's policy to vote client shares primarily in conformity with Glass Lewis & Co. recommendations, in order to limit conflict of interest issues between Palmer Square and its clients. Glass Lewis & Co. and Palmer Square retain a record of all recommendations.
- Palmer Square conducts a review at least annually of Glass Lewis & Co. to assess the firm's capacity and competency to serve as a proxy advisor.
- Glass Lewis & Co. is a neutral third party that issues recommendations based upon its own internal guidelines.
- Palmer Square may vote client shares inconsistent with Glass Lewis & Co. recommendations if Palmer Square believes it is in the best interest of its clients. In such a case, Palmer Square will have on file a written disclosure detailing why they believe Glass Lewis & Co.'s recommendation was not in the client's best interest.
- In situations where there is a conflict of interest in the voting of proxies due to business or personal relationships that Palmer Square maintains with persons having an interest in the outcome of certain votes, Palmer Square will take appropriate steps to ensure that its proxy voting decisions are made in the best interest of its clients.
- Palmer Square votes client shares via ProxyEdge, an electronic voting platform provided by Broadridge Financial Solutions, Inc. Additionally, ProxyEdge retains a record of proxy votes for each client.
- Annually, Palmer Square will file Form N-PX with the SEC, which will contain each fund's complete proxy voting record.
- Palmer Square's Compliance Department will periodically review all proxy votes to ensure consistency with its procedures.
- Upon request, clients can receive a copy of Palmer Square's proxy voting procedures and Glass Lewis & Co.'s proxy voting guidelines.
- These procedures are currently in effect.

If you have any questions or would like a copy of Palmer Square's proxy voting procedures, Glass Lewis & Co.'s proxy voting guidelines and/or a record of how your shares were voted, please contact Palmer Square's Chief Compliance Officer at 913-647-9700.

PALMER SQUARE FUNDS TRUST
PROXY VOTING POLICIES AND PROCEDURES

Palmer Square Funds Trust (the "Trust") is a registered open-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the "Proxy Rule"), the Board of Trustees of the Trust (the "Board") has adopted this proxy voting policy on behalf of the Trust (the "Policy") to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the shareholders of each series of the Trust (each, a "Fund" and collectively, the "Funds").

Delegation of Proxy Voting Authority to Investment Adviser

The Board believes that the investment adviser for each Fund (the "Adviser"), as the entity that selects the individual securities that comprise each Fund's portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust shall therefore defer to, and rely on, the Adviser to make decisions on how to cast proxy votes on behalf of such Fund.

The Trust hereby designates the Adviser as the entity responsible for exercising proxy voting authority with regard to securities held in a Fund's investment portfolio. Consistent with its duties under this Policy, the Adviser shall monitor and review corporate transactions of corporations in which a Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by a Fund under the Proxy Rule and the 1940 Act. The Adviser shall perform these duties in accordance with the Adviser's proxy voting policy, a copy of which shall be presented to this Board for its review. The Adviser shall promptly provide to the Board updates to its proxy voting policy as they are adopted and implemented.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

A copy of the Adviser's proxy voting policy and this Policy may be posted on the Adviser's website. A copy of such policies and of each Fund's proxy voting record shall also be made available, without charge, upon request of any shareholder of a Fund, by calling the applicable Fund's toll-free telephone number as printed in such Fund's prospectus. The Trust's administrator shall reply to any Fund shareholder request within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

The Adviser shall provide a complete voting record for the 12 months ended June 30 each year, as required by the Proxy Rule, to the Trust's administrator by July 15. The Trust's fund administrator will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.

Adopted: April 16, 2024
